

SPRING/SUMMER 1975

Our Guarantee:

"If any of the materials or workmanship of the products we sell are found to be defective, or below our highest standards of quality, we will exchange the item, or refund your full purchase price and all parcel post costs."

Dear Friends,

Ralph Waldo Emerson once wrote "Nothing astonishes men so much as common sense and plain dealing." — and unfortunately, I would guess those words are more true today than when written many years ago.

Our company has been in business for twenty-nine years. Alice and Roy Holubar won many friends and customers with their "common sense and plain dealing" — and I can assure you that simple philosophy is still our policy.

Today, in a time of many economic uncertainties, businesses discuss decisions involving — increase sales — cut overhead — increase margins by cutting a few corners. — We are more sure than ever before people appreciate "common sense and plain dealing."

The products and descriptions in this catalog represent an effort to bring you *quality* products at reasonable prices. The photos are factual (the models are "us"!); the descriptions are honest, and the desire to give you service is sincere. — We feel there is no substitute for craftsmanship, for quality, and for "common sense and plain dealing."

We hope you will give us an opportunity to be of some service to you. — We enjoy our work, and we hope it will show.

Many thanks.

Sincerely,

Jim Kack
President

Holubar Production

The Holubar Production group works in a "behind the scene" setting but is certainly a very important part of the reputation we have acquired over the years for providing you with the finest backpacking equipment available. Their skill and talent, along with pride of workmanship is evident in every product leaving our production facility. Our method of construction requires that a seamstress sew the entire item by herself and we find the end result to be of an unmatched quality.

Whenever you write to us about your experiences with Holubar equipment or service (You'll find examples of these customer comments throughout the catalog . . .) we circulate copies back to the production people and they sincerely enjoy reading your comments — they do care — and feel very pleased that their efforts are recognized.

Much of their total effort, in all phases of production is "hidden" inside the sleeping bag or garment but becomes quite evident in the product's performance and long life . . . a major reason for your confidence in Holubar products!

Brenda Llewellyn is one good reason for the "touch of pride" in our products. We have many more — and if we didn't mention them too, we'd be in trouble! Selecting the right fabric, designing, testing, cutting, sewing, setting snaps, filling the Down insulation, inspecting — it takes top people in every area to make top products. We feel we have those top people, and it is reflected in our products.

Each product, handcrafted by a Holubar seamstress, assures you of the finest in outdoor equipment. Seamstresses like Brenda have seen, and sewn, many sleeping bags, jackets, and tents. They also see many other brands (we like to check them as well!) so that we are more confident than ever when we say "compare ours to any other and you, too, will be convinced!"

Brenda Llewellyn. From Bishops Castle, Shropshire, England. Brenda has been at Holubar for eight years, and is one of the many reasons why "a touch of pride" goes into every handcrafted Holubar product.

Holubar Mail Order is a fast, dependable means of obtaining the finest quality outdoor equipment available. Our Mail Order Staff is especially aware of the customer's need for fast accurate service and each order is handled with that thought in mind.

In cases where your weekend or vacation plans require "last minute equipment," we suggest that you prepare your order and then telephone us (Area Code 303-442-8413 — Sorry no collect calls) and we will advise you of the availability of the items and generally we can ship that very day! In such cases, payment with the order is required and we suggest using a charge card (American Express, Master Charge or Bank Americard) to expedite release of the equipment. A second method is to wire the order with payment and in this case, please remember to include your full address. In the past, we have received telegram orders without the address and we have been placed in a very helpless situation.

We sincerely believe in personal service for each and every order, as well as answering questions on equipment, and many, many personal replies are written by our staff every year. All equipment is backed by the Holubar Guarantee and we sincerely hope we can be of service in 1975!

Holubar Mail Order

I am writing to tell you how pleased I am with your superb company. At the present I own a Holubar "Rocky Mountain Sweater," "Pinebrook Vest," "Down Mittens," and a "Timberline" bag. I have always been impressed by your highly efficient mail order service, the best I've ever used, including, _____, and _____.

Everyone of these products live up to your fantastic reputation which I've heard about from seasoned backpackers, etc. Your products have proven themselves to me from Colorado to Italy to Switzerland. You can bet I'll be doing business with you again soon. Thanks again for being the proud company that you are.

*Mike Perkins
Dallas, Texas*

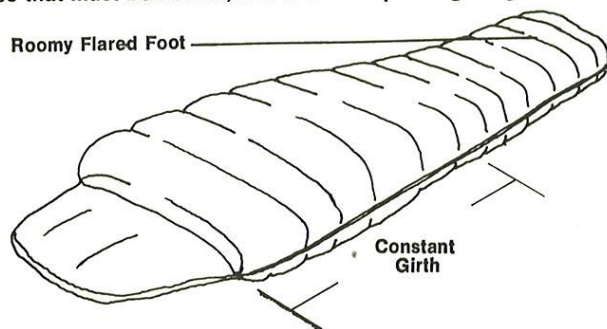

Holubar Sleeping Bags

... the Standard by Which Other Brands are Judged!

For over 29 years, Holubar has been making Goose Down insulated sleeping bags of the highest handcrafted quality and you'll find our 1975 models to be the top of the line in terms of performance, quality, durability and a very sound practical dollar value for your investment. Holubar sleeping bags have proven themselves for our many fine customers, time and time again in a variety of camping conditions around the world ... their endorsement has been our biggest source of new customers.

The Little Differences That Count . . .

Holubar sleeping bags are designed with a body-like shape ... a new feature for our TIMBERLINE model this year ... of constant inside girth from shoulders down to the hips and then taper to a roomy, flared foot end. The shoulder/hip girth provides a comfortable space for movement of arms or turning of the shoulder and hips; this girth also increases proportionately with each increase in sleeping bag length ... Holubar offers three standard lengths, by the way, when most other companies offer only two. The internal space created by the "Holubar shape" is a practical balance of comfort, the inside space that must be heated, and total backpacking weight.

Inside our bag, soft folds of the inner shell shape around and gently snuggle against the sleeper, reducing the air pockets between legs, arms and around the shoulders ... essentially reducing the inside volume which requires less internal body heat generation to maintain warmth. Holubar has examined and tested a number of designs, including differential cut, and none can outperform our "full cut." Our precisely measured Down fills, coupled with internal baffling, control Down shift for maximum loft and prevent "thin spots" around elbows, knees, and shoulders ... even during movement. The outside shell surface is smooth to minimize wind cooling. We suggest that you try not to get frustrated by all the theories presented in various catalogs ... the proof is in performance and over the past 29 years, the Holubar "full cut" has proven to be best for warmth and freedom of movement (comfort) whether it's a three season model or our sub-zero temperature models.

The Holubar Down insulated hood draws up completely around the sleeper's head, and the shoulder girth snugs-down to eliminate drafts and prevent heat loss by a unique drawstring/cord-lock system. The hood and shoulder girth can be drawn up together or each independently to suit the sleepers personal preference. Just another important Holubar feature that controls internal warmth and comfort for the sleeper.

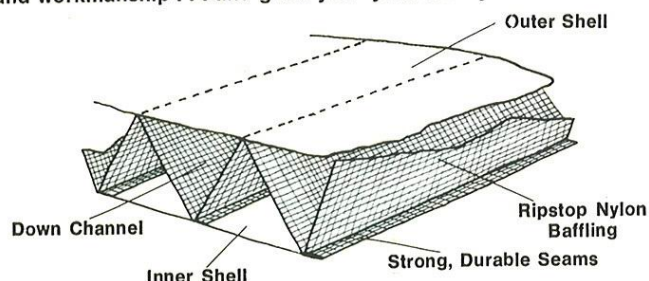

Holubar sleeping bags feature a durable, 70 inch, #10 Y.K.K. DELRIN zipper which is easy running, especially in cold weather. The two-way slider can be unzipped from the bottom to ventilate the foot end. Holubar bags of any model length and opposite zipper opening, zip together to form a roomy, double bag. (Excludes CONVERTIBAG and CHILD models). All zippers are protected by a plump Down draft tube.

Holubar Sleeping Bag Liners (optional) extend the life of your bag by protecting the inside against wear and soiling. Fastened by a snap and tie system to become an integral part of the bag, a Liner will easily pay for itself in the sleeping bag cleaning bills it will save you. (See page 8 for additional information.)

These are some of the functional features found in Holubar sleeping bags, features that make a difference, and we're confident that once you try one of our bags, you'll agree with our many other customers that they are the top of the line in quality, performance and dollar value.

Constructing a Holubar Sleeping Bag

Included in the price of any ready made sleeping bag is the factor of labor and it's only natural that you seek "your money's worth" ... at Holubar, the skill and craftsmanship of our seamstress group is unequaled by any other group making sleeping bags. Why? Simply because they sew the entire bag together by themselves and not just portions as found in assembly line techniques used by most manufacturers. That "touch of pride" workmanship, along with a continuing program of reviewing construction techniques and materials, strict checks of all incoming raw materials and quality control checks throughout the making of a sleeping bag assures you that each finished sleeping bag meets our very high standards of quality and workmanship ... and gives you "your money's worth."

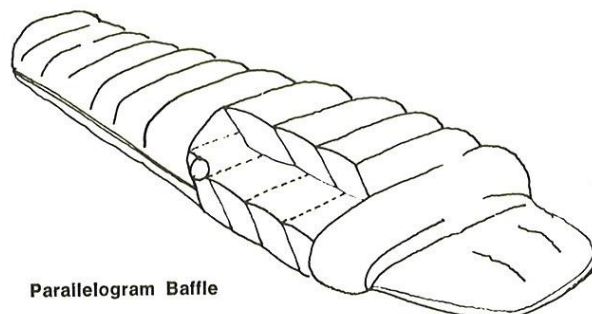

In any Goose Down insulated sleeping bag, compartments are required to hold the Down fill at a firm, insulating density (loft) and prevent shifting of the Down in either a cross-wise or length-wise direction. These compartments or "channels" are formed by sewing an interlining wall (baffle), at regular intervals between the inner and outer sleeping bag shells. You can note this interval by the visible, external stitching running around the circumference of the bag.

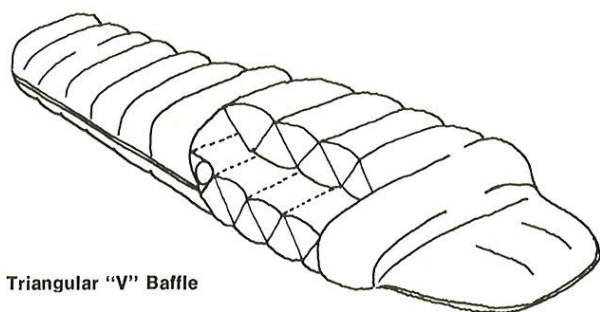

Our baffle material is a strong, Downproof ripstop nylon, sewn to the inner and outer shells with a sturdy rolled seam ... providing both a Downproof compartment and an extremely strong internal framework for added durability and increased sleeping bag life. Our study of other baffle materials in use indicated weaknesses and undesirable characteristics which led to their rejection for use in a Holubar sleeping bag.

Holubar has calculated and assigned a precise amount of Down fill for each channel to assure a non-shifting, efficient insulating density throughout the bag ... for your warmth and comfort.

As you study sleeping bag construction, you'll find Down channels of various dimensions and cross-sectional geometry. Holubar channels are 6 inches wide and 4 inches deep except in our EXPEDITION and ULTIMATE models (two bags designed for extremely cold, sub-zero weather) where the channel depth is increased to 5 inches to accommodate additional Down fill for added insulation thickness (loft).

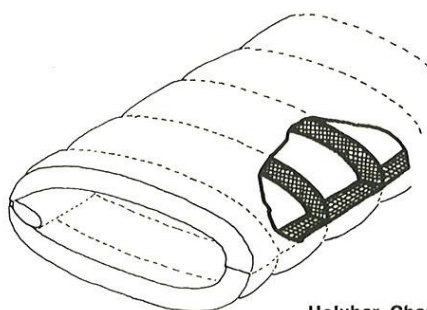

Over the past 29 years, Holubar has found the slanted baffle wall (or parallelogram channel cross-section) to be an ideal configuration for our sleeping bags in the Summer (Three Season) temperature classification, as it provides excellent Down control in a temperature range to 0°F., plus it offers a weight savings as additional baffling (added Down control) is not really needed for that temperature limit.

Triangular "V" Baffle

In our winter bag classification (for bags rated in sub-zero temperatures) we have found that the triangular channel cross-section ("V") provides the additional Down control needed to assure a stable insulating thickness which is critical for comfort in sub-zero temperatures. Our winter bags have an excellent performance record in sub-zero temperatures around the world.

Holubar Channel Block

HOLUBAR CHANNEL BLOCK: Within each Down channel, on the side opposite the zipper, we sew in a Downproof baffle (full channel depth) which completely "blocks" the channel and prevents the Down from shifting from the bottom half of the bag to the top half of the bag due to body weight or from top to bottom when stuffing or rolling your bag. The HOLUBAR CHANNEL BLOCK was first developed by Holubar and we feel it is an important feature for controlling Down shift and maintaining constant loft in all of our sleeping bags from the TIMBERLINE model through the ULTIMATE model. In fact, in our ULTIMATE model, where comfort in extreme sub-zero temperatures is dependent on a reliable, uniform insulation density, we employ five CHANNEL BLOCKS in each channel to form six individual Down compartments per channel — the ultimate in Down control found in no other bag on the market!

GOOSE DOWN INSULATION: The function of an insulation in a sleeping bag is to provide a dead air space to trap and prevent the loss of body heat to the surrounding environment. However, due to the fact that the body also gives off a considerable amount of moisture, the insulator must have the ability to breathe, a characteristic which allows the moisture to escape and prevent a chilling factor. For backpacking, the insulator should also be lightweight and compressible for packing on the trail. Of all the insulators available, Goose Down is still the most efficient insulator in fulfilling the above requirements. Goose Down has the inherent ability to "spring back" after being removed from the stuff sack and provide an efficient, insulating thickness. The life of this resiliency is directly related to the quality of the Down . . . an important reason why Holubar never compromises on the quality of the Goose Down used throughout our sleeping bag line.

In your shopping research, you should be aware that Goose Down is available in a variety of mixtures and quality, and in most cases it really depends on the integrity of the sleeping bag manufacturer as to the identity of the insulation.

All Down producers offer several grades of Down and can supply the bag manufacturer with various mixtures of Down and feathers as well as colors. They can furnish, within limits, what the bag manufacturer wishes to have and the price is in direct relation to the grade he receives. In other words, you can buy Down like you can make chili. If you use more meat, it costs more — if you use more beans, it costs less!

Two mixtures or grades of Down common to the backpacking industry are "Garment" grade (the more expensive) and "Bag" grade, the type most often used for the filling or insulating of sleeping bags. The actual feather content of Garment grade is about 8% to 11% and the feather content of Bag grade is about 12% to 20%. Holubar uses the Garment grade throughout our sleeping bag line (including our Kit line)! By law, the sleeping bag manufacturer can label his insulation Goose Down if 80% of the mixture or product is Down and 90% of that Down content is Goose Down.

The remaining 20% of the mixture can be feathers, fibre or feather fibre. There is no such thing as 100% Goose Down. By law, it would mean that no feather content is present and because the separation of each tiny feather would have to be done by hand, the operation is unquestionably just not feasible. As most manufacturers will attest, color is not an important factor in the quality and is only an aesthetic consideration.

What do the labels mean? You will read labels such as "100% Prime Northern Goose Down," "100% AA Super Down," etc. which are really "brand names" and do not describe the feather content of the Down. You will find various labels and terminology used to describe Down and if the manufacturer's literature does not clearly identify the feather content and type of Down — ask him! Unfortunately, however, many stores or dealers who handle Down products really do not know actual details.

Down is much "tougher" than most people think. Though an inexperienced person can ruin a Down garment or bag in a washing machine or dry cleaner . . . it is usually the casing or fabric that will be destroyed before the actual Down itself.

Duck Down can be a good quality insulator, and though we do not use it in any of our sleeping bags or jackets, we feel the manufacturers who do use it should not attempt to "sell" it by attempting to justify its merits via "muddying the waters" of the facts regarding Down. To date, there has been very little legislation to govern the grading and advertising of Down. Work is currently being done however, and hopefully within the next few years definite standards will be so stated that it removes the subjectivity from the issue, and the consumer will definitely be able to see what he is getting by looking at the Federal Label on the product.

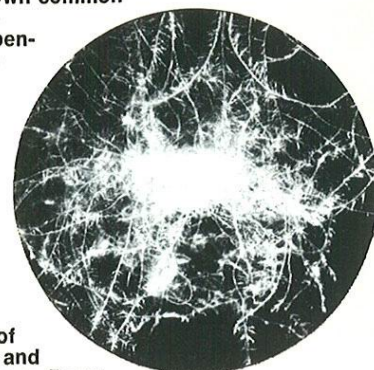

For the present, and practically speaking, *Goose Down is better than Duck Down!* The reason for using Duck Down is normally a price consideration . . . Enough said!

FREE DOWN BROCHURE: Write Holubar Mail Order for this very informative brochure on "All About DOWN". . . it's light reading and free!

TEMPERATURE RATING: The minimum temperature rating quoted on each of our sleeping bags is conservative. We would rather build in a safety factor, allowing for the coldest sleepers, than to get a complaint. We do not use maximum temperatures or a "range" figure, as we do not believe a sleeping bag, built for cold weather, will be comfortable in high temperature. There are simply too many variables (i.e. altitude, metabolism, wind chill, humidity) that affect the person's comfort, and/or the sleeping bag's performance, so we try to tell it "like it is!"

We invite questions concerning the construction and materials used in our bags and hope you will do a thorough job of comparing with others before buying.

Please remember that if you would like to order one of our sleeping bags and after inspecting it, feel it does not meet your expectations, you may return it for a full refund, including postage.

Spring/Summer

The **TIMBERLINE** is now shaped like the **ROYALIGHT** . . . constant girth from shoulders to hips and then tapers to a roomy, flared foot end.

Two Holubar bags of the same or unequal lengths, but opposite opening will zip together.

Holubar "TIMBERLINE" The Three Season Sleeping Bag

Perfect for backpacking, camping or fishing based on its record of excellent performance and Holubar quality workmanship.

Warm to 0° F. with no cold stitched through seams or cold spots.

The outer shell fabric is a durable 1.9 ounce ripstop nylon in Navy Blue. The internal baffle system is a Downproof 1.1 ounce ripstop nylon sewn to the outer shell with sturdy rolled seams. Each Down channel or compartment formed by the baffle system is 6 inches wide with a parallelogram cross-section. With this cross-section, adjacent Down channels overlap and the baffle seams are always protected by Down, even with pressure or compression on the channel during use. Holubar uses only Garment Grade AA PRIME NORTHERN GOOSE DOWN, uniformly distributed in precise weights to each Down channel. To further prevent shifting of the Down, our internal baffle system employs the original **HOLUBAR CHANNEL BLOCK**, a side baffle opposite the zipper side which prevents Down shifting from the bottom half due to body weight or from top to bottom when rolling or stuffing the bag.

The **TIMBERLINE** is available with either a left or right side

zipper. The 70-inch #10 (large size) Y.K.K. DELRIN zipper has a two-way double pull slider system which allows the zipper to remain closed at the shoulder, yet open at the bottom end of zipper for ventilation if desired. A large Down filled tube insulates the entire zipper to eliminate any cold spots. The outer zipper covering is corded for better wear and durability.

The **TIMBERLINE** is constant from the shoulders through the hips and then tapers to 41" at the flared foot end; the bag is contoured, yet not the least confining.

The hood can be left flat or forms a hood by adjusting the drawstring. The bag can also be closed at the shoulders independently of the hood.

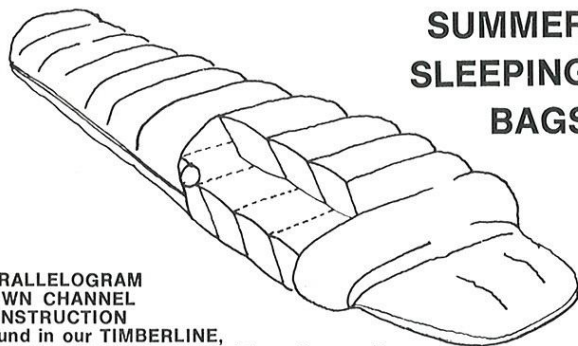

Liner and cover fittings are complete in every bag. Waterproof stuff sack (#7) and a handy storage sack are also included.

HP001: HOLUBAR TIMBERLINE

INSIDE LENGTH	INSIDE GIRTH	DOWN WT.	TOTAL WT.	
5'10"	60"	2 lbs. 4 oz.	4 lbs. 2 oz.	\$111.00
6'2"	64"	2 lbs. 8 oz.	4 lbs. 8 oz.	\$116.00
6'6"	66"	2 lbs. 12 oz.	4 lbs. 13 oz.	\$122.00

Holubar

SUMMER SLEEPING BAGS

PARALLELOGRAM DOWN CHANNEL CONSTRUCTION

Found in our **TIMBERLINE**, **PONDEROSA**, and **CHILD'S**, Three Season Bags.

Our Summer or Three Season bags, the **TIMBERLINE**, **PONDEROSA**, and **CHILD'S BAG**, feature a Down channel with a parallelogram cross section. The parallelogram design, reduces baffle weight over a "V" baffle design, yet provides more than adequate Down control for normal Three Season temperature ranges. Another helpful summer feature is the two-way zipper which allows you to open and ventilate the foot-end during warm temperatures.

Sleeping Bags

Inside another bag... added warmth for cold weather use. By itself... a superlight summer sleeping bag!

Holubar "CONVERTIBAG" The New Dual-Purpose Addition for Spring '75

Designed to be used by itself or as a Down liner, the new dual-purpose CONVERTIBAG offers you the potential of four season use.

Available in three lengths, 5'10", 6'2", and 6'6" the CONVERTIBAG features a half-length, side zipper... unique in that you can simply turn the bag inside out to reverse the side opening. An important, versatile feature in the liner application as one CONVERTIBAG can be used with the different side opening bags you may own.

Quilted seams form 8" x 10" rectangular Down compartments to hold the PRIME NORTHERN GOOSE DOWN insulation uniformly in place. The quilted seam design eliminates internal baffle weight and provides the most effective insulating thickness for an inner liner application. Nylon, flat-lace ties, along with snaps, secure the CONVERTIBAG in place (with any Holubar bag), and for non-Holubar bags, we furnish instructions on how to sew flat-lace ties into your bag if you desire — it's a simple procedure!

When used inside your bag, the top (head end) Down channel becomes a Down Collar, to stop drafts and prevent heat loss

(adjustable in girth with a drawstring and leather slider). A non-insulated hood "envelope" slips over the hood portion of your bag, or for hoodless bags and the CONVERTIBAG by itself, simply stuff with clothing to form a pillow! Good to 40° F. by itself.

The shell fabric is 1.5 ounce ripstop nylon with a smooth running, 35-inch #7 ZIPLON coil zipper.

If there is any question on whether or not the CONVERTIBAG will fit inside your non-Holubar bag, please feel free to order one and try it for fit. Just return for a full refund (including surface postage) if it doesn't meet your needs.

Color: Royal Blue

HP028: HOLUBAR CONVERTIBAG

LENGTH	SHOULDER GIRTH	HIP GIRTH	FOOT GIRTH	DOWN WT.	TOTAL WT.	
5'10"	57"	57"	38"	19 oz.	31 oz.	\$58.00
6'2"	60"	60"	38"	21 oz.	35 oz.	\$59.00
6'6"	63"	63"	38"	23 oz.	39 oz.	\$60.00

Holubar "PONDEROSA" The Roomy, Rectangular, Three-Season Bag

The Holubar PONDEROSA combines the efficiency and light-weight of a backpacking sleeping bag with the generous size of a fully rectangular bag. The ideal combination for the backpacker or trailer camper who likes a roomy sleeping bag.

Warm to about 0° F. with no cold seams or cold spots.

The outer shell in Blue 1.9 ounce 11-A ripstop nylon with the interior overlapping "parallelogram" Down channels made from 1.1 ounce Downproof ripstop nylon. Down fill is Garment Grade AA PRIME NORTHERN GOOSE DOWN.

The zipper system is made up of a 70-inch #10 (large size) Y.K.K. DELRIN zipper (with two-way double pull sliders) full length along either left or right side allowing the same side ventilation as all other HOLUBAR sleeping bags. The second DELRIN zipper is around the entire bottom end of the bag and slightly overlapping the side zipper, allowing the bag to be opened completely flat as a large Down comforter. Both zippers are backed by large Down filled tubes to eliminate any cold spots. The PONDEROSA will also zip to any other HOLUBAR sleeping bag for the zip-together feature.

Liners and cover fittings are complete in every bag, ready for liner and cover use if ordered with the bag, or if ordered later. Waterproof stuff sack (#7) included.

Two-way, separating zipper allows perfect foot end ventilation.

I bought my "Timberline" bag more than ten years ago. It has seen me through snow storms... has been covered with ice from the spray of a nearby waterfall... has been carried up the highest climbs in California... and been toiled thousands of miles!! I like it! THANKS AGAIN!!

*A. B. Cossey
Denver, Colorado*

The versatile PONDEROSA opens completely flat for use in a cabin, station wagon or camper.

HP005: HOLUBAR PONDEROSA

INSIDE LENGTH	INSIDE GIRTH	DOWN WT.	TOTAL WT.	
6'4"	65"	3 lbs.	5 lbs. 11 oz.	\$144.00

For Expedition Warmth, the CONVERTIBAG and ROYALIGHT team-up for a perfect combination.

Holubar hood and drawstring can be drawn up independently for added protection against drafts ... locks with cord-lock.

Holubar "ROYALIGHT" Maximum Warmth with Minimum Weight

One of the finest sleeping bags available for maximum warmth with absolute minimum weight and pack size, the superior construction and Holubar quality workmanship of the ROYALIGHT will give you a sleeping bag for a lifetime.

Warm to about -20° F. with no cold seams or cold spots!

The outer shell fabric is a tough 1.5 ounce ripstop nylon in Royal Blue. The internal baffle system is a Downproof 1.1 ounce ripstop nylon sewn to the outer shell with sturdy rolled seams. The baffle system forms over fifty individual 6-inch wide overlapping "V" Down channels. The overlapping "V" Downproof honeycomb structure maintains constant Down thickness and prevents Down shift of the uniformly distributed Garment Grade AA PRIME NORTHERN GOOSE DOWN. The original HOLUBAR CHANNEL BLOCK is a side baffle opposite the zipper side that blocks or prevents Down shifting from the bottom half of the sleeping bag to the top half due to body weight or from top to bottom when stuffing or rolling the sleeping bag.

The ROYALIGHT is available with either a left or right side zipper. The 70-inch Y.K.K. DELRIN zipper is a #10 (large size) with a two-way double pull slider system which allows the zipper

to remain closed at the shoulder, yet open at the bottom end of zipper for ventilation if desired. A large Down filled tube insulates the entire zipper to eliminate any cold spots. The outer zipper covering is corded for better wear and durability.

Holubar sleeping bags are proportionately larger in girth for the longer lengths. The ROYALIGHT is constant from the shoulders through the hips and then tapers to 41" at the flared foot end; the bag is contoured, yet not the least confining.

Liner and cover fittings are complete in every bag, ready for liner and cover use if ordered with the bag or if ordered later. Waterproof stuff sack (#7) included and a handy, non-confining sack for use during storage of the bag.

HP002: HOLUBAR ROYALIGHT

INSIDE LENGTH	INSIDE GIRTH	DOWN WT.	TOTAL WT.	
5'10"	60"	2 lbs. 10 oz.	4 lbs. 5 oz.	\$137.00
6'2"	63"	3 lbs.	4 lbs. 13 oz.	\$144.00
6'6"	65"	3 lbs. 4 oz.	5 lbs. 3 oz.	\$151.00

Holubar ACCESSORIES that INCREASE the life of your bag!

"SLEEPING BAG LINER"

Easily removable and washable, saves wear and tear, and keeps the inside fabric clean. HOLUBAR liners fasten securely on sides, foot and hood by a snap and tie system. Fine ripstop nylon fabric is quick to wash and dry. Liners function independently and without interference in zip-together bags. All HOLUBAR sleeping bags are equipped with liner fittings. To order, state HOLUBAR bag MODEL, LENGTH of bag, and whether zipper is LEFT or RIGHT SIDE. **NOTE:** 1975 TIMBERLINES are now shaped like ROYALIGHT, EXPEDITION and ULTIMATE. HP013 fits all.

"SLEEPING BAG COVER"

A sleeping bag cover adds warmth and protects outer fabric against abrasion and soiling. HOLUBAR covers fasten securely over outside of bag and extend to inside of hood area and front inside edge where soiling is greatest. All covers have a 54" nylon pocket for inserting a foam sleeping pad. Two covers can be joined to provide common shell for zip-together bags. Fabric is tight-weave, SUPERNYL water repellent nylon on top and hood areas, watertight NYLPORT on bottom. To order state bag model, and whether LEFT or RIGHT side zipper.

Color: Blue top; Orange bottom
HP026: TIMBERLINE, ROYALIGHT, EXPEDITION, ULTIMATE.
Wt. 19 oz. \$28.00

For bags without Holubar Collar:
HP013: BAG LINER (7 oz.) \$15.00
HP015: PONDEROSA LINER (8 oz.) \$19.00

For Holubar Collar bags, please order respective liners below:
HP014: TIMBERLINE, ROYALIGHT, EXPEDITION, ULTIMATE LINER (9 oz.) \$18.00
HP019: PONDEROSA LINER (9 oz.) \$20.00

Holubar "EXPEDITION"

Holubar has designed the EXPEDITION with a higher "V" baffle channel to hold more Garment Grade AA PRIME NORTHERN GOOSE DOWN, and provide the extra insulation needed for winter mountaineering.

Conservative temperature rating on the EXPEDITION is about -30° F.

The outer shell fabric is a tough 1.5 ounce ripstop nylon in Royal Blue. The internal baffle system is a Downproof 1.1 ounce ripstop nylon. The baffle system forms over fifty individual, 6-inch wide overlapping "V" Down channels. The original HOLUBAR CHANNEL BLOCK is a side baffle opposite the zipper side that blocks or prevents Down shifting in each channel from the bottom half of the sleeping bag to the top half.

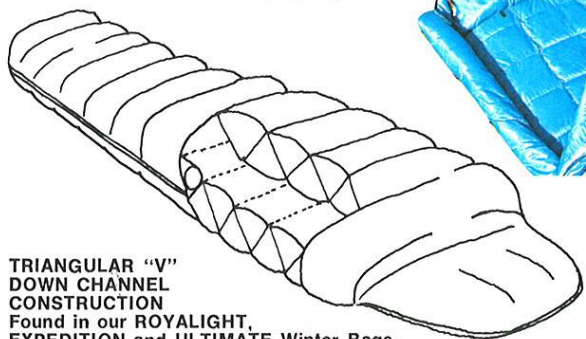

The 70-inch Y.K.K. DELRIN zipper is a #10 (large size) with a two-way double pull slider system, insulated by a large Down filled tube.

The hood forms by adjusting the drawstring, and the bag can also be closed at the shoulders independently of the hood. A standard feature on the EXPEDITION is the HOLUBAR COLLAR. Waterproof stuff sack (#8) included, plus a handy, non-confining sack for use during storage of the bag.

HP003: HOLUBAR EXPEDITION

INSIDE LENGTH	INSIDE GIRTH	DOWN WT.	TOTAL WT.	
5'10"	60"	3 lbs. 4 oz.	5 lbs. 1 oz.	\$170.00
6'2"	63"	3 lbs. 11 oz.	5 lbs. 10 oz.	\$177.00
6'6"	65"	4 lbs.	6 lbs.	\$182.00

The HOLUBAR DOWN COLLAR is a standard feature on the EXPEDITION and ULTIMATE winter sleeping bags.

TRIANGULAR "V" DOWN CHANNEL CONSTRUCTION
Found in our ROYALIGHT, EXPEDITION and ULTIMATE Winter Bags.

Holubar WINTER SLEEPING BAGS

Our Winter and extreme cold weather bags feature Down channels with a "V" baffle cross section to provide maximum Down control, eliminate cold spots and increase the strength or durability of the overall bag construction. Another feature found on all Holubar adult, baffle bags, but especially important in wintertime camping, is the HOLUBAR CHANNEL BLOCK, a baffle in each channel, opposite the zipper side, which prevents the Down from shifting and leaving cold spots.

Holubar "ULTIMATE"

Employing Holubar's highest standards of sleeping bag design, quality and workmanship, we sincerely feel this is the finest sleeping bag made today.

Warm to -40° and below, with no cold stitched through seams or cold spots — this is truly the "ULTIMATE"!

The outer shell fabric is a tough, ultra-light .75 ounce ripstop nylon in Royal Blue. The inner baffle system used 15 yards of 1.1 ounce Downproof ripstop nylon to make up the 146 separately sealed, overlapping "V" channels that hold the precisely weighed, hand screened AA PRIME NORTHERN GOOSE DOWN.

The ULTIMATE has a 70-inch #10 (large size) Y.K.K. DELRIN zipper with a two-way double pull system. The ULTIMATE has a constant girth from the shoulders through the hips and tapers to a 41" girth at the roomy foot end.

The HOLUBAR DOWN COLLAR is a standard feature on the ULTIMATE. Waterproof stuff sack (#8) included, plus a handy, non-confining sack for use during storage of the bag.

"DOWN COLLAR"

An Original Feature by Holubar

The HOLUBAR COLLAR is a down-filled tube (8½ inches wide, with 3½ oz. of Down) permanently sewn into the bag to form a collar just above the top shoulder Down tube of the bag. The collar has its own drawstring and can be closed independently of either the shoulder drawstring or the hood/face drawstring—providing draft-free warmth without head restriction. Closure of the "HOLUBAR COLLAR" on the zipper side is by use of VELCRO tape.

The HOLUBAR COLLAR is ONLY available for Holubar sleeping bags and it is more convenient to order with the original bag order. If you desire a collar sewn into your present Holubar bag, please enclose return postage with the price of the collar when you send in your Holubar bag. Your bag must be cleaned prior to sending it to us.

HP010: HOLUBAR DOWN COLLAR

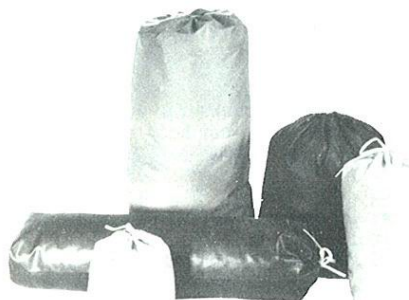

Wt. 6 oz.\$18.00

The HOLUBAR DOWN COLLAR shown in the closed, drawn-up position to shut out drafts and prevent internal heat loss.

The HOLUBAR DOWN COLLAR shown in the open position. An original development by Holubar.

Holubar Clothing and Clothing Accessories

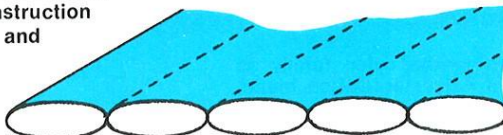

The Construction of a Down parka or garment is the key consideration to determine how effective the garment will be in its intended use. We say construction is the key, as optimum Downfill should always exist, and "under-filling" (to produce a lower cost or slightly lower total weight), or "over-filling" (to compensate for lack of good construction or give an "Expedition" type appearance) is the simplest, yet saddest compensation that can be used to alter a garment's true value.

Most manufacturers use three or four basic types of construction for jackets, and these are as follows:

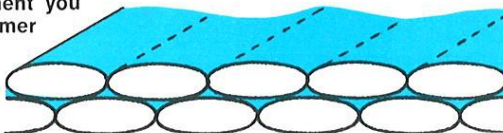

QUILTED SEAMS

Sewn through, or quilted — effective for spring-fall and light winter use — sewn through seams can allow chill in cold winds. In this construction look for width of Down channels. Are the channels spaced closely enough to minimize Down settling that will occur when the jacket is worn many times? Also, the Down fill should be very adequate to insure minimum shift. If this construction has light fill, it will be thin and of little insulating value. Also, the length of the sleeves and body should be cut full to allow the garment to "accordion" together when worn. Thus, the seams will be "folded" to the inside, and the channels will gently compress together, and virtually hide many of these seams. This construction is ideal for light jackets, Down sweaters, and Down vests, as these items are for wear in "above zero" condition, or with other garments (i.e. under a wind parka, over a wool shirt, etc.).

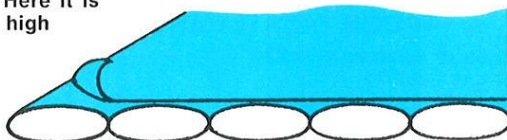

OFF-SET CHANNELS

Two completely separate layers of sewn-through channels are "sandwiched" together with seams off-set to produce a "double thickness" garment. With the offset method, the visible outer wall Down channel seams are backed by the inner wall Down channels to give you good wind protection. This, of course, produces a garment for much colder temperatures, and it should be remembered that the more specialized or colder weather garment you select, the less versatile it will be for warmer temperatures. In this double-wall construction, make sure that it has good construction throughout. In the sleeves, and shoulder area.

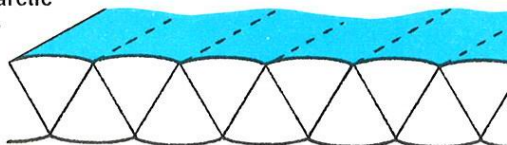

QUILTED WITH SMOOTH SHELL

Quilted with a smooth outer shell is better for cold temperatures, especially when the wind is a prime factor. This outer "shell" (or inner lining — if design or style has smooth side in) is a wind barrier, and lets the quilted Down layer perform a more efficient insulating barrier. It also provides a smoother look when used in ski, or fashion garments. Here it is important to have a light, yet tight, or high density weave fabric (such as SUPER-NYL) to insure wind tightness and durability, and good quilting of the insulation.

"V"-BAFFLE

V-baffle construction, as used in the finest sleeping bags, is the finest construction for the expedition type parka or extremely cold weather use gear. It is the most painstaking construction to use in a parka, but if done right, produces the finest arctic wear. HOLUBAR uses this construction to make a true arctic type parka when most other companies use only the off-set method. Compare this point when you're in the market for an extremely cold weather garment!

Holubar Clothing features practical, functional designs, top quality materials and the traditional handcrafted workmanship common to all Holubar products.

The Holubar parka line offers you a complete series of garments from windbreakers through insulated clothing to meet any temperature or climate you may encounter in your outdoor activities. In the following pages, you'll find the finest quality line of outdoor garments available and we sincerely invite you to examine the features closely and should you require additional information or assistance, please write . . . we're always glad to hear from you.

Garment Grade Goose Down is used in all Holubar insulated garments, including sleeves, vests, pockets, etc. . . . we believe in quality and your confidence in a Holubar product can be assured by the fact we do not cut corners!

SELECTING A GARMENT

We have a great deal of confidence in the construction and specification of each of our jackets or parkas, and we're very enthusiastic about comparing each of our models to any others of similar construction. All garments, though similar in design or construction, do differ! Because Brand A jacket has a "sewn through" seam construction, and Brand B jacket does also, it does not necessarily make them comparable, or equal. Most companies employ similar methods or basic fundamentals of construction; however, the many factors involved, i.e. fabrics, threads, and amount of Down, skill and quality of assembling all add up to produce a line of finished products with different degrees of quality.

ZIPPERS: Holubar has found the Y.K.K. brand zipper to be a very dependable, easy-running zipper and we use various sizes in either the DELRIN or ZIPLON models. Selection of model and size is dependent on the application, i.e. front closure, pocket, etc. Our zipper installation includes double-row stitching in addition to inseting the tape of the zipper. The finished edge of the fabric bordering the zipper contains a filler cord rolled inside to give "body" and added wear resistance in an area that is exposed to a lot of handling. These features are standard practice at Holubar.

STITCHING: Components of a garment are sewn together with a nylon bonded thread and in places of stress (such as pocket corners) we use bar-tacking for added strength. Bar-tacking is a special multiple re-inforcing stitch performed on a special sewing machine.

FABRICS: We use a variety of fabrics in the nylon family as well as STORM CLOTH, which is a Polyester/Cotton blend. Holubar is continually researching new fabrics and whenever better types are discovered they are incorporated into our product line. Please be aware of the fact, that nylons will melt if touched with a flame or spark and is not a question of inferior quality. Our Nylons and STORM CLOTH have proven to be the most durable fabrics for their weight and due to their tightness, possess a very abrasion resistant characteristic.

GOOSE DOWN: Holubar selects the very finest Goose Down in a Garment Grade (8-11% feather content) which we label AA PRIME NORTHERN GOOSE DOWN. We use Garment Grade Goose Down in all our insulated products, including sleeves, hoods, vests, pants, mittens, etc. as we have found no substitute for quality.

FUNCTIONAL FEATURES: Each Holubar garment fills a particular need in backpacking activities and in the area of insulated garments, we offer not only jacket and parka lengths but also different types of Down compartments and fill weights to meet various temperature requirements. Because of their functional versatility, the Holubar garments are suitable for a wide variety of outdoor activity or everyday wear.

FINISHED LOOK: An important factor in long wear and durability is the finishing off of exposed seams, linings, etc. For example, if you examine the inside of a jacket or parka you'll easily recognize the manufacturer who takes short cuts and the manufacturer who takes the time to do it right. We believe in finishing all areas and you'll find the inside appearance of Holubar garments of the highest quality and remember it adds durability . . . another plus for value received.

Though few people are aware of all the facets to inspect in a garment, we suggest you look closely and compare everything you can see in the garment's outward appearance. It certainly indicates how the inside of the garment or hidden construction, is done! We hope you will compare ours with any others and ask us, and any other manufacturer, any specific and pertinent questions you may have.

FABRIC CLASSIFICATION

To give a brief review of the various fabrics we use in the construction of our various products, we felt the following might help:

NYLPORT¹

Double URETHANE coated nylon taffeta. Is waterproof and does not breathe. This fabric is best for backpacking ponchos, rainwear and tent floors. Is as waterproof as possible for its combination of light-weight and strength.

NYLTOWN¹

A heavier duty URETHANE coated nylon. **Waterproof, does not breathe**, best for tent floors as in our EXPEDITION or 4 MAN tents where fabric must take increased wear and abuse.

TEMPER KOTE RIPSTOP¹

A polymer coated nylon ripstop used in rainflays of tents. This new coating process increases the fabrics strength, decreases weight without sacrificing function or durability.

COATED DUCK¹

The heavier-duty, double URETHANE coated nylons used in packs. Heavier weight, but strongest, most durable for this use.

STORM CLOTH

A blend of 65% POLYESTER and 35% COTTON, this fabric has the best "wearability" of any fabric we have used, and superior to all others we have used or seen in similar applications.

It is very tightly woven, and extremely durable, yet has a softer, more comfortable "hand" than do the nylon-cotton weaves. It is water repellent, yet machine washes beautifully.

SUPERNYL²

A nylon taffeta. Smooth look for more fashionable appearance, yet very strong and lightweight. Ideal for Down jackets, as it is Downproof, windtight, and water repellent.

11-A RIPSTOP²

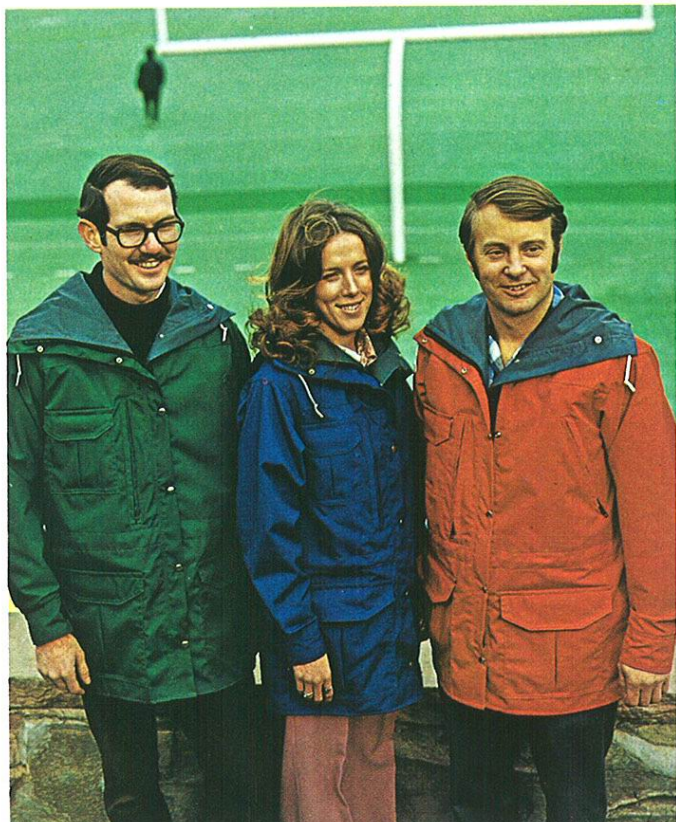

A 1.9 ripstop nylon that is water repellent (NOT waterproof), Downproof and very strong and abrasion resistant for its weight. Ideal for tent canopies, some Down parkas, and sleeping bags where durability is as important as light weight.

1.5 OZ. RIPSTOP²

Has about the same basic features as the 1.9 oz. except it sacrifices some of the durability for lighter weight. We use it especially in our winter sleeping bags because those bags have more weight in Down and extensive internal baffling, and this lighter weight shell helps off-set that increased "inside." As winter bags are generally used with more ground cover or protection (i.e. in a tent) they are not subjected to as much abuse. We have never received a complaint on this fabric's durability, or on our .75 oz. ULTIMATE ripstop, so do not consider this a "weak" fabric by any means!

1. This fabric is weatherproofed with KENYON K-Kote.® Washable and Drycleanable.

2. This fabric is Down-Proofed with KENYON Ken-Down®. Washable, Drycleanable and Water Repellent.
*Reg. Pending

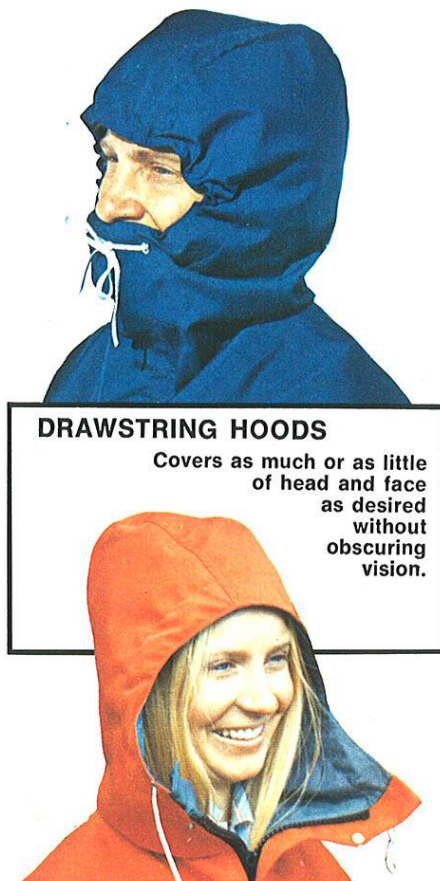

Holubar "YOSEMITE PARKA"

For the outdoorsman who demands the maximum in efficiency and functional design, the YOSEMITE received a greater reception than we could have imagined. Double layer construction through upper body to waist and hood with two layers of durable, "STORM CLOTH," a blend of polyester and cotton. Water repellent wind tight, abrasion resistant, and "wonderfully washable"! This parka has no less than six pockets! Two large patch pockets are roomy and close with VELCRO closure. Three zipper pockets give you good security as well as versatility: back pocket is a handy storage pocket for a sweater, Down vest or lunch, etc.; one of two upper front zipper pockets has vertical entrance for easy storage of maps; second has slant entrance for valuables, etc. These pockets have #5 (medium size) Y.K.K. DELRIN nylon zippers, and are fully faced and inset to protect against freezing.

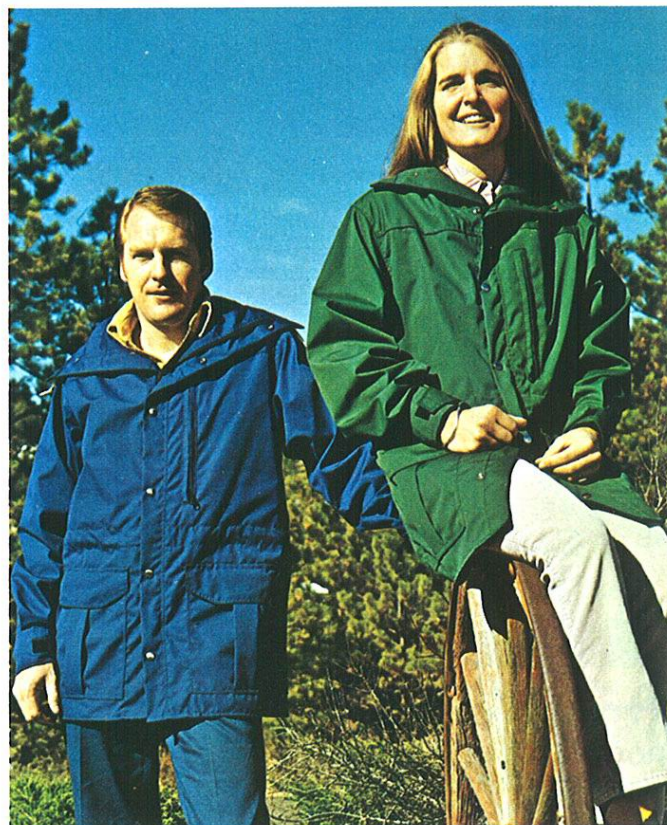

Front closure is #10 (large size) Y.K.K. DELRIN heavy duty zipper with two-way slider system, i.e. zipper can be opened from bottom for ventilating action or for non-restricting movement. Front opening also has a draft flap with snaps that gives complete weather protection. Hood with drawstring covers as much or as little of head and face as desired without obscuring vision. Wrist action utilized VELCRO tape for size adjustment. Adjustable inside drawstring at Waist. We sincerely feel this is the very finest wind parka available anywhere.

Colors: Navy, Orange, Forest Green
HP200: XS, S, M, L, XL. For men and women. State height, weight, sleeve size, dress or coat size and whether you plan to wear a Down Vest or Down Jacket underneath.
Av. Wt. 1 lb. 12 oz. \$59.00

DRAWSTRING HOODS

Covers as much or as little of head and face as desired without obscuring vision.

Holubar "MOUNTAIN PARKA"

As throughout our line, meticulous, detailed sewing is evident in all phases of construction and gives you an extremely durable garment for hiking, backpacking, fishing, climbing or town wear. All seams and facings are finished not just for good looks but more important, the parka will last longer. Grommets and snaps are reinforced, all pockets faced and fitted with covered zippers . . . the details that contribute to the overall durability of the parka.

The Mountain Parka is made from "STORM CLOTH," a durable wind resistant, water-repellent blend of cotton and POLYESTER — beautifully machine washable! The inside lining throughout the body, down to the waist, (exclusive of the sleeves and hood) is SUPERNYL, a windtight, water-repellent, lightweight nylon.

The front opening features an inset, heavy-duty #7 YKK ZIPLON COIL zipper with two sliders, protected completely by a snap weather flap. Two large, roomy patch pockets close with VELCRO. The upper pocket has a handy vertical entrance for storage of maps and closes with an inset and fully faced #5 YKK DELRIN zipper.

Additional features on the Mountain Parka include a weatherproof, barrel cuff, with a multi-position VELCO strap that adjusts wrist girth; inside waist drawstring; and the hood drawstring system allows as much or as little head and face covering without obscuring vision. Sized to fit men or women, the MOUNTAIN PARKA is a versatile garment for a variety of outdoor activities and you can be assured that the meticulous construction details will give you a long lasting garment with a high dollar value.

Colors: Navy or Forest Green
HP201: XS, S, M, L, XL. Please state height, weight, dress or coat size, and sleeve size to aid us in proper size selection.
Wt. 1 lb. 8 oz. \$49.00

Holubar

"ROCKY MOUNTAIN SWEATER"

The ROCKY MOUNTAIN SWEATER is one of our more popular lightweight Goose Down garments. We feel that the man or woman who selects this fine Down item will find that it will become one of their handiest garments for all types of camping or outdoor activities, and shouldn't be overlooked when an extra warmth garment is needed for your outside work around the yard or on the job.

The ROCKY MOUNTAIN SWEATER is designed to be used as either an undergarment where its trim shape makes it ideal under a YOSEMITE or MOUNTAIN PARKA when extra warmth is needed, or as a versatile outer garment in place of two wool sweaters or bulky jacket. The 5 ounces of AA PRIME NORTHERN GOOSE DOWN (Garment Grade) is quilted in an attractive pattern for better Down control and insulation efficiency.

This Down sweater features an all-nylon stretch knit collar and cuffs. The fabric is tough, 11-A (1.9 ounce) ripstop nylon which is treated for water repellency. The body length ranges from 25½" (XS) to 29½" (XL) and features two front slash pockets for easy access when used as an outer garment.

The ROCKY MOUNTAIN SWEATER provides great warmth with minimum weight and can be packed into a very small size for ease in carrying when not in use. Stuff sack (#1) included. Smaller sizes are suitable for women (Please send height, weight and dress size).

Colors: Navy Blue or Sage Green
 Sizes: XS (6-8 Dress Size); S (34-36); M (38-40); L (42-44); XL (46-48)
 HP115:
 Avg. Wt. 16 oz. \$31.00

The ROCKY MOUNTAIN SWEATER is ideal under a Yosemite or Mountain Parka when extra warmth is needed.

This last Spring, I made a float trip down the Yukon River in Alaska with a companion. On this expedition, I took your "Royalight" sleeping bag, "Pinebrook Vest," and "Yosemite Parka." I gave this equipment some of the roughest treatment that could be handed out!

I can't say enough about how great your equipment held up. I had no trouble whatsoever with even one item.

I appreciate the experience, both from practical testing and solid construction, that goes into your equipment. I am looking forward to many comfortable years of use from my Holubar equipment.

Steve Sherrod
 Orem, Utah

Holubar

"PINEBROOK VEST"

Navy Blue 11-A ripstop nylon outside shell with narrow sewn-through-seam channels to provide 2 inch thickness of AA PRIME NORTHERN GOOSE DOWN (Garment Grade). Ample cut for freedom and warmth, the body length ranges from 26½" (S) to 29½" (XL) with comfortable 3 inch Down filled roll collar. The front closure is a #7 YKK ZIPLON coil zipper with adjustable elastic drawstring at bottom. Two front slash pockets for easy access.

Color: Navy Blue
 HP117: XS (6-8 Dress Size), S (34-36), M (38-40),
 L (42-44), XL (46-48)

"HEAVY-DUTY BOOTIES"

Insulated with Down and felt padded soles for real comfort and warmth, the HEAVY DUTY BOOTIE is ideal for around camp, in your tent or sleeping bag or even around the house. Soles extend up around the sides for greater wear and ankle girth is adjustable with a VELCRO tab. Upper fabric is dense, durable SUPERNYL in Navy or Gold. A great gift idea!

Colors: Navy Blue or Gold
 HP124: (Please send foot outline for an accurate fit.)
 Avg. Wt. 16 oz. \$21.00

Holubar

"TRAIL JACKET"

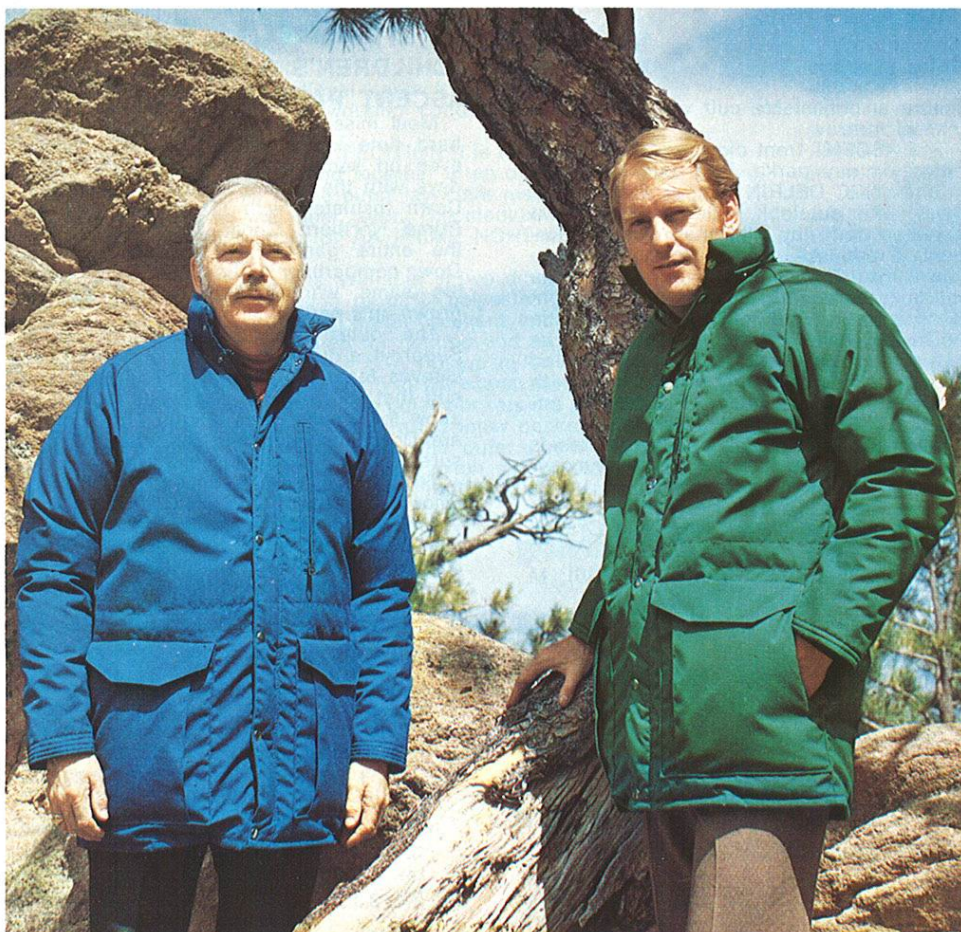

As throughout our line, each TRAIL JACKET is individually made by a Holubar seamstress and features such intricate details as an inset front zipper with cording, reinforced pocket corners and a finished look on the inside as well as the outside. The TRAIL is insulated with 11 ounces (Size Med) of Garment Grade AA Prime Northern Goose Down contained efficiently in narrow, quilted Down compartments throughout the body and sleeves. The outer fabric is a durable SUPERNYL, hand-somely finished in four colors. The front closure is a smooth running #7 YKK ZIP-LON Coil zipper inset for durability and further protected by a corded facing. Additional features include slash pockets with VELCRO closure flaps, elastic cuffs, hem-line drawstring, and standup Down filled collar.

The TRAIL JACKET sized for men and smaller sizes for women, offers the same warmth as two sweaters—we rate it to 0 degrees (and below!). A favorite of the Colorado Rockies!

Colors: Navy, Forest Green, Red and Copper.

HP104: XS (6-8 Dress Size), S (34-36), M (38-40), L (42-44), XL (46-48).

Wt. 1 lb. 10 oz. \$47.00

Holubar

"ALCAN PARKA"

Style. Comfort. Lightweight Warmth.

Our compliments to the gang in product development on this one as the new ALCAN PARKA certainly combines smart looks with lightweight warmth and comfort. The basic construction is one layer of quilted, 6 inch square Down compartments covered by a smooth outer shell of STORM CLOTH. The smooth look is complimented by the raglan sleeve design.

The ALCAN is insulated with an average fill weight of 12 ounces of Garment Grade AA Prime Northern Goose Down throughout the entire garment. The yoke channels are filled to maximum capacity to prevent cold spots over the shoulder. Front closure includes a combination of a #10 YKK DEL-RIN Zipper (separating, two-way, autolock slider) protected by a Down insulated snap draft flap.

Two lower double pockets and a vertical breast pocket provide an incredible amount of pocket space! The double pocket design is a combination of an outer cargo pocket, pleated to maximize storage space and covered with a VELCRO closure flap. Behind the cargo pocket is a Down insulated hand-warmer pocket with its own entrance. The ALCAN length measures 31 inches from the base of the collar to the bottom hemline (size medium) and other features include an inside waist drawstring, Down insulated roll collar which snugs closely around the neck (snap closure), snap band for optional Down Hood, and finished sleeve with recessed nylon ribbed knit cuff.

Colors: Forest Green and Navy STORM CLOTH

Sizes: XS (6-8 Dress Size), S (34-36), M (38-40), L (42-44), XL (46-48).

HP 129: ALCAN PARKA

Avg. Wt. 2 lbs. 12 oz. \$75.00

The ALCAN is designed for a variety of outdoor winter activities, especially suitable for the ski slopes, and makes a great looking all-around general usage parka.

The Holubar high quality workmanship is evident in the intricate sewing details of the ALCAN design.

Holubar "ASCENT PARKA"

New Cargo & Handwarmer Double Pockets!

The ASCENT PARKA is one of those simple pleasures in life that makes your outdoor activities that much more enjoyable. Great for ski touring, winter mountaineering as well as around town or on campus...the ASCENT has become one of our most popular Down insulated garments since its introduction in 1970.

The ASCENT is constructed with evenly spaced quilt lines and a unique double pocket design. The double pocket includes an outer cargo pocket pleated to maximize storage space and a closure flap secured with VELCRO. Behind the cargo pocket is a Down insulated hand-warmer pocket with its own entrance. All stress points of the pockets are bar-tacked for added strength and durability. You have a choice of two outer fabrics; STORM CLOTH, a tough, durable blend of POLYESTER/COTTON which can be machined washed, and SUPERNYL, a densely woven, durable and handsome finished nylon. Both models are lined with Supernyl. The parka construction is one layer of horizontally quilted Down compartments, evenly spaced at 5 inch intervals. The yoke channel is filled to maximum capacity to prevent cold spots over the shoulders. The set-in styled sleeves

feature an adjustable cuff with elastic and snap closure.

The ASCENT front closure, an important feature in any parka, is a combination of a #10 YKK DELRIN Zipper (separating, 2-way with autolock slider) and a Down insulated draft flap with snap closure. Garment Grade AA Prime Northern Goose Down insulation is used throughout the entire garment with an average fill weight of 14 ounces. Additional features include an inside waist drawstring sealed in its own casing to prevent Down leakage, rolled style collar (seals snugly around neck with snap closure), and snap band for the optional ASCENT DOWN HOOD.

Inherent in all of the above features is the traditional handcrafted quality, synonymous with Holubar workmanship. Colors: Forest Green, Navy and Red in Supernyl; Forest Green, Navy and Orange in Storm Cloth.

Sizes: XS (6-8 Dress Size); S (34-36); M (38-40); L (42-44); XL (46-48).

"CHILDREN'S & JR. ASCENT PARKA"

Meal missing warmth...you'll have a hard time keeping that youngster inside, even on some of those miserable winter days with the warmth of the JR. ASCENT. Down insulated with Garment Grade AA Prime Northern Goose Down throughout the entire garment in horizontal quilted Down compartments, the JR. ASCENT offers the same warmth and comfort as the grown-up's parka.

The outer shell and lining fabric is Supernyl, a durable dense nylon fabric. The sleeves feature a very practical nylon knit cuff that will provide long wear as well as allow for growing arm length. The pockets are Down insulated and the VELCRO closure can be opened with mitts on.

The front closure is an easily operated, smooth running #7 ZIPLON Coil zipper with a one-way autolock slider. The zipper is protected from snow or ice by a Down insulated draft flap with snap closures. Snap band behind collar for optional Down Hood (Size 6 & 9 only).

Colors: Forest Green, Navy or Red

"EXPEDITION II PARKA"

The EXPEDITION II PARKA is the ideal parka for all cold weather use. Warm to -50° F., in winds, 40-50 mph., the EXPEDITION II is a very functional parka for a variety of uses including severe cold weather working conditions as well as expedition activities.

The basic construction of the EXPEDITION II is two completely separate Down layers, sandwiched together in an offset position so that the external seams of the outer layer are insulated by a thickness of Down from the inner layer. The medium size contains approximately 19 ounces of AA PRIME NORTHERN Garment Grade Goose Down.

The EXPEDITION II PARKA is available in two different outer fabrics. STORM CLOTH, a blend of 65% polyester and 35% cotton provides a very wind tight, water-repellent and abrasive resistant parka exceptionally suited for hunting and rugged outside work. The second fabric is a 11-A ripstop nylon which is lightweight, water-repellent but enough to withstand abuse.

The parka has five pockets. The two outer pockets are actually double pockets (one over the other) with the inner pocket Down insulated for warming the hands while the outer pocket is a handy bellowed cargo pocket utilizing a nylon zipper closure. A single flap with VELCRO closure covers both pocket entrances

for added security. Inside the parka is a breast pocket with VELCRO closure that makes a handy "keeper" pocket for small items. The front closure of the parka is a two-way #10 YKK DELRIN zipper with an insulated weather flap for added wind protection. The sleeve contains an inner stretch nylon cuff for extra draft protection. A two drawstring system, one at the waist and one at the bottom hem allows you to draw in the parka and cut off chilling drafts.

All EXPEDITION II PARKAS feature a Down filled collar with a snap closure, and a snap band for attaching the optional

EXPEDITION II DOWN HOOD

A very warm Goose Down insulated head covering that snaps to a band below the parka collar. Down filled tunnel can be drawn closed for facial protection by a drawstring and front closure is VELCRO. Colors to match EXPEDITION II PARKA.

"PARAGON INCALESCENT PARKA"

We unconditionally guarantee there is no other parka in this one's class. There really needn't be, as anyone who would actually need this parka should not be in that predicament! Seriously, this parka is too warm for most any "normal" cold weather needs, (it gets uncomfortably warm at any temperature above 0 degrees) so only those who actually need the ultimate in cold weather protection should consider it.

To give you a few brief details: In regular use in Antarctica, this parka has proven to be warm at -80° F. Special attention to a freedom-of-movement design allows the worker or mountaineer to carry out their activities in sub-zero weather.

The PARAGON INCALESCENT differs from all expedition type parkas with its unique internal baffle system made of lightweight, Down-proof, 1.1 ounce ripstop nylon in an overlapping "V" Down channel design. The 5 inch wide "V" Down channels are used throughout the body, sleeves and hood to give you a "no-cold-seam" system for ultimate warmth. Throughout the parka, the "V" Down channels are filled with AA PRIME NORTHERN GOOSE DOWN. The medium size contains approximately 30 ounces of Garment Grade Goose Down.

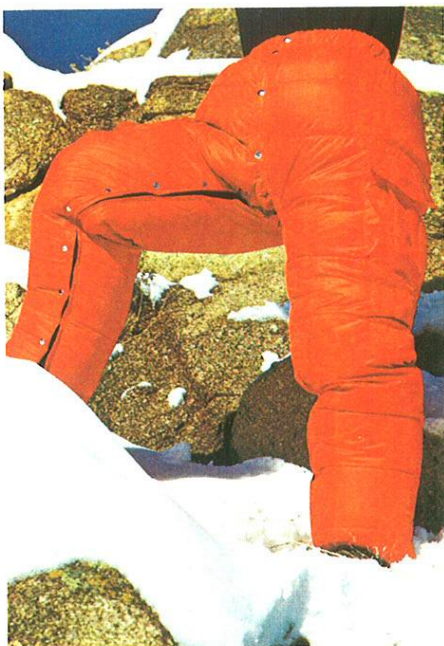

The outer shell fabric is 11-A ripstop nylon, lightweight but tough enough to stand abuse. The PARAGON INCALESCENT PARKA features a two-way #10 YKK DELRIN zipper protected

against the severest of conditions by a snap weather flap. A long body cut gives added coverage and the parka can be drawn in at the waist by an inside drawstring, the bottom hem being elastic. The parka has five pockets, the two outer pockets actually being double (one over the other) with the inner pocket Down insulated for warming the hands, while the outer pocket is a roomy cargo pocket. The cargo pocket has a nylon zipper closure and a single flap with VELCRO closure covers both pocket entrances for added security. An inside VELCRO closed breast pocket is a secure place for small items. The sleeves contain stretch knit nylon cuffs for added protection against drafts. The permanent hood is Down insulated and features a Down filled tunnel that can be drawn closed for maximum facial protection in severe arctic conditions. We invite comparison with any others made.

Colors: Sky Blue or Orange 11-A

HP136: Sizes S (34-36); M (38-40);
L (42-44); XL (46-48)

Avg. Wt. 4 lbs. 1 oz. \$155.00

Holubar

PARAGON DOWN PANTS

Tough 11-A ripstop nylon inside and out stands up under abuse, yet is still light in weight. Internal construction is 5" wide overlapping "V" Down channels to hold the 20 ounces of AA PRIME NORTHERN GOOSE DOWN (Garment Grade) at constant thickness of about 3". No cold stitched through seams. Waist is adjustable with a combination of elastic and drawstring. Suspender loops are also included. Pants go on easily over boots and crampons. Inseam zippers are insulated with Down tubes and overlapping snap flap closure. Holubar's exclusive leg extensions snap up inside leg when not in use and can come down over feet and boots. With each leg extension down, inseam zippers can be joined to convert the pants into a warm "Half Bag." The leg extensions join together with VELCRO to make a draft-free, warm foot end. The perfect combination with the PARAGON PARKA. Please state waist measurement and below choice of inseam.

Color: Sky Blue or Orange 11-A
 HP137: (State Inseam) Med. (28"-31")
 Large (32"-35")
 Avg. Wt. 3 lbs. 13 ozs.\$110.00

Holubar

EXPEDITION II DOWN PANTS

A lightweight pant that is Down insulated for wear in extreme cold. Quilted construction holds the Down fill of 10 ounces of AA PRIME NORTHERN GOOSE DOWN (Garment Grade) in a shell of tough 11-A ripstop nylon fabric. The waist can be adjusted by a combination of elastic and a drawstring that you tie off to your waist size. Suspender loops allow you to use suspenders (not furnished) for additional support. Inseams feature a #5 Y.K.K. DEL-RIN, two-way separating zipper (protected by an outer snap flap) and insulated on the inside by a Down-filled tube.

Pants feature large cargo pockets with VELCRO closure just above the knee for easy access. Ankle closure is elastic. The zipper system of these pants allows them to be made into a half-bag for moderate or emergency conditions.

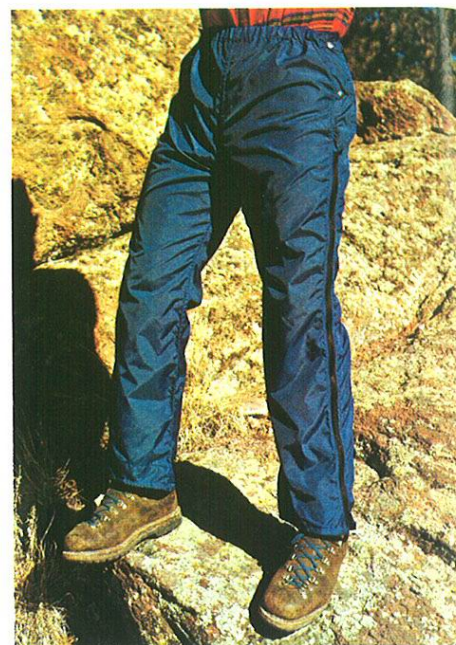

COLORS: Navy Blue or Orange 11-A; Navy "Storm Cloth"
 INSEAM: (Please State) Med. (28"-31"), Large (32"-35")

EXPEDITION II MITTENS

Complete protection against Arctic cold! Goatskin leather palm extends 1" beyond palm and thumb for extra wear. When your hand is inside, it can be placed against the leather for active use or withdrawn behind layer of extra dense nylon laminated POLARGUARD which resists compression. Back of hand is protected by thick layer of Down filling. The outside is tough "Storm Cloth" fabric for durability and rugged use. The "Storm Cloth" gauntlet fits easily over a Down insulated sleeve and tightens with a drawstring closure with cordlock. Inside cuff fits into sleeve of parka for a warm weather seal. Over-all thickness of about 3 1/2 inches. One mitten back is covered with mouton wool to warm cheeks or rub nose. We believe these are the finest expedition mittens made!

COLORS: Navy or Orange Storm Cloth
 HP138: Send Hand Outline
 Avg. Wt. 12 oz.\$34.00

Excellent for knickers, climbing pants, and expedition pants, these extra long heavy-duty suspenders are about 38" long unstretched and are adjustable in length. 1 1/2" wide.

Colors: Red or Black

CL026: 38" long unstretched, adjustable
 Wt. 3 oz.\$3.75

I have been a patron of Holubar for many years. Before I purchased your "Royalight" sleeping bag, I had shopped 8 different bag makers and your bags were by far the best, and no where near the most expensive.

Your liner accommodations prove that your bag was a concept and not just an effort.

In my estimation, "HOLUBAR IS the Cadillac of the backpacking industry."

Mark Ekbal
 Angwin, California

Holubar PONCHO & PACK PONCHO

The most versatile piece of lightweight equipment that you can own: raincoat, pack protector, canopy, shelter, or ground sheet. Visored hood turns with head and adjusts with drawstring under chin or lower face. Reinforced snaps along arm edge help keep out the rain. Reinforced

grommets at each corner and side. Fabric is weatherproof NYLPORT, a coated nylon taffeta. The Pack Poncho shown center, has an extended back length for use over a pack or snaps up out of the way.

Colors: Orange or Avocado

Versatile Clothing For All Your Outdoor Activities

HOLUBAR HIKING SHORTS

Made exclusively for Holubar, these shorts are made of heavy 10 ounce 100% cotton twill: Side pockets are slightly slanted for easy access. Hip pockets are big rectangular patches with button flaps. Our shorts also fit well: the legs are short and full for easy movement; the seat is big but not baggy; and the waist fits American waists.

CL170: Men's sizes 30-38 (even only)

CL171: Women's sizes 10-16 (even only)

Colors: British Tan or Navy

Avg. Wt. 1 lb. per pair.....\$15.00

LADIES' STRETCH HIKING SHORTS

One of our popular items for women, these shorts are the perfect sportswear for hiking, golfing, and working around the yard. The comfortable and durable "Espatwill" fabric is composed of 33% Cotton, and 62% Polyester, and 5% Spandex. Features include quarter style front pockets with patch pockets, two zippered rear pockets, large reinforced belt loops. The stitching is reinforced at stress points for added durability. Carefree washable.

Colors: Navy or Tan

CL025: Women's 10, 12, 14, 16

Wt. 10 oz.\$18.00

MEN'S STRETCH HIKING SHORTS

Identical to MEN'S PANTS in fabric and pocket features. The MEN'S SHORTS are ideal short pants for comfort during hot weather wear.

Color: Dark Tan

Avg. Wt. 1 lb. 10 oz. pair.....\$25.00

HOLUBAR "CHAMOIS SHIRT"

Truly the most comfortable shirt available to man and woman! Of thick, strong moleskin 100% pure cotton, this highly versatile shirt becomes as soft as genuine chamois through repeated washings. Unlike many chamois cloth shirts which use an 8 oz. fabric, ours is made of 10 oz. cloth. We find that this heavier fabric provides an extra margin of durability. The sheared nap finish inside and out adds additional warmth. Cut and tailored with extra long tails that can be worn tucked in or worn outside. A handy garment for the outdoor enthusiast, the Chamois Shirt will become your favorite garment—hard to discard as it seems to improve with age! Two handy front pockets with button down flaps. Button front closure. Double needle seams will withstand stress.

Colors: Red, Tan, Navy, Green

CL032: Men's S (14-14½), M (15-15½), L (16-16½), XL (17-17½)

CL033: Women's even 10, 12, 14, 16

Avg. Wt. 1 lb. 4 oz. \$15.00

HOLUBAR "BRECKENRIDGE SHIRT"

Superbly tailored shirts of 85% wool and 15% nylon feature single needle construction, welted seams, and carefully matched plaids. These versatile shirts have tails, flap pockets and are machine washable.

This casual shirt is great on chilly mornings when it's time to crawl out of a sleeping bag and put the coffee on. You'll be pleased with our new plaids when wearing it around town, too.

Avg. Wt. 16 oz. \$23.50

NEW ZEALAND RUGBY JERSEY

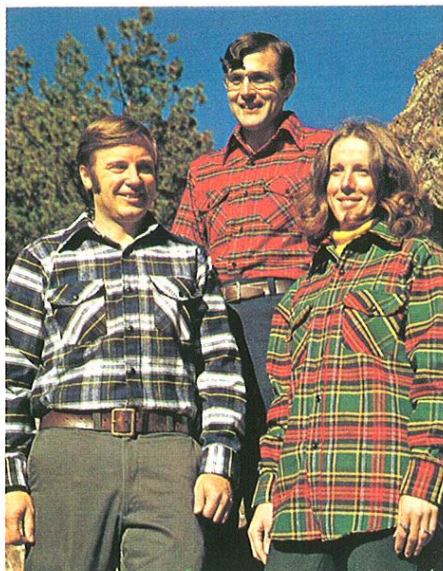

These jerseys combine comfort, durability, and style in a way that has made them a favorite here in Colorado. They are a 100% cotton knit with triple reinforced collar band and unbreakable rubber buttons at the neck. How much damage do you think you can do to the same jersey worn by New Zealand's rugby teams? Ours have no numbers, but do come in a jelly-bean collection of colors. SIZING NOTE: Though these jerseys come in only two sizes they are quite flexible since the cotton knit can be made to stretch or shrink. Medium will fit most women and men to size 40, and the large will fit men through size 46.

Colors: (PLEASE GIVE TWO CHOICES)
Scarlet/Royal; Gold/Royal; Navy/Maroon;
Green/Navy; Royal/White.

CL080: Medium, Large

Avg. Wt. 17 oz. \$22.50

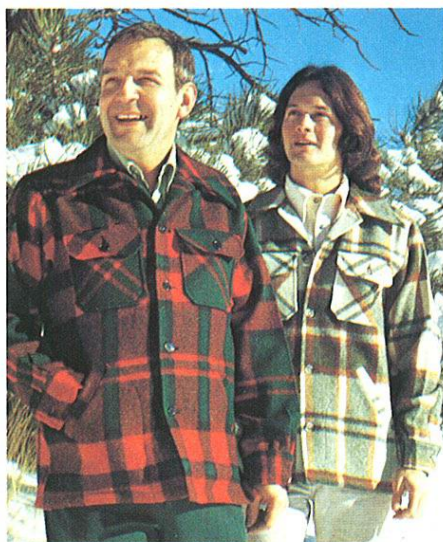

HOLUBAR "BACKWOODS" SHIRT

These bold plaid flannel shirts are the newest edition of a long line of shirts worn by lumberjacks, trappers, and hikers in the dark woods where bright colors were welcome. Made of 100% cotton flannel in lively plaids, these shirts are completely washable. Features include two patch button flap front pockets and long tails.

Colors: Bright Red, Bright Green,
Bright Blue Plaids

Wt. 7½ oz. \$6.00

QUALITY OUTDOOR FOOTWEAR

FITTING OF BOOTS

It is important when purchasing a boot to buy the one which fits best provided it has the features required for specific use. Boots are made from natural materials and usually stretch in varying degrees, depending on style and model. When trying on boots it is best to wear a little less sock than normal. For instance, if you normally wear two thick socks, try the boots with a thin and a thick pair. This will allow a little for stretching. It is impossible to tell in ten or fifteen minutes if a boot fits correctly. It is much better to wear them in your home for about two hours.

WHEN MEASURING YOUR FOOT

Boots are designed in many different "styles" depending on their intended use. Specialized boots for rock climbing or winter mountaineering should not be interchanged as a general hiking boot, as the manufacturers have taken great care to build each model for a specific performance. General purpose hiking boots should be "soft" enough to allow easy flexing, yet provide very good arch support and ankle protection. A woman's boot should be lighter weight, yet offer the same good protection and support.

TO ORDER BOOTS

1. Put on the socks you intend to wear with them. Normally one light pair and one heavy pair of woolen socks for hiking and winter mountaineering.

2. Stand on a piece of paper with weight distributed on both feet.

3. Hold a pencil vertically and trace the outline of each foot.

4. To supplement this information and insure best fit also PLEASE INCLUDE YOUR REGULAR STREET SHOE SIZE (as 9 1/2 B etc.). If these instructions are followed carefully, it is quite easy for us to assure you a good fit. Should any boot you order prove to be an improper fit, please return for replacement or refund before wearing them outdoors. Boots, like street shoes, vary slightly in fit because of style and designated use.

STREET SHOE SIZE
AND D

CARE OF BOOTS

A good quality hiking boot will last you many seasons if proper care is exercised. The leather used in your new pair of hiking boots has pores that can breathe and thus ventilate the boot. The idea in boot care is to keep the leather that way — pliable, tough and breathable.

We recommend SNO-SEAL for a water-proofing substance as its silicone base will not stretch or soften the leather. The best methods of application are rubbing the SNO-SEAL wax into the leather with your hand, or melt the SNO-SEAL on a stove and brush it on with a basting brush. NEVER apply heat directly to the leather to melt the SNO-SEAL wax. SNO-SEAL will darken roughout leathers and the surface will become smoother.

HEAT is the worst enemy of your boots. If your boots become wet, allow the leather to dry slowly at moderate temperature. Never place them on a direct source of heat (camp fire, oven, or radiator). In camp, prop them up on sticks, upside down and away from the fire. At home, fill them with newspapers to absorb the moisture. Excessive heat will destroy your boots so prevention is always the best cure.

MEN'S & LADIES' SEQUOIA

The SEQUOIA is a quality lightweight hiking boot and an excellent addition to the Vasque line.

The five inch chocolate brown split leather upper and padded tongue are fully leather lined. A stretchy scree top and padded ankle are additional comfort features.

The arch is reinforced with a tempered spring steel shank for improved durability and comfort. Additional features include cellulose insole, hooks and eyelets for efficient lacing, and VIBRAM lug sole and heel.

A fine choice for those men and women looking for a lightweight and durable hiking boot.

BT024: Women's Sizes 4 1/2 - 10 N, M
Wt. 2 lbs., 10 oz. per pair\$38.50
BT023: Men's Sizes 7-12, 13, 14, M, W
Wt. 3 lbs. per pair\$40.00

All Vasque Boots are built over American lasts, to give Americans the superb fit, comfortable feel and high quality they have come to expect in their everyday footwear. Each and every pair of Vasque boots feature tempered spring-steel shanks and lug soles to provide maximum support and traction. They are specially designed to

reduce uncomfortable pressure at the achilles tendon through the use of a unique stretch collar.

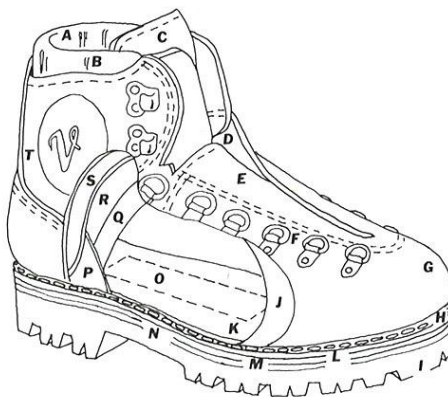

We have spent much time in evaluating the various considerations, and have selected what we feel is the best assortment of models to offer our customers with confidence.

ALFA SPORT SHOE

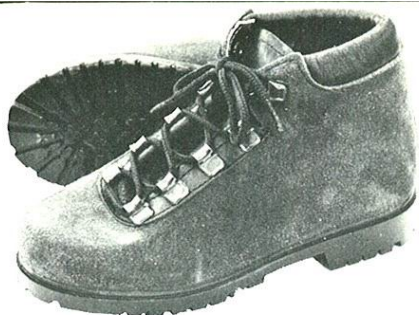

The Alfa Sport Shoe is made by the same Norwegian company that manufactures some of the finest tourskiing boots in the world. Alfa's reputation for durability and quality is unquestioned.

Alfa makes this shoe with suede leather upper, terry cloth lining, nickel plated eyelets (rustless), a soft toe, and a firm heel for ankle support. The expanded polyurethane sole is molded directly to the upper and insole, and contains a wooden shank for stiffness and support. This sole material has a microporous structure which produces excellent traction, and makes the sole a superb insulator against hot summer tennis courts and cold ground and snow in the winter. The Alfa Sports Shoe also has casual good looks for wear with sport clothing.

Color: Maize Suede

BT041: European sizes 36-47M. Please send foot outline and normal shoe size as outlined in our boot introduction.

CONTINENTAL WALKER — BY FABIANO

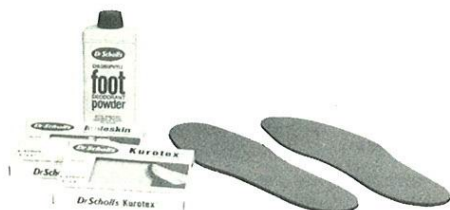

This fine oxford style shoe combines a handsome smooth out upper leather with a durable water resistant storm welt and a VIBRAM lug sole. Useful as a bad weather dress shoe, but is tough enough for lots of trail hiking.

A cushion insole and full leather lining make this Fabiano model extremely comfortable for anyone who spends a good deal of time on their feet.

Color: Brown

BT028: Men's sizes, 7-12, 13, 14 med. width

Avg. Wt. 2 lbs. 2 oz. \$41.25

DR. SCHOLL'S MOLESKIN

BT701: 72" length.....per pair \$.60

HOLUBAR HIKER

This quality hand stitched casual shoe combines the comfortable good looks of the moccasin with a hard-wearing VIBRAM sole. Made for us in the Northwoods of Maine where the winters are hard, the Hiker is an excellent alternative to dress shoes in sloppy weather. When the snow flies, or for walking in the woods, these are the shoes for you.

BT034: 7-12, 13 Medium Width

Avg. Wt. 2 lbs. 13 oz. per pair \$26.00

DOUBLE BOTTOM INDIAN

Made of one piece vamp construction, the Double Bottom Indian has an additional layer of leather added to the sole making two thick layers of leather where it is most needed. This quality moccasin is available in both men's and women's sizes.

Color: Cherry Pac

BT 020: Men's 7-12 (Full and Half), 13 M

Wt. 1 lb. 2 oz. \$22.00

BT 021: Women's 5-10 (Full and Half) M

Wt. 14 oz. \$20.00

QUODDY RING BOOT MOCCASIN

Two brass rings buckle an adjustable belt which has been riveted to the moccasin. Heavy waxed nylon stitching holds the exposed toe seam tight. The 3/16" thick leather on sides and bottom make this an extraordinarily long wearing moccasin. The natural grain of this smooth out leather comes alive in a light sand colored stain.

Color: Tan

BT026: Men's 7-12 (Full and Half), 13 M

Avg. Wt. 30 oz. \$29.00

EL CAP

Headwear for the discriminating outdoorsman. A fine hiking hat of 100% cotton. The 2" brim provides excellent sun protection and the six vent holes keep your head cool. In a pinch, use it to water your horse, carry blueberries, shade your watermelon! Found on but few in the best of circles.

Colors: Tan, Navy

CL053: Sizes S, M, L, XL

Wt. 3 oz. \$3.75

CRUSHER HAT

The ideal summer outdoor hat. Soft, durable and comfortable 100% wool. Rolls up to pop in a pocket.

Colors: Red or Green

CL035: Sizes 6¾ to 7¾

Wt. 3 oz. \$4.60

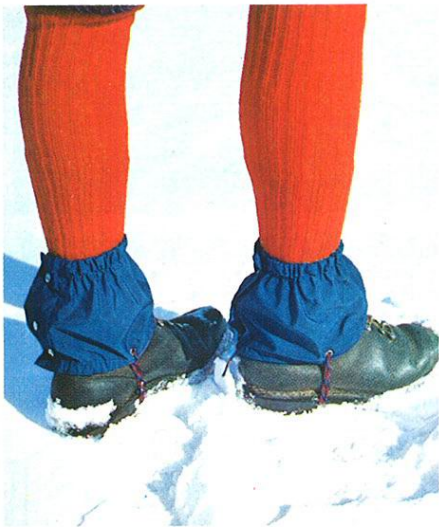

IRISH TWEED HAT

Our Irish Tweed Hat comes in a wide variety of subtly colored Donnegan, hounds-tooth, and Harris-type tweeds, all 100% wool. These hats are blocked only slightly and can be formed to nearly any style desired. The Irish tweed fabrics are extremely durable and lend themselves well to smatterings of dirt, mud, rain, or snow. These fabrics come in such a variety of shades (no two are really alike) that we can only specify general colors: green, gray, or brown. Please give us two color choices.

CL176: Sizes 6¾-7¾

Avg. Wt. 10 oz. \$15.00

Holubar GAITERS

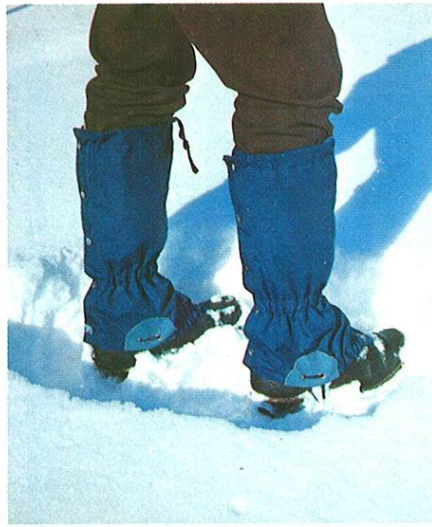

LOW GAITER

Made of two layers of tough, water-repellent POLYESTER/COTTON Storm Cloth fabric, these gaiters are ideal for keeping snow and scree out of boot tops. Can be taken on and off without removing boots. Nylon zipper is covered by a snapped flap, elastic top and bottom. Eyelets for lacing with a super new flat lace (holds a knot!) under the instep. Height 6½".

Color: Navy Blue

HP203: HOLUBAR LOW GAITER

Wt. 5 oz. \$8.00

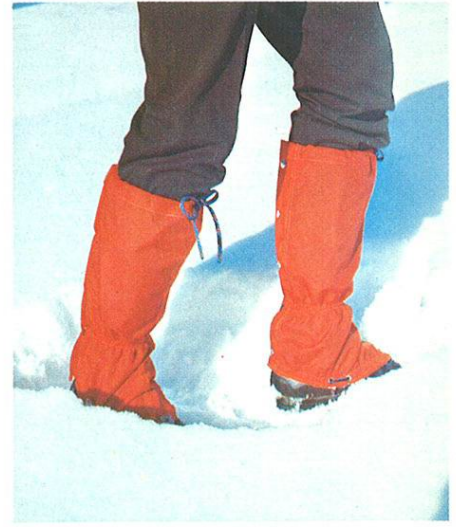

HIGH "GREATER GAITER"

For dry snow conditions, this is the greater gaiter of 'em all! Two layers of POLYESTER/COTTON Storm Cloth, nylon zipper with over flap and snaps, re-inforced bottoms of "PLY-SUEDE" to withstand the toughest use, these gaiters maximize protection and minimize condensation within because the fabric "breathes." Introduced in our shops last winter, they were undoubtedly the most popular new item we had, and we literally could not keep up with the demand.

Colors: Orange or Navy

HP205: HOLUBAR HIGH GREATER GAITER

Wt. 11 oz. \$18.50

HIGH WEATHERPROOF GAITER

Our heavy-duty weatherproof gaiter. Height is 16 inches (below the knee) with elastic bottom and drawstring top. Bottom is cut like a spat with a front hook to catch on boot shoelace and elastic at ankle to give this gaiter proper fit for crampon use. Full length nylon zipper on back with snap flap. Ties for under instep.

Colors: Orange or Navy.

HP204 HOLUBAR HIGH WEATHERPROOF GAITER

Wt. 8 oz. \$11.00

DACHSTEIN MITTS

These mitts are the Himalaya model made in Austria — possibly the warmest wool mittens made. They are made of top quality wool and then shrunk down to size by boiling. This process makes them incredibly thick and almost windproof. This model Dachstein mitt (unlike other, lighter models) is carried by nearly every mountaineering expedition in the world, and they have been worn on the summits of Everest, Annapurna, and McKinley.

Color: Grey and White Twist

CL015: S, M, L, XL (Send Hand Outline)

Avg. Wt. 5 oz. \$8.25

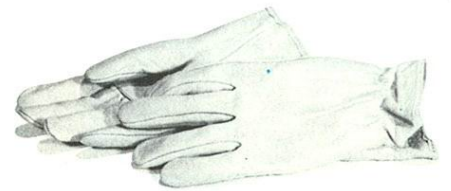

BANDANNAS

Quality U.S. made 100% cotton bandannas available in washfast colors blue or red. Be the first on your block with the return of the original Yankee Linen!

Colors: Red or Blue

CL039: Size 24 inches square

Wt. ½ oz. 2 for \$2.00

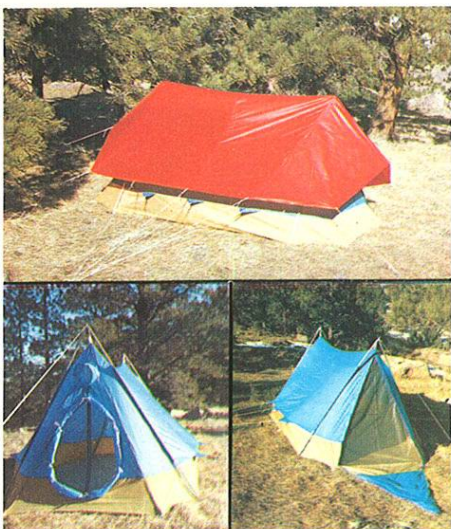

COWHIDE GLOVES

These are a basic, simple pair of gloves for the outdoors. Made of top full grain smooth-out cowhide, they will provide long and hard service. The full grain leather is especially water repellent. These gloves are unlined and with no frills at all, but are perfect for any rope handling task, cutting firewood, even light construction work.

CL143: Tan Color

Sizes: Medium and Large

Avg. Wt. 6 oz. per pair \$5.50

Holubar Backpacking Tents

When you compare tents, do it feature by feature: Are the fabrics in each area (main canopy, floor, fly) all the best available for their use? Are the main ridge lines (where the maximum stress will be) re-inforced with nylon tape? — All of ours are! Are the zippers all nylon, and do they offer maximum opening of entries and vents, yet seal them effectively when closed? Are all tie outs re-inforced with a double layer of nylon fabric to eliminate tears when stress is placed on those pull outs? Ours are! — As in all products there are many, many areas where quality can be found (or neglected) and we like to have our customers compare thoroughly. We try to build tents so they will not only do what we claim, but so they will do it for a long time!

Inside each of our backpacking tents, you will find roominess, weather protection, and durability — yet all with a minimum amount of weight. We feel we have designed each tent to give optimum performance in its intended use, and we have designed a model for each backpacking or mountaineering category.

CANOPY

We use a 1.9 oz. ripstop nylon for all of our main canopies. This particular fabric has been designed specifically for tents, combining maximum strength, good porosity for "breathability," and resin treatments to resist wear. Fire Retardant (FR) treated.

POLES

All aluminum poles are made from aircraft proven alloys for maximum strength and minimum weight, and are "self-assembling" with all sections completely connected internally with shock cord. All tent models come with tent stakes.

RAINFLY

Our rainfly material is a 1.5 oz. Polymer coated (TEMPER KOTE) ripstop nylon. Weatherproof, strong, and quite "supple" to help produce a good tight stretch. All rainflies have adequate tent coverage, or "over-hang" so as to afford maximum protection from wind driven rain. Fire Retardant (FR) treated.

OUR GUARANTEE:

"If any of the materials or workmanship of the products we sell are found to be defective, or below our highest standards of quality, we will exchange the item, or refund your full purchase price and all parcel post costs."

FLOORS

The floors of the tents are designed for the particular wear we feel the tent will be subjected to. In our ROYALIGHT and CHATEAU, we use a 2.5 oz. weatherproof URETHANE coated nylon. This fabric combines the best water barrier at the lightest weight for use in tent floors. It has the strength to withstand normal backpacking wear, and yet keeps the total tent weight to a minimum. In our EXPEDITION and 4-MAN tents, we use a 4 oz. URETHANE coated nylon that will withstand more punishment — that which the "winter type" mountaineering receives. Both fabrics are Fire Retardant (FR) treated.

Recently the American Outdoor public has been bombarded with warnings and "examples" of the dangers presented by flammable tents — and in so many cases, justifiably so! We are aware many treated-cotton, and cheaper synthetic fabric tents present a fire danger to the user.

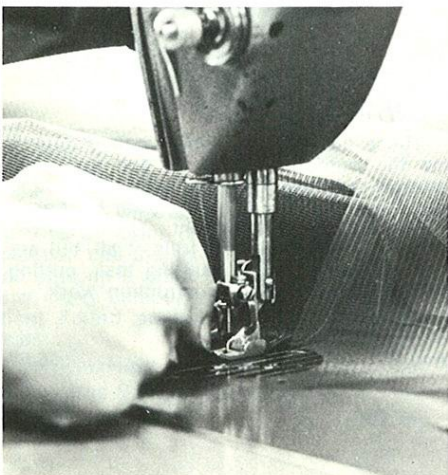

As in so many situations where all parties or products may become "painted with the same brush" however, we would like to point out a few facts:

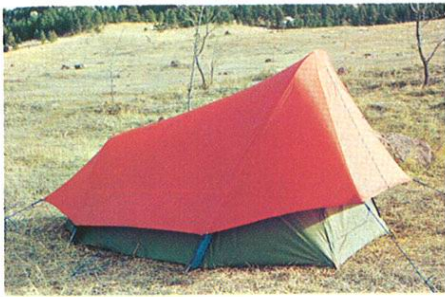

1. The vast majority of the "volatile" tents, as witnessed being burned on your local TV channel, are the "super low price specials", and are not models produced and offered for sale by the several reputable backpacking manufacturers;

2. In our 29 years of producing what we feel are the finest in quality backpacking tents, we have never received a complaint or letter where one of our tents "burned up" in an accidental fire; and

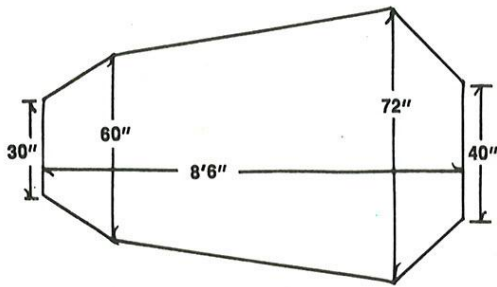

3. The reputable tent manufacturers, fabric suppliers, and people associated with the backpacking industry are in the process of developing and offering the finest in Flame Retardant (FR) treated fabrics, and all high-quality tent materials are now, or will soon be in compliance with all State and Federal laws as are pending.

We want to report this to you not as purely a defensive rebuttal to the recent "consumer reports" on tent product "dangers", but as a rational presentation of facts about the subject. — If you have further specific questions, please write us.

Weatherproof Polymer coated TEMPER KOTE ripstop nylon rainfly with zippered front entrance.

Holubar "VILLA TENT" A Spacious, Lightweight Two-Man Tent — New for 1975!

The VILLA is a scaled down version of the popular CHATEAU design and provides a very easy-to-erect, roomy tent for two people and their equipment.

Floor length is 8'6" long with a front width of 6' tapering to 5' at the rear. The canopy front peak is 55" high and 30" at the rear. The external pole design allows maximum use of the large, internal living space.

All fabrics are Fire Retardant (FR) treated. The catenary cut canopy is a breathable, 11-A ripstop nylon and the floor/side-walls of durable, weatherproof URETHANE coated 2.5 oz. taffeta. Sidewall height is 24" at the front and tapers to 9" at the rear. The 1.5 oz. Polymer coated (TEMPER KOTE) Rainfly extends beyond the perimeter of the tent and features an "ease-of-entry" zipper over the front entrance.

A large (7½" x 56") zippered window is located on each side to provide excellent ventilation. When zipped open, the window

is backed by mosquito netting. The front triangular entrance zips down the side and across the bottom with two smooth running, #5 Y.K.K. DELRIN zippers. Across the entrance is a 6" high (varmint proof) sill. The door is backed by a mosquito netting which zips open and ties to the side when not in use.

The tent pitches with four stakes but additional tie-outs are available for added stability in high winds. Tent poles are sectioned, aluminum alloy with internal shock cord. Ten tent stakes are included along with a waterproof (#12) stuff sack.

You'll find the VILLA living space to weight ratio very ideal for backpacking and the workmanship throughout is of handcrafted quality.

Colors: BLUE Canopy/AVOCADO Floor and Sidewalls.
Choice of FOREST GREEN or ORANGE Rainfly.

HP416: VILLA TENT (complete with rainfly, poles and stakes)
Shipping Wt. 8 lbs. 9 oz. (includes stakes)\$168.00

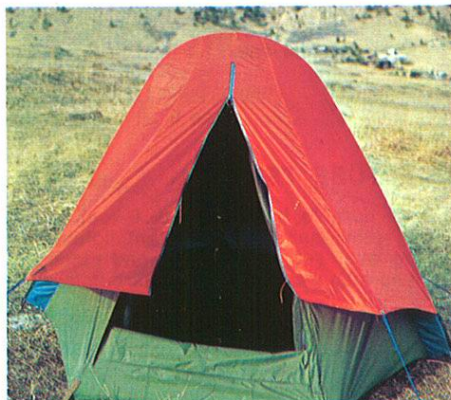

Front triangular door, backed with mosquito netting, zips open for complete ventilation.

Floor Size	8'6" x 6' x 5'
Front Height	55"
Rear Height	30"
Sidewall Height	24" x 9"
Tent Weight	3 lbs. 10 oz.
Rainfly Weight	2 lbs. 1 oz.
Pole Set Weight	2 lbs. 1 oz.
Stuff Sack Weight	3 oz.

Adjustable tension grommets keep floor, arch poles, and sidewalls secure in any weather conditions.

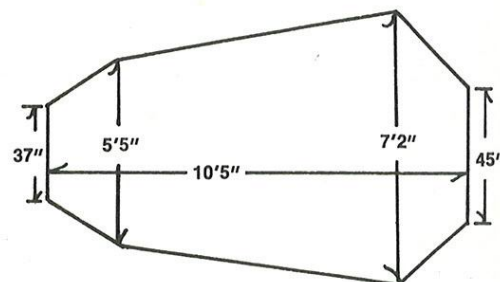

The VILLA Rainfly features an "ease-of-entry" zipper which allows you to unzip and fold the fly back to allow easy access to the front entrance. This feature is also on the CHATEAU and NOMAD (kit model) tents.

During the past two summers I have used one of your "Royalite II" tents while conducting research in Greenland. After using your tent for a total of 5 months, I find it shows no wear and can hardly be distinguished from a new tent. Its easy construction and roomy interior also make it desirable.

Many evenings one finds himself wet and tired in the Arctic wishing only to get out of the weather and have a place to dry feet and clothes. Your "Royalite II" tent certainly provides such a place.
William Burnham
Provo, Utah

Weatherproof Polymer coated TEMPER KOTE ripstop nylon rainfly.

Holubar "CHATEAU TENT" Our Spacious, Lightweight Tent for Three People!

The CHATEAU is big and roomy . . . with a floor space measuring 10' long, front width 7'2" and rear width 5'5". To add to the internal living space, the front peak height is 5'6" and 28" at the rear peak. The external pole system allows you full use of the internal space. Inside you'll find four handy storage pockets and ridge loops for attaching a clothesline.

The CHATEAU has excellent ventilation with a tunnel vent at the front arch backed by mosquito netting and two large window vents (7" x 57" each) on each side of the breathable nylon fabric canopy. All tent and rainfly fabrics are Fire Retardant (FR) treated.

The floor fabric is a durable 2.5 oz., URETHANE coated nylon that extends up the sides to give you a sidewall of 8" in the rear to 23" at the front entrance. Immediately inside the front door you'll find a double-layer floor section to provide added strength and durability for the entry way. The front weatherproof door opens with one zipper down the side and one zipper across the bottom, both smooth running, #5 Y.K.K. DELRIN type zippers. Across the entrance is a 6" high varmint proof sill. The mosquito netting door zips like the front door (varmint

proof) and ties aside when open. The catenary cut canopy is breathable, 1.9 oz. ripstop nylon, and the rainfly is a Polymer coated (TEMPER KOTE) 1.5 oz. ripstop nylon which extends beyond the perimeter of the tent for good rain protection.

The tent pitches with four stakes in normal use but two additional tie-outs and front and rear guy line loops are available for added stability in high wind conditions. When fully guyed, the CHATEAU has proven to be very stable in high winds. A total of 14 stakes are included with the tent. The sectioned tent poles (with internal shock cord) are high strength aircraft aluminum tubing, including the two piece front and rear arches which couple to the main tent poles.

Colors: BLUE Canopy/AVOCADO Floor and Sidewalls. Choice of FOREST GREEN or ORANGE Rainfly.

HP414: CHATEAU TENT (complete with rainfly, poles and stakes)
Shipping Wt. 9 lbs. 10 oz. (includes stakes) \$190.00

HP415: CHATEAU RAINFLY ONLY (Fits 1973, 74
and 75 models) \$50.00

Large spacious inside back area for storage.

Floor Size	10' x 7'2" x 5'5"
Front Height	5'6"
Rear Height	28"
Tent Weight	4 lbs. 3 oz.
Rainfly Weight	2 lbs. 4 oz.
Pole Set Weight	2 lbs. 5 oz.
Stuff Sack Weight	3 oz.
Rolled Tent Size	10" x 22"

Two large window vents, (7" x 57") with 2-way, #7 YKK ZIPLON coil zippers (backed by mosquito netting), on each side of the tent.

Holubar "TUBE TENT"

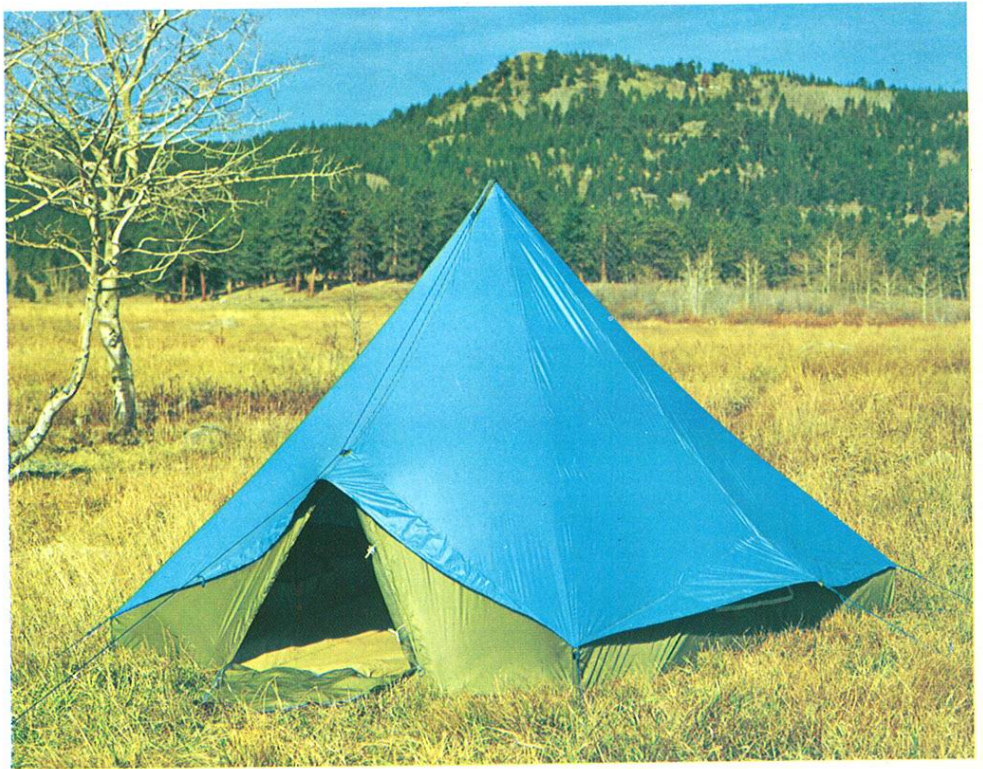

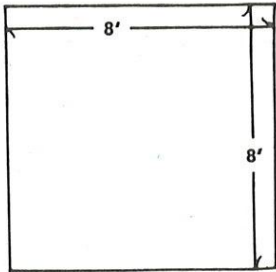

Polyethylene tubing of a durable heavy gauge, 9 feet in circumference, 9½ feet long (one man). A convenient lightweight shelter that can be strung over suspended cord and closed at one end as desired. The two-man size is 12 feet in circumference and 9½ feet long.

MC061: One-Man Tube Tent
Wt. 1 lb. 7 oz. \$2.25

MC062: Two-Man Tube Tent
Wt. 2 lbs. 1 oz. \$3.50

Fire Retardant (FR) treated rainfly extends beyond tent perimeter for good rain protection.

Holubar "4-MAN TENT" A Spacious Center Pole Design for Families!

A big, roomy lightweight tent for the backpacking family or the serious mountaineer . . . it's center pole design is easy and fast to erect.

The roomy interior starts with an 8' x 8' square floor plan with a center canopy height of 6'. The sidewalls increase from 8" at the corner to 18" at the midpoint of the sides to form hooded peaks over zippered triangular windows backed by mosquito netting. The canopy on the front and rear sides slope to form a 3' peak to accommodate a front, zippered triangular door and a rear tunnel door. Both doors are backed by mosquito netting. Fire Retardant (FR) fabrics are used throughout the tent and

rainfly. The tent floor is a heavy duty 4 oz. URETHANE coated nylon; sidewalls are 2.5 oz. URETHANE coated nylon, and the canopy is 1.9 oz. breathable, ripstop nylon. The rainfly is a 1.5 oz. Polymer coated (TEMPER KOTE) ripstop nylon. The aluminum center pole is sectioned with shock cord and adjusts in height for uneven terrain. Weatherproof stuff sack (#12) and 14 tent stakes included.

Color: BLUE Canopy/CAMEL Floor/AVOCADO Sidewalls.
Choice of FOREST GREEN or ORANGE Rainfly.

HP408: 4-MAN TENT (Complete with poles, rainfly and stakes)
Avg. Wt. 10 lbs. 9 oz. (includes stakes) \$210.00

Side windows zip down for ventilation and light, backed by mosquito netting.

Floor Size	8' x 8'
Front and Rear Height	36"
Center Height	6'
Side Wall Height	8" to 18" to 8"
Tent Weight (11-A)	6 lbs. 2 oz.
Rainfly Weight	2 lbs. 9 oz.
Pole Weight	2 lbs. 5 oz.
Rolled Tent Size	9" x 22"

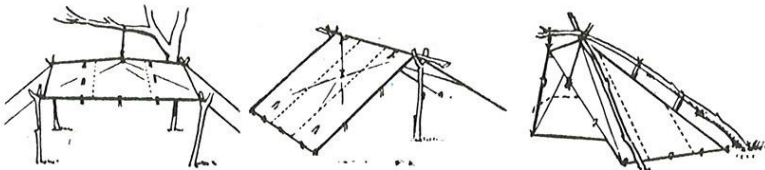

Rear tunnel door is backed by mosquito netting.

Holubar "TARP TENT"

The fire retardant 2.5 oz. double URETHANE coated NYLPORT HOLUBAR TARP can be pitched in several different configurations to provide adequate shelter, or can be used as a ground cloth, or a multiplicity of backpacking "make-do's"! The HOLUBAR TARP is 9' x 11' and has twelve grommets around the edge. Color: Avocado

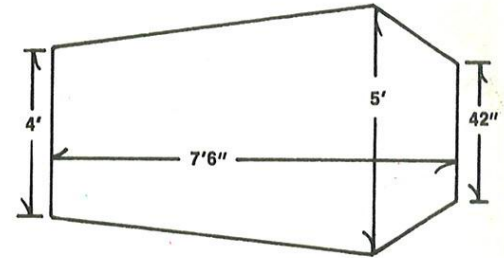

HP412: HOLUBAR TARP \$22.00
Avg. Wt. 1 lb. 9 oz.

The HOLUBAR TARP TENT has various uses; as a dining canopy, a lean-to, an emergency shelter or any purpose imaginable!

1.5 oz. Fire Retardant (FR) treated ripstop nylon rainfly.

Holubar "ROYALIGHT II TENT" The "Go Anywhere" Two Man Tent!

A very popular two man tent with a very good space to weight ratio.

The overall length of the durable, 2.5 oz. URETHANE coated nylon floor is 7½' long, 5' wide near the door and tapers to 4' wide at the rear. Front peak is 4'6" and tapers to 2½' at the rear. Floor extends up sides to form the 12" vertical side-walls—the result is roomy living space! Triangular front door is closed by zippers on the sides, and top of door can be left unzipped for ventilation. New weather flaps protect the zippers from blowing snow or rain. Mosquito netting door zips down one side and across bottom (varmint proof) and ties aside when open.

Large, insect-tight ventilator at rear peak provides maximum ventilation. Tent canopy is made from 1.9 oz. 11-A ripstop nylon.

Our weatherproof rainfly, made from a 1.5 oz. Polymer coated (TEMPER KOTE) ripstop nylon provides excellent "weather-proofing" in rainy weather. Aluminum tent poles sectioned with shock cord inside are included with tent (A-frame in front, single vertical pole in rear). Stakes (14 required for tent and rainfly) included. Fire Retardant (FR) treated fabrics are used throughout the tent and rainfly.

Guy lines included. Tent with poles rolls to 6" x 21" in a weatherproof nylon carrying bag (included).

Color: BLUE Canopy/AVOCADO Floor.

Choice of FOREST GREEN or ORANGE Rainfly.

HP400: ROYALIGHT II TENT (with poles, rainfly and stakes)
Avg. Wt. 6 lbs. 10 oz. (includes stakes) **\$125.00**

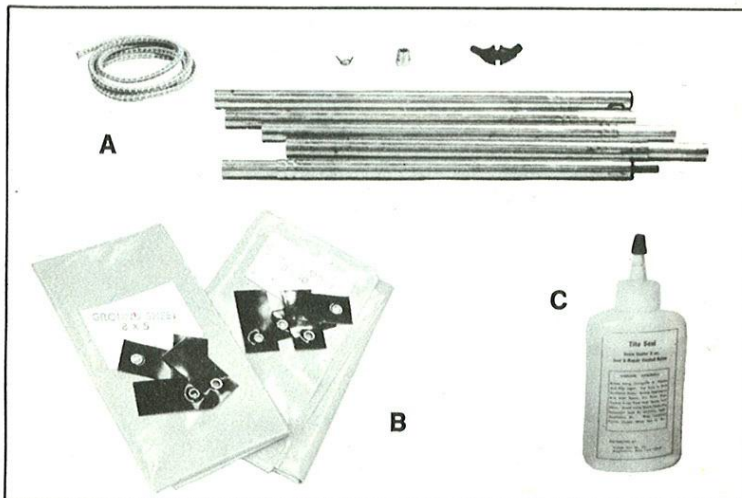

Floor Size	5' x 7½' x 4'
Front Height	54"
Rear Height	30"
Side Walls Height	12"-9"
Tent Weight	3 lbs. 4 oz.
Rainfly Weight	1 lb. 7 oz.
Pole Set Weight	1 lb. 1 oz.
Rolled Tent Size	6" x 21"

Triangular front door with zipper closure.

Large, insect-tight ventilator at rear peak.

A SMC REPLACEMENT POLE PARTS

Either A-frame or vertical poles can be made. All poles of two or more sections may be shock corded. For A-frame poles, use the SMC Top Swivel Connector. Any length pole may be made by stacking more than one middle section and trimming the top section. A-frame poles must have one top and one bottom section; vertical poles must have two bottom sections (a spike at both ends is necessary). Instructions included.

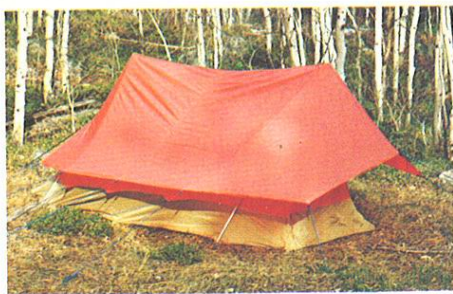

MC160: SMC Pole Top 14½", Wt. 1½ oz.	\$.85
MC161: SMC Pole Middle 12", Wt. 1½ oz.	\$.85
MC162: SMC Pole Bottom 11½", Wt. 1½ oz.	\$1.00

MC070: Size 8' x 10', Wt. 1 lb. 4 oz.	\$3.00

C TITE-SEAL SEAM SEALER

Plastic squeeze bottle contains colorless sealer for water-proofing seams on any coated fabric.	
MC180: 3 oz. Squeeze Bottle, Wt. 4 oz.	\$1.15

Fire Retardant (FR) treated, TEMPER KOTE rip-stop rainfly extends below the sidewalls.

Holubar "EXPEDITION TENT" Our High Altitude, Maximum Stability Tent!

Designed with features for the serious mountaineer—the EXPEDITION is a great high altitude snow tent, combining rugged dependability, and maximum stability in high winds.

The spacious interior is 9½' long, 5' wide, with a front and rear canopy height of 47" and the vertical sidewalls are 12" high. Fire Retardant (FR) fabrics are used throughout the tent and rainfly. The floor is a heavy-duty 4 oz. URETHANE coated nylon and the canopy is a breathable 1.9 oz. ripstop nylon. The Rainfly is a Polymer coated (TEMPER KOTE) 1.5 oz. ripstop nylon. The tent features two doors, one a varmint proof, zippered triangular door and the other a 42" tunnel style door. Both are backed by zippered mosquito netting doors. Inside, you'll find a semi-circle zippered cookhole, two hang pockets, and loops for a ridgeline clothesline. Sectioned (shock cord) aluminum poles,

stuff sack (#11) and 14 tent stakes included.

Colors: ORANGE Canopy/ CAMEL Floor or BLUE Canopy/ CAMEL Floor. Choice of ORANGE or FOREST GREEN Rainfly.

HOLUBAR TENT STAKES F

U-shaped out of ¼" duraluminum rod.

MC063: 6" length, Wt. for 3: 3 oz.3 for \$1.00

KELTY TIOGA

The outstanding features of Kelty's new frame and packs are a PADDED SUSPENSION SYSTEM, LARGER CAPACITY PACKBAGS, a completely new CAM-LOCK BUCKLE, ADJUSTABLE FRAME EXTENSION and "FLIP-UP-FLAP" COVERED ZIPPERS.

The suspension system is a single unit comprised of a firmly padded backband and padded straps across the hips. The new Cam-Lock buckle virtually eliminates waist strap loosening while allowing for easy adjustment and quick release.

A different frame, the Massif, has been designed to accommodate the new, larger packbags. The frame size itself has been increased over the Kelty Mountaineer.

Now, for the first time, the versatility of a two position Frame Extension is standard equipment. The Massif Packframe fits **only** the Tioga Pack and not the Kelty Standard Packs.

The upper compartment is completely open to permit packing of bulky, odd-sized items with ease. Quick access to the lower compartment is furnished by a full-width 16" flap protected zipper. Five large outside pockets provide convenient access to frequently wanted items and also have flap protected zippers.

Additional features include a coated fabric panel running the full length of the pack next to the wearer's back, a Cordura nylon panel across the lower compartment to prevent excessive wear when carrying crampons, and sturdy accessory strap holders and ice axe loop.

The Tioga Pack comes with Massif Frame and all fittings.

Colors: Olive Green, Red and Blue

PK087: Sizes M, L, XL.

Avg. Wt. 4 lbs. 10 oz.\$77.50

D4—MOUNTAINEER COMBINATION

For those who prefer a compromise between an open style packbag and compartmented style packbag, the D4, mounted on the Mountaineer frame, features an upper and lower compartment with an outside zipper for easy access to the lower compartment. Four zippered side pockets.

For the first time Kelty is offering a packbag in urethane coated fabric, and it is the D-4. The model pictured here is the uncoated fabric one: the coated D-4 will have covered zippers. This coated D-4 must be ordered with a frame; packbags only are not available. The standard uncoated D-4 is, of course, still available with frame or by itself.

PK003: D-4 Uncoated Fabric Packbag With Frame

Olive Green or Red

Sizes S, M, L, XL

Avg. Wt. 4 lbs. 9 oz.\$60.00

PK097: D-4 Coated Fabric Packbag With Frame

Olive Green ONLY

Sizes S, M, L, XL

Avg. Wt. 19 oz.\$60.00

THE KELTY FRAME

All Kelty frames are made of aircraft quality tubular aluminum welded together with an immensely strong heli-arc process. The packframe body is contoured with vertical stays and cross members of varying curvature to assure correct clearance between the pack gear and hiker's back.

THE KELTY PACKBAG

The Kelty packbag is made of tightly woven, high tear strength nylon treated with ZELON for water repellency. All fabric components are "hot cut" to prevent fraying, and areas of heavy wear are reinforced with nylon tape. All seams are single or double lock-stitched and back-stitched.

NOTE: When traveling through very broken terrain where balance is important, the Kelty packbag can be moved to the very bottom of the frame. The sleeping bag is then lashed to the top. The result is a much lower center of gravity.

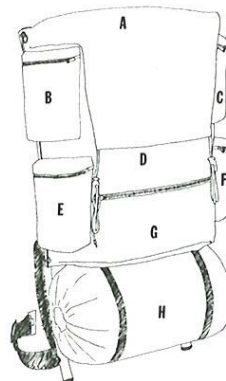

KELTY BASIC

The Kelty Basic pack was designed with all Kelty's standard quality, but with enough simplicity to keep the price within the most careful budget. It is an ideal pack for the occasional backpacker who wants a really comfortable pack, but does not want to make a substantial investment; or for the beginner who wants to own a good pack, but doesn't know what his future needs will be. Perhaps the best feature is the great adjustability of the position of the lower suspension assembly so that the Basic can "grow" with a young backpacker. Open style packbag made of 6.5 oz. urethane coated nylon. Two big side pockets, 1½" nylon web waistbelt, padded shoulder straps.

Color: Navy Blue

PK099: S, M, L, XL.

Avg. Wt. 3 lbs. 10 oz.\$37.00

HOW TO PACK YOUR PACK

A. Under the packsack's flap is a good place for your tent, ensolite pad, and down jacket.

B. & C. The larger top pockets are ideal for two one quart water bottles.

D. The large upper compartment should be packed with heavy items high and close to your back.

E. & F. These smaller pockets are best for small, loose items you may need on the trail.

G. The zippered lower compartment is useful as a "kitchen." Keep all your pots, pans, and food there.

H. Sleeping bag lashes easily under the packsack.

GERICO KIDDIE PACK WITH STAND

The latest Kiddie Pack now comes with a convenient hinged aluminum stand that allows the pack to stand by itself anywhere. The pack is constructed of strong, washable cotton duck and features an adjustable height seat with a convenient storage space underneath for diapers, bottles, etc. The frame is fully padded top and bottom for baby and parent, and the nylon shoulder straps are foam padded. For babies about 5 months up to 3 years.

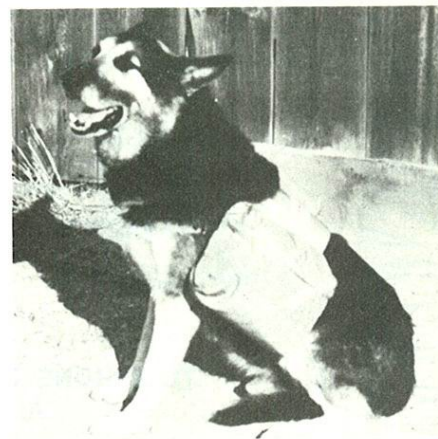

PK086: Kiddie Pack with Stand
Colors: Blue, Orange, Green
Wt. 2 lbs. 1 oz. **\$19.50**

SNUGLI

Can be worn as a backpack, front pouch, or nursing sling, and will carry children up to 4 years old. Padded shoulder straps with security buckles and adjustable sliders. A detachable bubble bib which is washable, as is the entire Snugli. Tucks and darts in the rich corduroy fabric can be let out to make room for a growing baby, a full length zipper gives easy access. Arm and leg holes allow maximum freedom of movement. The Snugli carrier is handmade in a cottage industry of Dunkard farm women in Ohio. The extraordinary care which goes into the work is reflected in the elegant simplicity, and in its exceptional quality.

PK054: Snugli Baby Carrier, One Size
Colors: Blue, Green, Red, Beige, Gold
(Please give two choices)
Avg. Wt. 1 lb. 6 oz. **\$38.95**

DOG PACK

Not only does this pack have a neck strap, but also a rump strap to keep the pack from sliding over your dog's head. A buffer flap under each pannier keeps buckles and sharp-edged loads from chafing your dog. Each pannier has a double coated nylon bottom, and the top panel is padded for comfort. The three sizes work roughly as follows: Medium — Spaniels, Terriers; Large — Labradors, Golden Retrievers; Extra Large — Shepherds, Boxers (will not fit St. Bernards). HINT: the front end of the pack is the one with the concave end of the top panel.

PK110: Back Country Dog Pack
Color: Orange
MEDIUM: Avg. Wt. 14 oz. **\$23.50**
LARGE: Avg. Wt. 1 lb. **\$25.40**
EX. LARGE: Avg. Wt. 1 lb. 2 oz. ... **\$26.10**

BELLWETHER SEAT PACK

Bellwether's seat pack straps on below the seat and provides convenient storage for small items such as bike tools, sun glasses, gloves, and maps. The polyethylene stiffener maintains cylindrical shape and increases durability. All Bellwether zippers are nylon coil and are flap protected against water seepage. Interior volume is 180 cubic inches.

PK108: 9" long, 5" diameter
Color: Blue
Avg. Wt. 6 oz. **\$6.00**

BELLWETHER LARGE HANDLEBAR PACK

Bellwether's large handlebar pack fits between "drop handlebars" and is supported in the center by a slip-on front brace (included). This pack provides large, easy-to-reach storage space for all types of gear. There is a shoulder strap for off-bike use, and the pack detaches in seconds. The exterior front pocket uses a VELCRO closure which allows access while in motion. Total interior volume is 632 cubic inches.

PK109: 8" high, 10" wide, 8" deep w/ pocket
Color: Blue
Avg. Wt. 11 oz. **\$16.50**

BELLWETHER REAR TOURING PACK

Bellwether's touring pack is adjustable to fit all rear carriers. The exterior pockets use VELCRO closures which allow access while in motion. Side stiffeners prevent wheel contact, and the underside of the pack is made of CORDURA nylon to stand up to the abrasions of bicycle touring. Total interior volume of panniers is 1200 cubic inches.

PK107: 9" high, 12" long, 4" wide per side
Color: Blue
Avg. Wt. 20 oz. **\$22.00**

MAIL ORDER INSTRUCTIONS

Ordering by mail is easy and convenient. Once you have selected your items, simply fill out the attached order blank and mail in the furnished self-addressed, postpaid envelope.

PAYMENT: Our policy is payment with the order and we must have receipt of payment prior to the shipment of the merchandise.
 a. By CASH (check, money order)
 b. By CHARGE CARDS (AMERICAN EXPRESS, MASTER CHARGE and BANK AMERICARD are honored).

TELEPHONE ORDERS:

Area Code (303) 442-8413 (SORRY — NO COLLECT CALLS PLEASE)

OFFICE HOURS:

Monday - Friday: 7:30 a.m. - 4:15 p.m. (MST)
 Closed Saturdays and Sundays

SHIPPING CHARGES:

a. SURFACE RATES (Based on the \$ Amount of the Order).

CUSTOM DUTY: You will be required to pay a Canadian Duty and Tax upon receipt of the package(s). If you plan to return any part of, or the entire order, for the purpose of exchanging those item(s), please check with your custom officials first so that duty does not have to be paid twice in the case where the item does not change value.

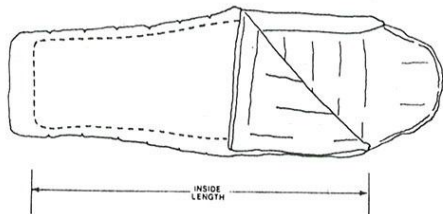

HOLUBAR MAIL ORDER SERVICE IS FAST AND DEPENDABLE!

Prices effective March 1, 1975. Subject to change without notice.

WHEN ORDERING A BAG

When you have selected a particular Holubar model sleeping bag, we will be glad to assist you in completing the order to your satisfaction.

SIZING: All measurements are inside measurements as illustrated below.

NOTE: Holubar Bag Hood is 18" and is not included in inside dimension listed for bag.

A general rule of thumb, based on past customer recommendations and our field experience, is to order an inside length an inch or so longer than your height. Another feature in Holubar sleeping bags is a proportionate increase in girth with the longer lengths for each bag model. The corresponding girth for each length is listed at the end of each bag description. BE SURE YOU STATE THE LENGTH OF BAG YOU DESIRE ON THE ORDER BLANK.

ZIPPERS: We offer either a left or right side zipper (while lying on your back). Most right-handed people prefer a left opening bag for ease of operation reaching across themselves and left-handed people vice-versa. PLEASE STATE SIDE OPENING PREFERENCE ON THE ORDER BLANK.

If you now own a Holubar sleeping bag and wish to order a new bag that will zip to your present bag, please write us for more information.

LINERS AND COVERS: (Optional Items) New for 1975, the TIMBERLINE, ROYALIGHT, EXPEDITION and ULTIMATE models all take the same Liner (HP013) as the TIMBERLINE now has the same girth and shape as the others. If you own a 1974 or older model TIMBERLINE, please write for price details as it requires a "special cutting." All sleeping bags are fitted with snaps and ties necessary for Liners or Covers (excludes CONVERTIBAG or CHILD'S model). PLEASE SPECIFY BAG MODEL, LENGTH, and LEFT or RIGHT OPENING when ordering either a LINER or COVER. See page 8 for item descriptions and prices.

EXTRA DOWN: Extra Down can be added to any Holubar bag at the time of manufacture. As mentioned in general text on construction however, each construction design has a maximum fill capacity for optimum results. Should you desire this extra fill option, please consult us for advice. Add \$6.50 for each additional 4 ounces and if you send in your used bag, please send \$5.00 to cover the labor of opening and filling your bag in addition to the cost of the Down. Used bags must also be dry cleaned and customer will be notified of cleaning cost.

CLEANING DOWN SLEEPING BAGS OR GARMENTS

To clean a Holubar Down garment or sleeping bag we recommend professional dry cleaning. One should air the garment, especially a sleeping bag, after a dry cleaning to remove any lingering odors. When we receive used Holubar products back for repairs or alterations, we have them dry cleaned at a professional cleaners, then fluff and air thoroughly.

If you decide to wash, use a mild soap ("IVORY," "WOOLITE" or the like) in warm water by hand washing. Do not use a strong alkaline detergent as it will take an excessive amount of the natural oils out of the Down. Thorough rinsing is most important, as the Down if dried with a soap residue remaining in it, will tend to "mat" all the more. Drying can be outdoors on a line (about a three-day wait in many cases!!) or in a clothes dryer, set on WARM, NOT HOT.

Down is much "tougher" than most people think. Though an inexperienced person can ruin a Down garment or bag in a washing machine or dry cleaner... It is usually the casing or fabric that will be destroyed before the actual down itself. Down, when wet, will mat and must be fluffed and air dried well. Air circulation is the major factor to the life and performance of Down, and is why we always ask that jackets or bags be stored loosely and where they can "breathe" when not in use. Stuffing in waterproof, airtight sacks should only be done while they are being transported or packed on the trail. Fluffing and shaking is good to loosen and "air out" this natural product.

RETURN & REPAIRS

NEW MERCHANDISE

All merchandise is sent to meet with your satisfaction. If you do not wish to keep an item, return it promptly and a full refund will be issued to you or an exchange will be sent per your instructions.

REPAIRS

If any product manufactured by Holubar is damaged, we will be glad to examine and advise you of the feasibility of a repair and related repair charge. Any item returned, must be dry cleaned at the expense of the customer prior to any repair work. We will advise you of the cleaning charge along with the repair charge prior to performing any work.

L	42"-44"	34"	
XL	46"-48"	35"	

PANTS: Please send your inseam (measure from the crotch seam to the bottom of cuff), and your waist measurement.

BOOTS: Follow proper sizing instructions on page 23.

Holubar over the years has specialized in the area of soft packs and offers a line of functional, lightweight and comfortable contour packs, belt pack, a ski touring/backpacking model and new for 1975 . . . a utility bag. Although the number of models is limited, it certainly is not a static area of production as these packs have undergone design changes from time to time and newly discovered, improved fabrics have also been incorporated. The result is a small family of packs with all the high quality materials and workmanship common throughout the Holubar line . . . and they'll do the job with no limitations.

Holubar "STUFFEL BAGS"

Roomy, easy to handle utility bags for any type of travel or outing . . . you name it . . . with easy to "get at" storage space in four unique compartments and pockets. Available in two sizes.

These rugged all-purpose bags are built to "take it" with strong, long-wearing fabrics and zipper components. Sturdy construction with the traditional, handcrafted Holubar quality.

Features include . . . a "wet-bag" waterproof compartment with its own outside zipper entrance. You can store wet swim suits, towels or dirty clothes, separate from the contents of the main bag compartment. The main bag zipper entrance runs the entire length of the bag for easy access. Valuables or small items can be stored in the zippered security pocket inside the main bag compartment, a pocket between the handles can be used for maps or travel notes . . . its easy access eliminates having to rummage through all your clothing or gear! Double strap handles and end straps

allow carrying by hand, over the shoulder, or on the back.

Meticulous construction is evident throughout. The main compartment zipper is a smooth running, dependable Y.K.K. ZIPLON coil with double pulls to accommodate a small luggage lock if desired (lock not furnished). Outside zippers are covered for all-weather protection. The bag fabric is a heavy-duty, 11.5 ounce nylon CORDURA with a Kenyon Super K-Kote water repellent finish. The "wet-bag" compartment is lined with a Urethane coated NYLPORT. Easy to care for . . . the STUFFEL BAG can be easily washed or dry cleaned.

Colors: Royal Blue, Forest Green or Orange
HP508: MEDIUM STUFFEL BAG
(20" x 11" dia.)

(26" x 13" dia.)

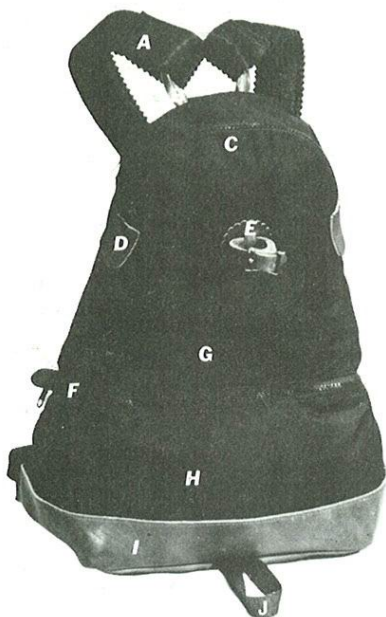

Avg. Wt. 29 oz. \$21.50

"STUFFEL BAG" SHOULDER STRAP

2" black nylon webbing. Adjustable for desired length, steel snap rings at each end.

HP510: STUFFEL BAG SHOULDER STRAP
Wt. 4 oz. \$3.00

HOLUBAR CONTOUR PACK FEATURES

- A. 2" nylon web shoulder strap with felt padding
- B. Hinged steel D-ring
- C. Y.Y.K. DELRIN zipper
- D. Leather pull tabs
- E. Buckled leather accessory strap
- F. Y.K.K. DELRIN zipper
- G. Upper compartment
- H. Lower storage compartment
- I. Durable leather bottom
- J. Nylon carrier strap

Despite an often recurring temptation, I shall not write a paean on the unsurpassed quality of your products; this is axiomatic to anyone who has taken the time and has had the interest to survey the world market. But I can no longer resist expressing my appreciation for the excellence of your service, the efficiency and friendliness of your employees, your environment consciousness, and the genuine ethical concern and fairness which permeate your company and its dealings to me and all. I have never met a Holubar customer who did not share these feelings. You have my admiration and my gratitude.

James H. Quigley
Los Angeles, California

Holubar

CONTOUR PACK

SMALL: The small contour pack is ideal for a short hike, for school books, or for bicycling. The contour shape is designed to fit close to the body to allow maximum freedom of body movement, yet will not "flop" around to cause distraction or discomfort.

The small pack has one large single compartment to accommodate notebooks or textbooks, and has a smaller compartment on the front for smaller items. The pack is weatherproof heavy duty nylon, and both zippers are Y.K.K. DELRIN medium size zips. Straps are 2" nylon web with felt padding.

17" high with a 6" x 12" bottom, the bottom is double thickness to provide maximum durability.

Colors: Navy Blue or Orange weatherproof nylon duck

HP500: HOLUBAR SMALL CONTOUR PACK
Wt. 10 oz. \$16.00

LARGE: The two compartment large contour pack is ideal for hiking, fishing or short overnight camps. Y.K.K. DELRIN zippers close the two separate compartments

where your gear can be stored such as sweaters, camera or rain jacket in upper, with food, water bottles, stove, etc. in lower.

The newly designed shoulder strap is a 2" wide nylon web with a 1/4" pinked felt sewn to the underside for added padding and comfort. The straps fasten to a hinged D-ring at the top of the pack. The waist strap is a 3/4" nylon flat webbing which is adjustable and fastens with a D-ring and spring snap. The large size is available with a choice of double nylon bottom or a heavy leather bottom. The bottom features two leather holders for accessory straps (straps not included). The large size measures 18" high with an 8" x 10 1/2" (front) x 13 1/2" (rear) bottom. The large size also comes equipped with ice axe carrier straps ... also handy for other uses, such as carrying a camera tripod, fishing rod case, etc.

Colors: Navy Blue or Orange
HP501: LARGE (with Double Nylon Bottom)
Wt. 16 oz. \$22.00

HP502: Large (with Leather Bottom)
Wt. 22 oz. \$32.00

Holubar

BELT PACK

Lightweight and compact! This pack can be used to carry all those small miscellaneous items in a handy but out-of-the-way, comfortable location — frees those bulky, overstuffed, uncomfortable garment pockets. Access to over 390 cubic inches of storage space in this 14" by 6" diameter water repellent nylon duck pack is through a 12" long nylon zipper on the top. Adjustable waist belt with anchor buckles and two handy attachment rings can be used to tie anything on or attach BELT PACK to your back pack.

HP504: HOLUBAR BELT PACK
Colors: Navy Blue or Orange
Wt. 8 oz. \$12.00

Holubar

ROYAL PACK

The ROYAL PACK is the latest addition to the Holubar pack line and is an ideal pack for ski touring or backpacking.

The main compartment is 20" high with a 7" x 10½" (front) x 13½" (rear) bottom. The top opening has a 31" circumference with a drawstring with V-slide closure. This compartment features two 18 inch long heavy-duty aluminum stays for added support and comfort on back.

In addition to the main pack compartment, the ROYAL PACK features a 2½" high x 10½" x 10½" handy compartment in the top lid. The lid is removable and attaches in back with two removable pins and in front with two leather straps that buckle to main pack compartment. Access to the lid compartment is a 9 inch, #5 Y.K.K. DELRIN zipper with protective weather flap. Lid has two accessory strap holders on top (straps not included).

Two side pockets will hold most quart size bottles and each side pocket measures 10" high x 6" x 2½". Access to each pocket is through a nine inch #5 Y.K.K. DELRIN zipper with protective weather flap. Slats behind side pockets and leather ski guards hold tour skis, or other gear to be "lashed on" securely in place.

Pack material is a coated heavy nylon duck. The pack bottom is a heavy-duty cowhide with a 2 inch scuff guard and features two accessory strap holders (straps not included).

The load is carried through two leather shoulder straps, 1¾ inches wide and lined with felt on the underside for added comfort. The waist strap is an adjustable ¾" wide flat nylon webbing.

The ROYAL PACK is lightweight and features the traditional fine workmanship and design that is expected from Holubar. We feel this is unquestionably the finest ski tour and mountaineering pack made.

Colors: Navy Blue or Orange

HP503: HOLUBAR ROYAL PACK

Wt. 2 lbs., 12 oz.\$52.00

HOLUBAR ROYAL PACK FEATURES

- A. Top lid compartment
- B. Leather pull tabs
- C. Buckled leather strap for secure closure
- D. Buckled leather accessory strap
- E. Protective weather flap zippers
- F. Leather ski guards
- G. Durable leather bottom
- H. Bottom accessory strap holders
- I. Nylon carrier strap

The ROYAL PACK has a 31" top opening circumference with a drawstring and V-slide closure.

ACCESSORY STRAPS

Now available in four sizes, these handy nylon straps have many uses. The 42" and 34" lengths are ideal for lashing tents and sleeping bags to packframes. The 15" strap is most often used to tie clothing and other accessories to packs. The short 10" straps are perfect for lashing skis to our ROYAL PACK. All lengths have metal buckles and tips.

Wt. per pair 4 oz.2 for \$1.10

BELL & HOWELL

8 x 36MM WIDE ANGLE BINOCULARS

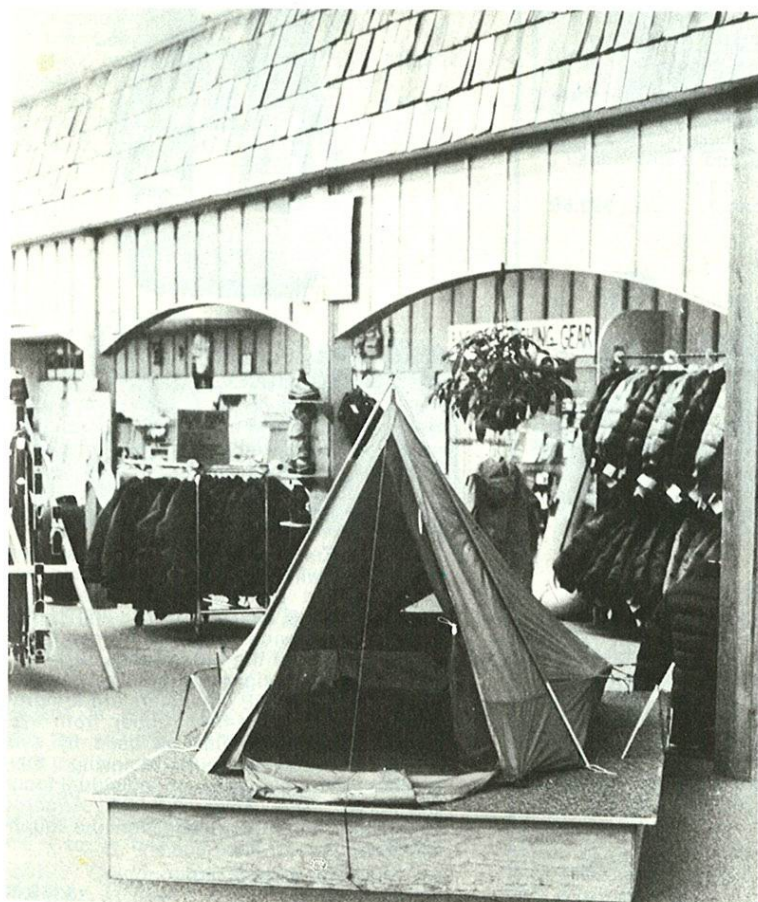

Bell & Howell Company has put its expertise in camera optics to work in a new way and has produced a fine, high quality porro prism binocular.

These eight power binoculars have a wide 36mm entrance pupil diameter of objective lens which creates a sharp, bright image even under unfavorable lighting conditions. Large, 4.5mm exit pupil diameter of eyepiece lens greatly reduces the "black-out" effect that occurs when binoculars are not held in proper alignment with the eyes.

Center focus wheel allows simultaneous focusing of both eyepieces, but these binoculars also feature a "micro" adjustment collar on the right eyepiece to compensate for differences between the eyes to provide greater viewing comfort. Bell & Howell Company uses a very tough cast aluminum body with adjustable neck strap. Complete with cloth-lined field case, shaded eye cups, specially tinted lens' filters, lens' caps, and cleaning cloth. Enjoy these Bell & Howell Binoculars free for two weeks, no obligation!

MC214: 8 x 36 Binoculars With Case and Accessories.

Wt. 1 lb. 10 oz. \$51.29 ppd.

BUSHNELL
POCKET SIZE BINOCULAR 7 x 26

A startling engineering achievement in miniaturization—the power and clarity of large, conventional binoculars in a miniature 11 ounce body that exacts no penalty for its wonderful small size. A unique optical system combines with rubber roll-down eyecups to give the same full field of view with or without sun or eyeglasses. All optics are fully coated on all air-to-glass surfaces and balanced to prevent eyestrain. The electric-blue color of the objective lenses reveal built-in “Squint-Pruf” filters that block reflected glare from water, sand, snow, and haze. Adjustable eyepiece to compensate for difference in eye strength. Complete with deluxe soft, zippered carrying case. 20 YEAR WARRANTY. Field at 1000 yards: 368 feet.

MC005:
 Shipping Wt. 1 lb. \$106.00

ZEISS MINI 6 x 20B

The image quality and long serviceability of Zeiss binoculars have made the Zeiss name renowned throughout the world. Each lens and prism is individually tested for optimum optical quality. Each binocular must pass a compressed air test, an exacting alignment test . . . to make sure that image quality and twilight performance are the best. These 6 x 20B glasses weigh only five ounces with case and are roughly the size of a package of cigarettes. Rubber eyecups which can be rolled back to give the eyeglass wearer a full field of view. The field of view at 1,000 meters range is 120 meters.

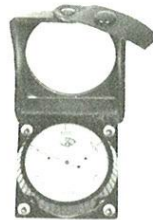

MC186: 6 X 20B Binoculars with case
 Wt. 5 oz. \$159.00

BUSHNELL
POCKET MONOCULAR 8 x 24

The magic of powerful optics at your fingertips wherever you go. The 8 power lens is ideal for all outdoor activities. 437' field at 1000 yards. The lens can be used by itself or as a close-up magnifying glass. This handy instrument is only 3½" long, weighs 4 ounces, and has fully coated lenses. Complete with handsome zippered carrying case and wrist strap.

KUBAN HITCH

Designed primarily to hold binoculars or cameras securely to your chest, ready for instant use, while allowing complete freedom of movement. Although the Kuban Hitch contains heat-treated metal parts for reliability, when properly rigged, it will be noiseless because of the constant tension of the elastic shoulder straps and rubber binders. A fine gift for any camera buff.

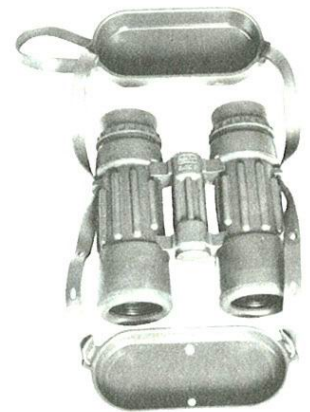

MC154: Kuban Hitch
 Wt. 8 oz. \$8.75

BUSHNELL
EXPO BINOCULAR 8 x 30

If you've wanted a pair of backpacking binoculars that would stand up to abuse and come back for more, you'll want this new model. The rugged body is made of fiberglass and is shockproof, waterproof, and it floats! The unique "Thumb Focus" system is a simple way to produce a sharp, clear picture. Additional features include lenses shock-mounted in rubber, anti-reflection coated optics, roll-down rubber eyecups that give a full wide picture with sun or eyeglasses, and nesting elastic-connected covers for protection from dust and dirt. Field of view is 394' at 1000 yards. Weight is 12 oz. ONE YEAR WARRANTY. MC137: Length — 4"; Width — 6½"

Shipping Wt. 1 lb., 2 oz. \$27.50

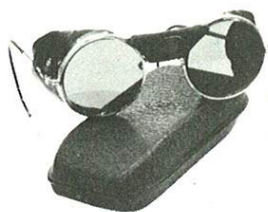

ZEISS 8 x 30B
ARMORED BINOCULARS

Each Zeiss binocular is tested with spectrophotometers and interferometers to guarantee optical perfection, is filled with compressed air and tested for perfect sealing against dust and moisture, and is brutally jolted on test machines to insure prism alignment.

At the Zeiss workshops in West Germany the twin traditions of research and craftsmanship persist. Zeiss gives a lifetime guarantee, one backed in the United States with service personnel trained in the craftsmanship of the old country.

Originally designed for the German Army, these 8 X 30B binoculars are armored in olive drab, glare-free rubber from eyepiece to eyepiece. Can be used by eyeglass wearers without removing their glasses; also equipped with individual focus eyepieces. The Zeiss 8 X 30B Armored Binoculars are without question the toughest binocular we have seen.

Wt. 4 oz. w/case \$22.00
MC126: Caravan Double Gradient
Wt. 4 oz. w/case \$28.00

BAUSCH & LOMB — RAY-BAN LARGE METAL SUN GLASS

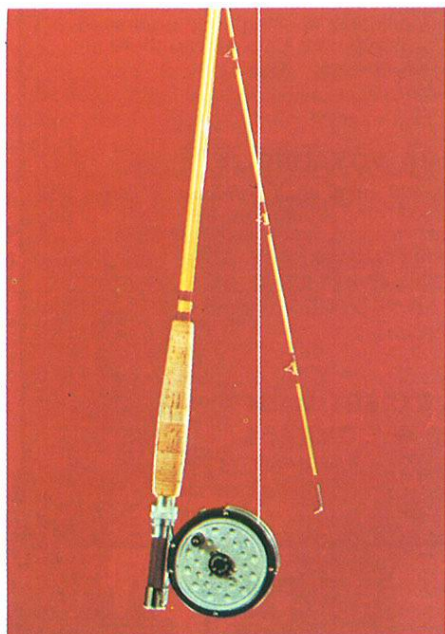

This is the original of the famous "aviation goggle" and still a favorite for many outdoor activities. The gold-filled frame has semi-hookover temples and adjustable nose pads.

MC128: Metal G-15
Wt. 4 oz. w/case \$22.00
MC129: Metal Double Gradient
Wt. 4 oz. w/case \$28.00

Backpacking Fishing Tackle and Accessories

For several years we discussed adding Backpack fly-fishing equipment to our catalog, as we continued to receive more requests, we assembled what we feel is the finest basic selection available. The equipment shown here is of the same highest quality and standards we look for in any top Backpack equipment, and we feel it can add so much enjoyment to your outings.

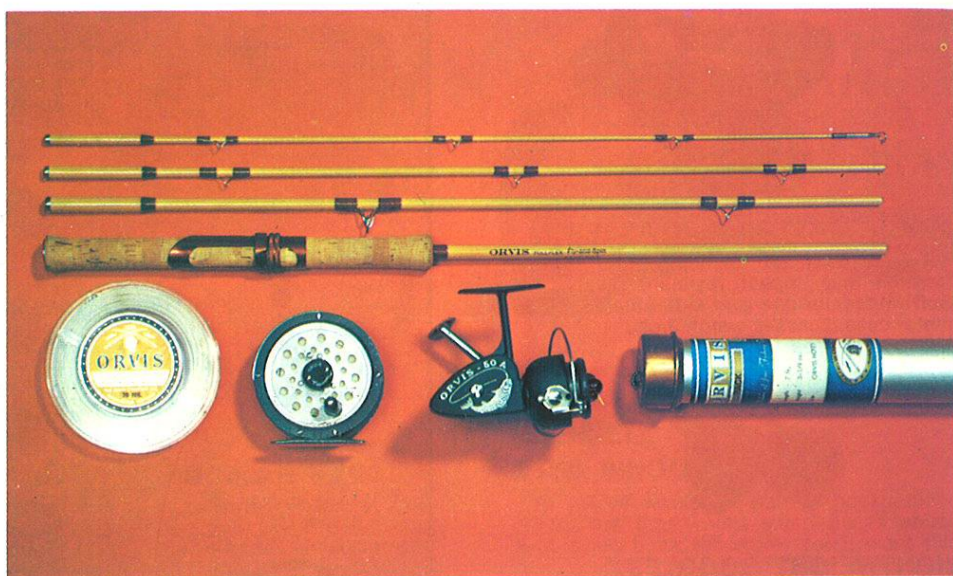

We sincerely welcome any questions you may have regarding equipment selection or usage.

ORVIS FULLFLEX GLASS FLY ROD

Available in two lengths, 7 foot and 7½ foot, these two-piece fly rods work their full length for maximum forward line speed and smooth accurate casting. The 7-foot, 3½-oz. rod is fast action with 6-weight line, while the 7½-foot, 3½-oz. rod is medium action with 7-weight line. The complete outfit includes the rod in sack and aluminum rod cast and one of the following reels with line: Madison 6/7 Fly Reel with Orvis HDG-(6) Fly Line for the 7-foot rod; Madison 6/7 Fly Reel with Orvis HCF-(7) Fly Line for the 7½-foot rod.

Wt. 1 lb. 13 oz. **\$90.00**
FG012: 7½-foot ROD ONLY with Case
Wt. 1 lb. 3 oz. **\$58.50**

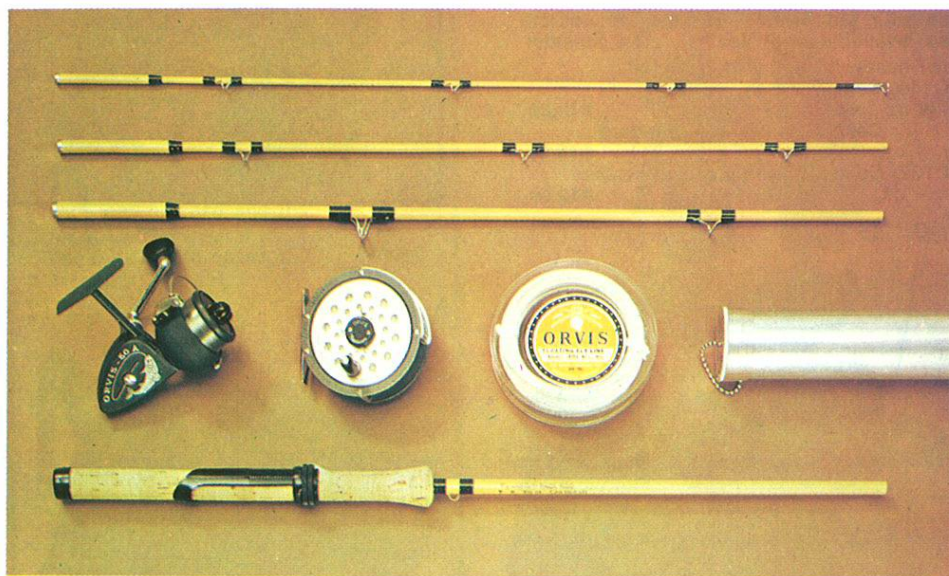

ORVIS FULLFLEX FLY-AND-SPIN PACK ROD OUTFIT

For a backpacker, this is the rod that does everything. It's a 7 ft., 4 pc., 3¼ oz. rod that lays out long casts of WF7F line, with the smooth ease of Orvis Action AND interchangeably you mount a spin reel at midgrip. This rod casts a delicate dry fly, shoots a ½ oz. to ¾ oz. spin lure across a wild Alaskan river, flexes to handle a fast little brookie, fights a steelhead or salmon to net.

The complete outfit includes the rod in sack and aluminum rod case, Orvis WF7F Fly Line, Madison 6/7 Fly Reel, Orvis 50A Spin Reel (51A for lefthanders) loaded with 140 yards, 4 lb. test monofilament.

FG202: Fullflex Pack Rod Fly-and-Spin Outfit
Wt. 2 lbs. **\$143.50**
FG003: Fullflex Pack Rod Only With Case
Wt. 12 oz. **\$67.50**

ORVIS CAMPER FLY-AND-SPIN ROD OUTFIT

The backpacker's special packs only 22" long and makes up to a 7 foot rod that does everything . . . yet comes COMPLETE with fly reel, fly line, spin reel, spin line, everything ready to go for \$96.50.

A backpacker is fully equipped for any sort of fishing and the rod is the same superb Orvis Fullflex Glass but simply with single-flared cork grip, glass self-ferules, and hard chrome guides with nylon thread wrapping. No compromise in durability or feel.

The complete outfit includes the 7 ft., 4 pc. 3 oz. Fly-and-Spin Rod, with Orvis WF7F Fly Line, Madison 6/7 Fly Reel, Orvis 50A Spin Reel (51A for lefthanders) loaded with 140 yds. 4 lb. test monofilament. Rod comes in sack and aluminum rod case.

FG203: Camper Fly-and-Spin Outfit
Wt. 2 lbs. **\$112.75**
FG004: Camper Fly-and-Spin Rod Only With Case
Wt. 12 oz. **\$36.75**

ABOUT SCOTT POWR-PLY RODS

SCOTT POWR-PLY fly rods are designed and handcrafted in a small shop in San Francisco to provide the discriminating angler with exceptional casting efficiency and fishing performance.

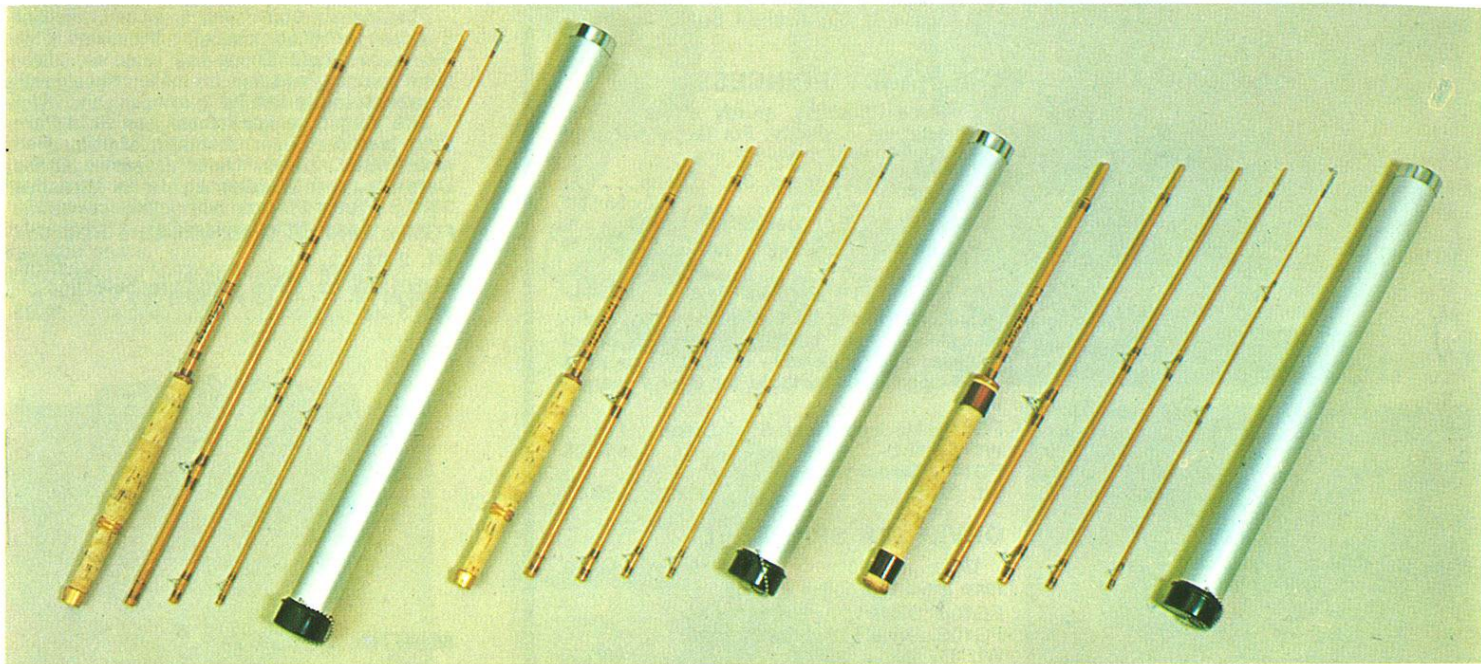

The exceptionally high-density glass in SCOTT fly rods permits thinner, lighter walls and finer tapers without sacrificing rod strength or toughness. On each SCOTT

rod, the "backbone," or stronger part of each rod section, is carefully located and positioned along the top of the rod so that the rod always flexes and drives in a straight line.

SCOTT rods are hand-fitted with hollow glass ferrules which are internally tapered to permit full flexing of the rod and to avoid creating a double-wall fracture point.

The flexible ferrules permit even a multi-piece rod to flex in exactly the same arc as the original one-piece blank.

Each SCOTT rod is finished to provide long, useful service. Cork rings are laid up under great pressure to eliminate soft spots which shorten handle life. Guides are double-wrapped at the foot, and all wraps are finished with five protective coats, including three epoxy coats.

SCOTT 4 PIECE FLY ROD

This 7½ ft. rod is designed for WF5F lines and has a light, responsive tip and crisp, full-rod flex action. Weighing only 2¾ oz. this 4-piece rod packs into a 24¼ in. aluminum case with a total weight of only 11 oz. The rod is built with an all cork handle with a fixed butt hood and forward sliding ring. Aluminum case and cloth liner included.

FG018: SCOTT 4 Pc. Fly Rod with Case
Wt. 11 oz.\$87.50

SCOTT 5 PIECE FLY ROD

This very light and delicate yet powerful 7 ft. rod is ideal for backpackers because its 5 pieces pack in an 18¼ in. aluminum case with a total weight of only 9¼ oz. The rod itself weighs only 2½ oz. and has a sensitive tip and full-length action coupled by a tight midsection. It provides excellent control of the WF4F line for which it is designed, mends line effectively, and handles surprisingly long roll casts. The all-cork handle has a fixed butt hood and forward sliding ring. Aluminum case and cloth liner included.

FG016: SCOTT 5 Pc. Fly Rod with Case
Wt. 9¼ oz.\$92.50

SCOTT 5 PIECE COMBINATION ROD

This 7 ft. rod is the combination version of the 5 piece fly rod. The level cork handle and two sliding rings are for use with both spin and fly reels. In addition, two larger spin guides replace the stripping guide and first snake guide on the fly rod. This rod is also very light at 2¾ oz. and is designed for WF4F line and 1/16-1/4 oz. lures. The rod also packs in an 18¼ in. aluminum case with a total weight of only 9½ oz. Aluminum case and cloth liner included.

FG017: SCOTT 5 Pc. Combination Rod
w/case
Wt. 9½ oz.\$92.50

Perfect extra storage
for anything you
might need up-stream.

Holubar BELT PACK

Lightweight and compact! This pack can be used to carry all those small miscellaneous items in a handy but out-of-the-way, comfortable location—frees those bulky, overstuffed, uncomfortable garment pockets. Access to over 390 cubic inches of storage space in this 14" by 6" diameter water repellent nylon duck pack is through a 12" long nylon zipper on the top. Adjustable waist belt with anchor buckles and two handy attachment rings can be used to tie anything on or attach BELT PACK to your back pack.

HP504: HOLUBAR BELT PACK
Colors: Navy Blue or Orange
Wt. 8 oz.\$12.00

ORVIS MINI-LURE SELECTIONS

The top six spin lures in your choice of 6 in the 1/16 oz. class or the same 6 in the 1/8 oz. class. These tiny lures for ultralight spinning are the ultimate "sneakiest" approach to big fish lying low.

The six single hook lures are Gold Panther Martin, Silver Panther Martin, Red and White Dardevle, Nickel Dardevle, Brass Dardevle, and Muddler Jig. In an attractive 3 1/4" x 7 1/2" x 1" box with clear cover.

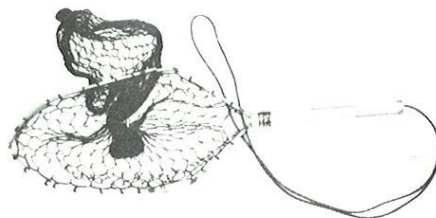

FG500: 1/16 oz. Orvis Mini-Lure Selection
Wt. 2 oz. \$8.35
FG501: 1/8 oz. Orvis Mini-Lure Selection
Wt. 3 oz. \$8.95

MARTIN FLY BOX

The "Fly-Safe" aluminum box allows you to suspend your flies by the hook. Fast drying ventilation allows you to steam your flies while in the box. Holds 72 flies.

FG438: 6 1/4" x 3 3/4" x 1"
Wt. 7 oz. \$9.95

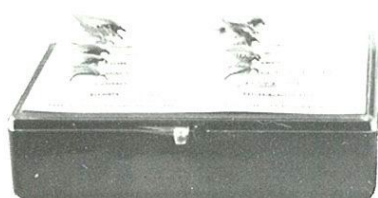

ORVIS NORTH FORK POCKET NET

This beautifully engineered folding landing net is perfect for backpacking. The stainless steel and anodized aluminum construction is rugged and reliable but weighs only 11 oz. Only 9" long folded but locks open to 8" x 13" loop with full 24" deep nylon bag. And ONE-HANDED MOTION SPRINGS IT OPEN. It packs out of the way but is ready instantly when you need it.

FG400: Orvis North Fork Pocket Net.
Wt. 11 oz. \$27.50

ORVIS "EXPERT" FLY SELECTIONS

The 12 fly patterns in the "Expert" Selections are considered the most popular and effective for any and all trout fishermen. Tied both wet and dry, these Orvis "Expert" Flies are always good in any section of the country. Orvis "Expert" Flies are mounted upright on a labelled card in an attractive 4" x 4 3/4" x 1 1/8" box with clear cover.

PACK RAFT

The fisherman's dream. Our pack raft weighs just 6.8 pounds including inflatable seats, oars (pair), oarlocks, repair kit, and stuff sack, but will support two men with tackle. This raft enables you to pack into that remote lake with the five pound Brookies you know are just waiting for you. It also doubles as emergency shelter and air mattress while you're a long way from home.

The pack raft is made of handcrafted neoprene rubber-coated nylon material of lap seam and tape construction that combine to deliver the dependability necessary for outdoor use. The raft is fabricated in easy-to-see vivid international yellow for safety, and your two inflatable seats offer extra protection as auxiliary floats. The stuff sack included with the raft can be used as a pump that will fill your raft effortlessly in two minutes. Our pack raft is shipped complete with oars (pair), oarlocks (pair), repair kit, stuff sack, and inflatable seats.

MC207: Stuffed Size 20" long x 8" diam.
Wt. 6 lbs. 13 oz. (complete) **\$110.00**

The stuff sack included with the pack raft can be used as a pump that will fill your raft effortlessly in two minutes.

"THE VEST" DELUXE FISHING VEST

52% polyester/48% cotton poplin with strong reinforcement at all edges. Two large bellows zipper pockets, two outside center bellows pockets with double snap fasteners, four smaller VELCRO® fastener bellows pockets (two over lower zipper pocket, two at top of vest), and two inside zipper pockets. Two lower snap fastener inside pockets and one outside pocket for accessories over one zipper pocket. Also a roomy bellows back pocket with side zipper, a ring for landing net at collar, and rings at each upper pocket for angler's clip or other tools. Two-tone tan and brown.

OPTIMUS 8R (A.)

A well-designed white gas stove which is easy to prime and is self cleaning. Low center of gravity provides steady base for pots. Easy to operate, reliable and fast cooking. Boils quart of water in 6-7 minutes.

CW044: 5" x 5" x 3"

Wt. 24 oz.\$21.95

OPTIMUS 111B (B.)

This huge stove is the big brother to the 8R. It operates in the same way but has a pressure pump. It also is self cleaning. Burns 2 hours on white gas and will boil 1 quart of water in only 3 to 4 minutes.

CW045: 6 3/4" x 6 3/4" x 4 1/8"

Wt. 54 oz.\$39.95

OPTIMUS 99 (C.)

This brand new stove is similar in design to the time-tested 8R. However, the 99 has a top that can be used as a sauce pan and includes a removable handle and windscreen. The aluminum construction helps keep the weight low. Will boil 1 quart of water in 6 to 7 minutes.

CW101: 5" x 5" x 3"

Wt. 21 oz.\$23.95

SVEA 123U/123UR STOVES (D.)

The SVEA 123U is an efficient, light-weight stove that is available by itself and can be used with the SIGG ALUMINUM COOKSET and is the same stove included in the SVEA COMPACT COOKER. For the first time this stove is available in a self-cleaning model/SVEA 123UR. The 123UR is included in the OPTIMUS 88 COOKSET and is also available by itself. Stove holds 1/3 pint white gasoline. No pumping required. Spare cleaning needle included with Svea 123U.

CW046: Svea 123U 5" x 5 3/4"

Wt. 20 oz.\$14.50

CW120: Svea 123UR Self-Clean 5" x 3 3/4"

Wt. 20 oz.\$15.25

MINI STOVE (E.)

A butane powered stove with large wind shield around the burner and a low profile and large base diameter to give very stable pot support.

CW109: Mini Stove 1 1/2" x 4 1/2"

Wt. 18 oz.\$16.00

CW111: Detachable Cartridge only (cannot be shipped via air mail)

Wt. 10 oz.\$1.35

SVEA COMPACT COOKER (F.)

Available in a self-cleaning model, Svea 123R, with windscreen and small pot, packed height of 5" x 5 3/4" diameter, and holds 1/3 pint of white gas. No pumping required. Cleaning needle included with standard model Svea 123.

CW047: Svea 123, standard 5" x 3 3/4"

Wt. 25 oz. (with pot)\$17.95

CW121: Svea 123R Self-Clean 5" x 3 3/4"

Wt. 25 oz. (with pot)\$19.95

BLEUËT STOVE (G.)

This compact stove is very handy. Uses an easily inserted, disposable butane cartridge for fuel supply. Regulating valve for heat control. One cartridge will burn for 2 1/2 to 3 hours at maximum flame. Frustrations of priming, pumping and filling are gone ... just open the valve and light.

CW043: 8" x 3 3/4" diameter

Wt. 1 lb. (without screen or cartridge). \$9.75

CW069: Bleuët Windscreen

Wt. 2 oz.\$1.20

EXTRA BUTANE CARTRIDGES (H.)

CW068: (Cannot be shipped via air mail)

Wt. 11 oz. each.\$1.25

Wt. 4 lbs., 8 oz. (Box of 6)\$6.95

Wt. 20 oz.\$14.50
CW120: Svea 123UR Self-Cleaning Stove for Cookset
Wt. 20 oz.\$15.25

BUCK KNIVES

H. H. Buck developed the Buck blade at the turn of the century. The process for tempering it has been handed down as a family secret for three generations. The amazing ability of the knife to hold an edge is due to the high carbon content of the steel and the tempering process.

A superior knife is a once in a lifetime investment. The initial price of a Buck Knife is small when you realize that this knife is **GUARANTEED FOR LIFE** and is a masterpiece of craftsmanship.

All of the models we are offering are equipped with a sheath of genuine saddle leather. A great gift for the equipment "buff" outdoorsman.

BUCK RANGER

New for 1973, this smaller version of the popular Folding Knife has a 3" blade and a folder length of 4 1/4". The handle is of black Buckarta.

MC113: 7 1/4" extended length

Wt. with Leather Sheath 8 oz. \$20.00

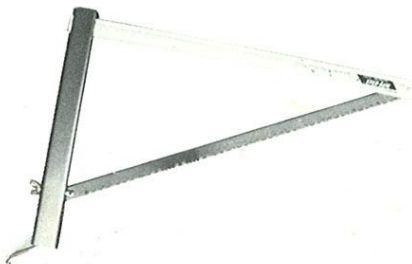

BUCK FISHERMAN

This "fisherman's dream" features a 5 1/2" gentle curving flexible blade for perfect filleting.

MC111: 10" over-all length

Wt. with Leather Sheath 8 oz. \$16.00

FOLDING SAW

This famous folding saw folds to a 19 1/4" length with the blade covered to protect your other equipment. Lightweight and easy to assemble, this folding saw is ideal for backpackers, campers, and also handy around the home for landscape pruning.

MC027: 19 1/4" folding length

Wt. 12 oz. \$7.95

MC028: Spare Blade only

Wt. 3 oz. \$2.50

BUCK WOODSMAN

A 4" straight blade with a fine point.

MC109: 8" over-all length

Wt. with Leather Sheath 7 oz. \$15.00

BUCK FOLDING KNIFE

The 4" blade has a positive lock in the open position. Handle of golden-grain Macassar ebony wood. An ideal heavy duty outdoor knife for those preferring a folding blade.

Durable oak stretchers stabilize and make a uniform width which enables you to lie crosswise as well as lengthwise. This unique feature and exceptional coolness are among its outstanding attractions. MC138: 54" x 82", 13 ft. overall length. Wt. 19 lbs. **\$50.00**

SNOWSHOE FURNITURE

Handcrafted by Tubbs of Vermont

Each piece is carefully and individually developed from the selection of New England hardwoods, specially tanned rawhide to its final dipped and deep-penetrating urethane finish. Although originally de-

signed for camping, boating, and canoeing, enthusiastic purchasers have, over the years, found other uses and enjoyment. All pieces of furniture can be used outside as well as inside.

The Rocker and Armchair models are partially disassembled for safer and less expensive shipment. Both those models are complete with instructions and assembly requires only a screwdriver and five minutes.

SNOWSHOE FOLDING CHAIR

The most portable and versatile in the line and it can be used for sporting events, boating or camping as well as in the family room or den.

Color: Natural Wood

MC195: Folding Chair, Adult Size

Avg. Shipping Wt. 15 lbs. **\$50.00**

SNOWSHOE ROCKER

Sturdy, handcrafted construction throughout with all joints secured by countersunk screws pegged over with matching wood. Woven rawhide pattern.

Color: Natural Wood

MC193: Rocker, Adult Size

Avg. Shipping Wt. 18 lbs. **\$75.00**

SNOWSHOE ARMCHAIR

Similar to the Rocker, with the same unique woven rawhide pattern used in the famous Tubbs snowshoes.

Color: Natural Wood

MC194: Armchair, Adult Size

Avg. Shipping Wt. 18 lbs. **\$75.00**

TURBLOKKEN

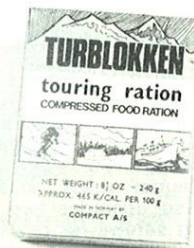

Turblokken has been completely redesigned and IS NOW EDIBLE! Survival situations where this emergency ration had to be eaten were complicated in the past by broken teeth, severe abdominal pain, nausea, blindness, frostbite, and earache. NOT ANY MORE!

Turblokken now contains: Four succulent fruit cake bars, four lemon cake bars with taste and texture the envy of Cordon Bleu, two crushed caramel and milk bars, and two dehydrated soft drink bars to quench the thirst of even the final stage hypothermia case.

NOTE WELL: In the past many claims have been made that Turblokken is a nearly instantaneous cure for athlete's foot, snake bite, appendicitis, colic, heart attack, and as a damp paste, serves adequately as an insect repellent. We would like to state here, clearly, that none of our careful research substantiates these claims; however, it does taste as good as tongue in cheek! Keeps 4 to 5 years.

FD072: 4" x 2" x 1 1/2"

Wt. 10 oz. **\$1.60**

Holubar

Outdoor Equipment Kits

The finest in outdoor equipment kits
by combining Holubar design,
materials and experience, with
YOUR sewing and creativity!

All materials such as fabrics, zippers, VEL-CRO tape and pre-set snaps are the same top quality components used in the famous Holubar products. The instructions for assembly have been developed by people who know sewing—and enjoy teaching people who want to!

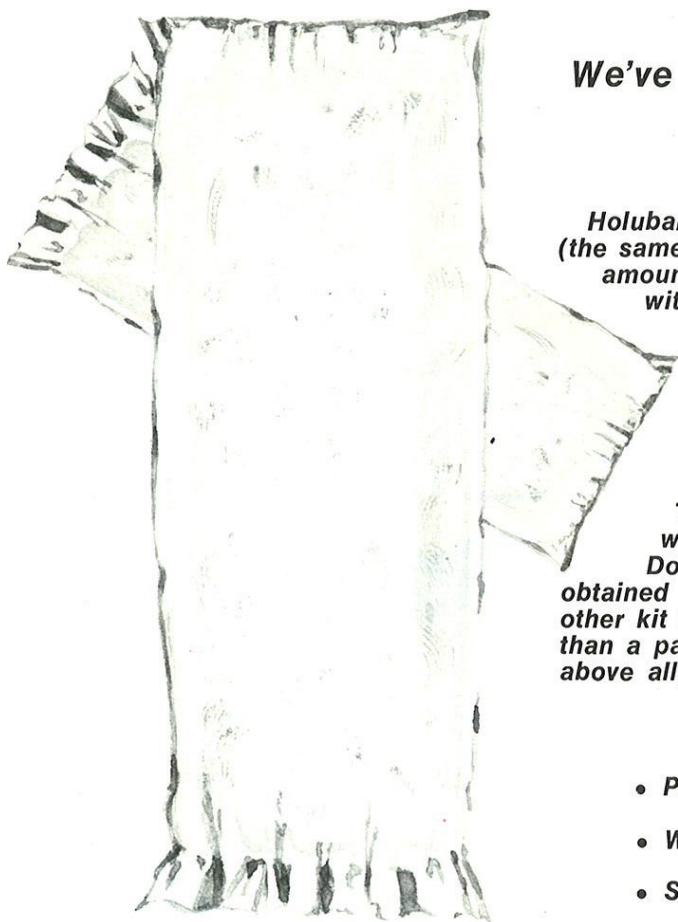

Holubar kits are not a compromise on quality—they are a compromise on price! With our years of experience, and your labor, you can create top products at money saving prices. Holubar kits have been sewn by men and women of all ages—for personal use, for the family, or for gifts.

When you receive your kit, much of the work has already been done! We have spent many weeks designing each product, developing and testing each set of instruction sheets, and assembling and re-assembling each kit until we are sure you will find the step-by-step instructions as simple as they are complete.

Our "PACKETTE*" Down Filling Process..

**We've Spent Time and Effort Handling Down . . .
So That You Won't Have To!**

Holubar's patented Down PACKETTE is a soluble film container (the same idea as a medicine capsule) filled with various pre-measured amounts of Goose Down. All kits requiring Down filling come complete with the proper combinations of PACKETTE's.*

Each PACKETTE is coded for easy identification and placed, unopened, into its own assigned Down channel. The Channel is then sewn shut—totally sealed—you then "pop" the PACKETTE open which releases the compressed Down inside the channel with no mess! PACKETTE's eliminate the problem of loose, illusive Down ending up in your sewing room or house.

The first time the garment or bag is soaked thoroughly and washed, the broken containers dissolve, residue free, and the Down is fluffed. In this way exact distribution of the Down is obtained without any direct handling. If you have ever struggled with other kit Down filling processes, and put more Down in your sewing room than a particular channel, you'll really appreciate the simple, fast and above all, neat process of Holubar Kit PACKETTE's.

- *Pre-Measured Patented Film Container of Down*
- *Water-Soluble Film Dissolves in First Soaking and Wash*
- *Simple to Use — No Mess In Your Home*
- *Laboratory Tested Film Is Not Harmful to the Down or Fabric*

**U.S. Patent No. 3,771,203*

Our Simple Three Step "PACKETTE" Process!

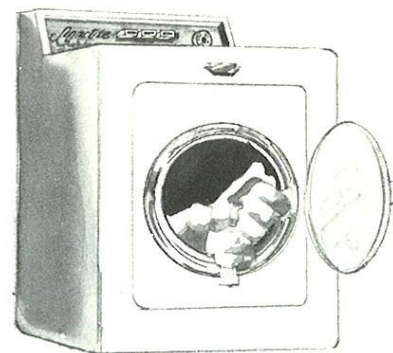

1

2

3

Holubar's patented Down "PACKETTES" are the latest, finest, in "at home" Down-filling methods.—The completely sealed, pre-measured and clearly marked "PACKETTES" of water-soluble Poly-Vinyl Alcohol are inserted, totally, into your Down garment.—After completely sewing the channel shut, they are popped open, distributing just the right amount of Down per channel, leaving no mess on the floor!

To release the Down from the "PACKETTES" after they have been inserted, and completely sewn shut in the proper channels, grasp each end firmly (gather a bit of fabric around the "PACKETTE" to afford maximum flexibility) and "pull" the film apart.—When separated into a few pieces, the film cannot be distinguished from the Down through feel, and will completely dissolve when the garment receives it's first laundering.

The Holubar Kit products launder as readily as any fine Down garments. Remember to pre-soak well in lukewarm water, wash on gentle cycle, rinse WELL, and dry on WARM setting. Between dry cycles, remove garment, pull the damp clumps of Down apart, and reverse garment (inside-out) with zipper partially zipped (to protect the large metal zipper sliders). With a minimum of care, your kit will always look, and perform, like new!

..Quality, Savings and Simplicity!

Is There A "Gimmick" In The Price Savings?

No gimmicks at all — and that is the truth! The savings offered by the Holubar Kits are simply because you furnish the labor and sewing machine to make the product yourself!

How Do Holubar Kit Products Compare To Regular "Ready-Made" Outdoor Equipment?

If you follow the directions, and are careful to do a good job in your workmanship, you have a product that will be as good, and in most cases, considerably better than most brands of outdoor gear. We have never made cheap equipment, and our Holubar Kits are no exception.

How Do The Kit Materials Differ From Those In The Finished Holubar Products?

Basically, they don't! We use the same top quality fabrics, Goose Down, snaps, and zippers that go into the Holubar products. The products differ only in their assembly, and minor design modifications to enable you to "build" them more readily.

Does The Holubar Kit Line Of Outdoor Equipment Kits Differ From Other Brands Of Kits?

Most decidedly so! Our patented Down Packettes are the easiest, "mess-free," and most convenient way to handle down. Our directions are clear to even the novice sewers, and our twenty-nine years experience in making the highest quality outdoor equipment has enabled us to select the best materials and assembly methods for the Holubar Kit products.

What Happens If You Complete A Holubar Kit (or just partially complete) And Decide You Would Rather Have A Holubar Product (or a refund)?

Though very few people ever feel this way — just send it back to us. Your satisfaction is guaranteed or you get a full refund.

Will Any Sewing Machine Work?

We have tested making our Holubar Kit products on about every type of sewing machine around (including treadle machines) and find they all work! If you have a machine that is in mechanical order, you can sew a Holubar Kit with it!

Do All Holubar Kits Require The Same Degree Of Sewing Skill?

Each Holubar Kit is complete with pre-cut materials, easy to follow instructions (with illustrations) and the PACKETTE'S certainly make the Down filling step easier than any other brand of kits; the ease of assembly, will vary throughout the line.

Example: a KINNIKINIC SWEATER is easier to sew than the IGLOO BOOTS.

GROUP KIT ORDERS

If your organization is interested in group kit programs, please write for details:

Holubar, Dept. KP, Box 7, Boulder, Colorado 80302

Outdoor Equipment Kits

Our "sew-it-yourself" Holubar Outdoor Equipment Kits have been as fun for us as they have been successful for our customers.

We have received so many enjoyable comments and suggestions from the many people who have sewn the kits, we hope we can encourage more people to try them!

We have combined our many years experience working with fabrics, patterns, Down, and equipment knowledge to develop those "sew-it-yourself" kit products.—We feel our 29 years of personal attention to detail, quality and service are reflected in these products, and that every component (pre-cut and labeled fabrics, parts, thread, Down, directions, etc.) will allow you to save money, enjoy the experience of making your own top quality equipment, and add a truly unique dimension to your outdoor enjoyment.

The Holubar Kit products shown on the following pages have been developed with regard to: Popularity (those items most often requested), Quality (all components the same as those in the finest ready-made products), and Sewability (cut, labeled, and instructions for even the novice to be able to complete) for your enjoyment.

The guarantee says if you are not happy at anytime during construction — send it back for a full refund! — (our records show less than 1% do!)

Holubar

SEW-YOUR-OWN OUTDOOR CLOTHING KITS

**With Our Patented "Packette"
Down Filling System!**

Holubar outdoor clothing kits are an economical way to outfit the whole family with high quality, field tested garments for those fun weekend campouts or a couple of weeks at that favorite hideaway. Holubar Kit garments are designed for conditions the serious mountaineer might encounter so you can be assured that each clothing item will give you dependable performance.

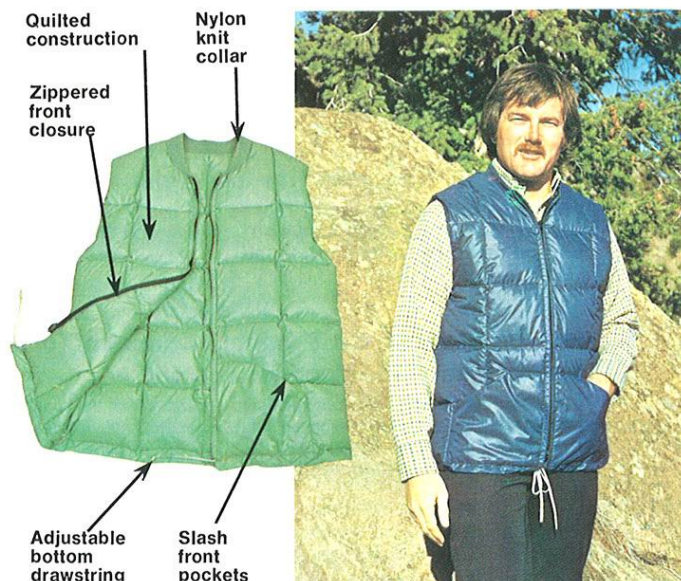

Each Holubar Kit is complete with pre-cut components, thread, accessory hardware such as snaps, zippers or buckles and most important of all, clear, illustrated step-by-step instructions so even the person with limited sewing experience can complete a kit.

Holubar Kits use the same high quality grade of Down as found in the HOLUBAR line, i.e. garment grade from prime Northern geese. We call it AA PRIME NORTHERN GOOSE DOWN... it's the finest available.

Holubar Outdoor Equipment Kits use the same basic construction methods that HOLUBAR has used in its line for over 29 years. Utilizing these basic techniques, each clothing item was designed to accommodate home sewing conditions so the end result is a high quality piece of equipment produced in your home at a SUBSTANTIAL SAVINGS!

The HOLUBAR KIT GUARANTEE:

Holubar guarantees your satisfaction with each kit. If ANYTHING regarding the kit does not meet your expectations, you may return the kit for a full refund (including postage), or full credit towards another product.

Holubar "ALEUTIAN VEST" KIT

The ALEUTIAN VEST is a functional, rugged, extra warmth vest with a sewn-through-seam construction. The sleeveless design allows the vest to be worn by itself or under your climbing parka, hunting jacket, or in your sleeping bag for extra warmth. The front closure is a #7 Y.K.K. ZIPLON Coil zipper. The Y.K.K. zippers have proven superior to metal zippers in ease of operation and dependability. The large size ALEUTIAN contains 4¼ oz. of Down. From the base of the collar to the bottom hem, the measurement ranges from 25½" (XS) to 29½" (XL) with one inch increments per size. Sage Green or Navy Blue 1.9 ripstop nylon is used in the ALEUTIAN; please indicate which color you prefer.

Color: Sage Green or Navy Ripstop Nylon

Sizes: XS (6-8 Dress Size); S (34-36); M (38-40); L (42-44); XL (46-48)

PANTS: Please send your inseam (measure from the crotch seam to the bottom of cuff), and your waist measurement.

BOOTS: Follow proper sizing instructions on page 23.

Holubar

"BOULDER MOUNTAIN PARKA" KIT

The BOULDER MOUNTAIN PARKA combines the features of high quality mountaineering wear and sailing foul-weather gear. This parka is popular for its smart styling and functional design.

The BOULDER MOUNTAIN PARKA kit features a SUPERNYL lining giving you a double layer of fabric throughout the body and sleeves. The outer shell is tough STORM CLOTH, a blend of Polyester and Cotton. There are five pockets in the parka. The two lower patch pockets are roomy and have closure with VELCRO strips, as does the left breast pocket. The remaining two pockets include a back pocket, a handy out of the way pocket for a sweater, down vest, or lunch; and front pocket with a slant entrance for storage of maps, valuables, etc. Both of these pockets close with a #5 (medium size) Y.K.K. DELRIN zipper, and is fully inset for added protection against the elements.

Beneath the front wind flap and its VELCRO closure is a durable #10 (large size) Y.K.K. DELRIN zipper with two-way slider system — zipper can be opened from top and bottom for ventilating action or non-restrictive movement. This front opening also has an internal draft flap. The hood and drawstring design allows adjustment of the hood to cover as much or as little of the head and face as desired without obstructing vision. The waist has an adjustable, inside drawstring and the wrists have infinite adjustable, VELCRO closure. From the base of the hood to bottom hem, the measurement ranges from 32" (XS) to 36" (XL) with a one-inch increment per size.

Colors: Navy, Forest Green or Orange

Sizes: XS (6-8 Dress Size); S (34-36); M (38-40); L (42-44); XL (46-48)

KT200: BOULDER MOUNTAIN PARKA (in kit form)

Wt. 1 lb. 5 oz. \$26.75

The Carikit (Holubar Kit) parkas I ordered were splendid. If a mother likes to sew and wants to please her children, these are a sure bet. I've made two parkas this week but have four children so I would like to order two more "Mountain Parka" kits. The home sewer can't easily find materials or directions to make professional quality jackets and gear. I'm enthused about what you are doing!

Mrs. David Jackson
Santa Fe, New Mexico

Holubar

"CHILD/JUNIOR MOUNTAIN PARKA" KIT

As a good children's wind parka is normally not available, or too expensive, the CHILD/JUNIOR MOUNTAIN PARKA kit offers a very practical solution at a reasonable price!

Made of the same wind tight, water repellent Polyester/Cotton STORM CLOTH as the adults BOULDER MOUNTAIN PARKA, and lined with SUPERNYL nylon, the parka is extremely durable, and machine washes wrinkle-free.

The sleeves have adjustable VELCRO cuffs (just like Mom's and Dad's), has two large patch pockets on the front with "automatic closing" VELCRO sealed flaps, has a nylon drawstring on the inside waist, and a nylon drawstring in the hood. Front closure is a #7 Y.K.K. ZIPLON Coil zipper.

The parka fits well by itself, or over a heavy wool sweater, or Children's Down KINNIKINIC SWEATER.

This is one Children's Parka that will not wear out! The CHILD/JUNIOR MOUNTAIN PARKA kit comes complete with all pre-cut fabric pieces, VELCRO, drawstrings, thread, and easy-to-follow instructions for sewing.

Colors: Navy, Forest Green, or Orange.

- VELCRO tabs seal zipper cover for "automatic" closure

Holubar

"KINNIKINIC SWEATER" KIT

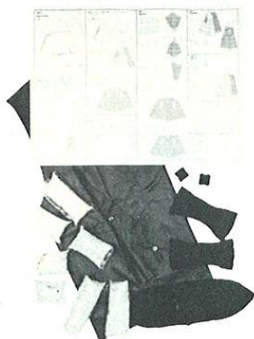

The KINNIKINIC is an all purpose outdoor garment that insulates better than several heavy sweaters with minimum weight and pack bulk. The Down is held in five-inch squares of quilt with sewn through seams. Wind-tight 1.9 oz. ripstop nylon inside and outside, and three-inch knit cuffs and knit collar provide draft free protection while the Down's ability to breathe is unhampered. The KINNIKINIC can function as an outer cold weather garment on all your trips or serve as an extra Down layer beneath the BOULDER MOUNTAIN PARKA in more severe weather. Size large KINNIKINIC contains 4 7/8 ounces of Down and measures 28 1/2 inches from base of collar to bottom of back, the measurement ranges from 25 1/2" (XS) to 29 1/2" (XL), with one inch increments per size. The sweater comes in either Navy Blue or Sage Green with patch pockets roomy enough for fists full of small gear. A five snap front closure with a 1 1/2 inch over-flap insures warmth and ventilation.

Colors: Navy Blue or Sage Green

Sizes: XS (6-8 Dress Size); S (34-36); M (38-40); L (42-44); XL (46-48)

KT130: KINNIKINIC SWEATER (in kit form)

Wt. 14 oz. \$19.95

Each KINNIKINIC SWEATER kit contains EVERYTHING you need except the sewing machine! All components, thread, and easy-to-follow direction sheets are clearly labeled for step-by-step assembly.

I just completed my Carikit (Holubar Kit) Highland Parka. Due to your complete instructions and high quality materials, sewing the Highland Parka was a lovely experience.

Let me assure you that I am completely thrilled with the Parka. This is my FIRST EVER letter of praise to a company!

Bonnie Keller

Holubar

"CHILD/JUNIOR KINNIKINIC SWEATER" KIT

Patterned after the adults model, the CHILD/JUNIOR KINNIKINIC SWEATER combines the same Goose Down warmth, with feather light weight.

Tough SUPERNYL shell, nylon patch pockets, nylon knit collar and cuffs. The KINNIKINIC can be worn under a wind parka, or by itself as a fall-spring jacket. All pre-cut materials, thread, collar and cuffs, and pre-set snap front, plus easy to follow step-by-step sewing instructions and illustrations are included.

Color: Navy or Red

KT131: CHILD/JUNIOR KINNIKINIC SWEATER (in kit form)

Size	Chest Size	Length	Sleeve Length	Wt.
6	23"-25"	19"	23"	9 oz.
9	26"-28"	22"	26"	11 oz.

14	31"-32"	26"	31"	15 oz.
KIT PRICE				\$16.50

The CHILD/JUNIOR KINNIKINIC SWEATER, just like the adults, can be worn under the BOULDER MOUNTAIN PARKA (page 59) for the greatest combination of warmth and rugged outer protection. On chilly days, wear both. When the sun comes out, roll up and store the sweater in the back pouch in the MOUNTAIN PARKA until its needed again!

Holubar

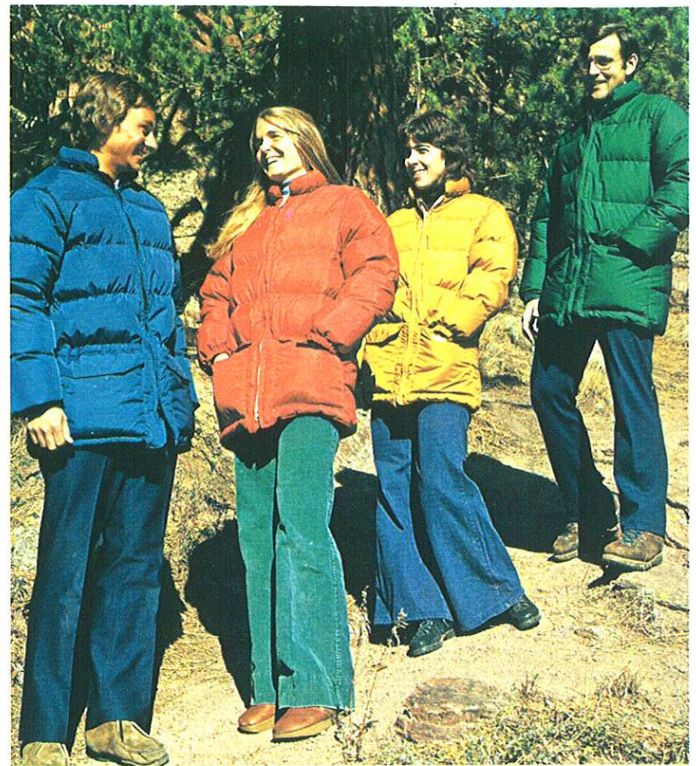

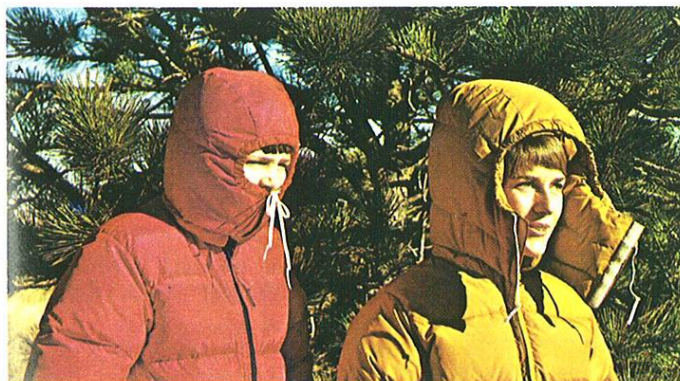

"CHILD/JUNIOR HIGHLAND PARKA" KIT

Waiting for the school bus or playing in the snow, the CHILDREN'S HIGHLAND PARKA offers the same warmth and comfort as a grown-up's parka. This kit features a durable, dense outer nylon fabric called Supernyl, plus a standing Down filled collar, and Down insulated pockets with VELCRO closing flaps . . . great for opening or closing with your mitts on! The front closure is an easy working #7 YKK ZIPLON Coil zipper and other features include smartly styled set in sleeves with elastic cuffs, an adjustable inside drawstring at the waist and pre-set snap band which sews in behind the collar for attaching the optional Down HIGHLAND HOOD. Each CARIKIT Down product features the easy to use, no mess Packette* Goose Down filling system and clearly illustrated step-by-step instructions. The CARIKIT CHILDREN'S HIGHLAND PARKA kit is an economical way to outfit all the kids with their own top quality Goose Down parka!

Holubar

"HIGHLAND PARKA" KIT

The HIGHLAND PARKA is designed with warmth and light weight in mind to make an ideal general purpose parka for the backpacker, skier, climber, and outdoorsman. The inner fabric is Supernyl, a densely-woven, durable and handsome finished nylon with a silicone water-repellent treatment. The outer shell is available in Supernyl or Storm Cloth — a blend of polyester and cotton for maximum wear and excellent comfort due to the pleasant texture of polyester with nylon. Smartly styled, set shoulders allow ease of arm movement. Sleeves have elastic closure cuffs. The front closure is a #7 YKK ZIPLON Coil zipper with a two-way slide system, allowing the bottom to be opened for ventilation or unrestricted movement. Behind and running the length of the zipper is an internal draft flap for total insulation. The large size HIGHLAND PARKA is insulated completely with 14 oz. of Northern Goose Down (Garment Grade) including the down-filled roll collar and down insulated, front patch pockets. From base of collar to bottom of hem, the measurement ranges from 31" (XS) to 35" (XL) with one inch increments per size. Front pockets have VELCRO closing flaps for ease in opening and closing in all weather conditions. Adjustable inside drawstring at waistline. The parka collar has a snap band for optional HIGHLAND PARKA HOOD.

Colors: Navy, Copper or Gold Supernyl,
Navy or Forest Green Storm Cloth

Sizes: XS (6-8 Dress Size); S (34-36); M (38-40);
L (42-44); XL (46-48)

KT100: HIGHLAND PARKA (in kit form), Supernyl
Wt. 1 lb. 11 oz. \$36.25

Wt. 4 oz. \$8.95

Holubar

"YUKON DOWN MITTENS" KIT

Expedition experience applied to skiing and cold weather problems make these tough Supernyl, water-repellent mittens extremely popular. The down filling in the long cuffs and around the hands protect against the wind and cold. The palms of the mittens are of tough goatskin that resists wear and stays soft in cold weather. A nylon loop at the cuff is for fastening against loss. Send hand outline.

Color: Navy or Black

KT181: YUKON DOWN MITTENS (in kit form)

Wt. 5 oz. per pair\$10.95

Holubar

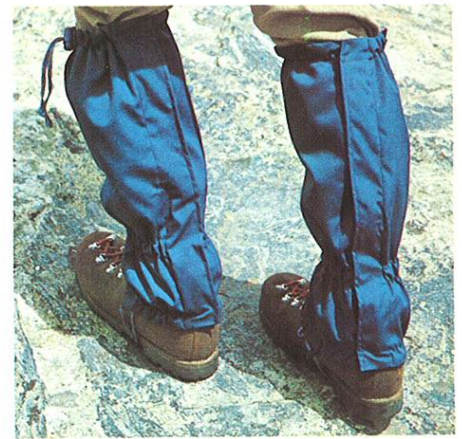

"IGLOO BOOTS" KIT

The IGLOO BOOT is ideal for great warmth and comfort after skiing, around camp, in your tent or sleeping bag, or on mountain bivouac. Insulated with padded insoles of expedition felt, heavy Ranchero soles for greater wear, and a thick layer of Down. The upper portion is sturdy SUPERNYL fabric available in Gold or Navy Blue. Elastic band in back holds boot on, VELCO closure at top.

Color: Gold or Navy Blue

Sizes: Send foot outline and shoe size

KT180: IGLOO BOOTS (in kit form)
Wt. 10 oz.\$10.95

Holubar

"LEG'INS" KIT

The "LEG'in" is a water repellent, high gaiter, made from 65% POLYESTER, 35% COTTON. It features a high #5 YKK DEL-RIN ZIPPER, and a storm flap with VELCRO closure to protect zipper from ice and snow.

The "LEG'ins" are water repellent, excellent for ski touring and snowshoeing, and the kit includes all parts, fabrics, thread, and easy to follow directions for assembly.

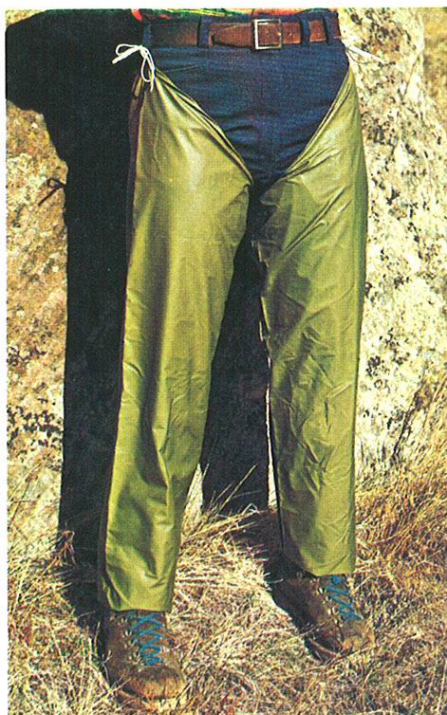

Color: Navy and Orange

KT202: LEG'INS (in kit form)
Avg. Wt. 12 oz.\$11.95

Holubar

RAINWEAR KITS

Holubar rainwear kits provide "foul weather" protection with a minimum of sewing and skill. All rainwear kits are of SUPER K KOTE URETHANE coated nylon. The lightweight weatherproof fabric, (as used in the pre-made Holubar rainwear, page 19) plus easy to follow step-by-step assembly instructions, allow you to make all your rainwear with a minimum of time, skill and money!

"ADULT PONCHO" KIT

A very versatile lightweight piece of equipment that can also be used as shelter or pack protector.

Colors: Orange or Avocado Nylport

KT302: ADULT PONCHO (in kit form)
Medium: (78" x 60") 18 oz.\$11.50
Large: (86" x 68") 20 oz.\$11.75

"RAIN CHAPS" KIT

Chaps slip easily over boots and tie to belt. Individual legs are tough enough to protect the wearer from rain, wind, and brush. One size is designed for a finished inseam length up to 36".

Colors: Avocado or Orange

KT310: RAIN CHAPS (in kit form)
Wt. 6 oz.\$4.25

"BACKPACK PONCHO" KIT

This extra long poncho with off-center hood protects the hiker and his backpack. Extra flap snaps up out of the way when worn without the pack.

Colors: Orange or Avocado Nylport

KT305: BACKPACK PONCHO (in kit form)
Medium: (98" x 68") 22 oz.\$13.50
Large: (106" x 68") 24 oz.\$13.75

"CHILD'S PONCHO" KIT

A miniature of the adult poncho and a versatile piece of equipment for the young hiker.

Colors: Orange or Avocado

KT301: CHILD'S PONCHO (in kit form)
Size: (68" x 49") 12 oz.\$7.25

*"The Finest Sleeping Bag . . .
Starts With the Finest Materials"*

PRE-CUT, PRE-MARKED NYLON

The best water repellent, lightweight RIPSTOP nylon. Designed for use in the finest HOLUBAR KIT sleeping bags.

Y.K.K. DELRIN ZIPPERS

Over-size, heavy duty. With double pull so either end can be opened for ventilation. Two bags, made as described in the instructions, can be zipped together to form a large double bag.

THREAD

An abundant supply to complete all areas of the bag. It is a strong, Polyester core easy to use thread with cotton wrap and will fit any model of home sewing machines. Found in fabric shops around the country.

DOWN PACKETTES

Holubar's patented process for "easiest to handle" Down insulation. The soluble containers (see page 56) have pre-measured amounts of the finest PRIME NORTHERN GOOSE DOWN to provide "expedition" comfort in your HOLUBAR KIT sleeping bag.

ACCESSORY PARTS

All drawstrings, VELCO tabs and HOLUBAR KIT labels are provided to complete the sleeping bag.

DESIGN FEATURES — Developed With 29 Years of Holubar Experience

TRIANGULAR "V" DOWN CHANNELS

For maximum Down control, used in the finest winter sleeping bags.

PARALLELOGRAM DOWN CHANNELS

Down control for lightest weight "three season" sleeping bags. Used in Holubar's popular TIMBERLINE and Kit CHINOOK bags.

BODY PROPORTIONED LENGTH

Designed to be roomy, non-confining, yet optimum weight. Shaped like your body to allow maximum freedom with maximum thermal design.

CHANNEL BLOCK

Downproof, strong ripstop nylon baffle keeps Down in the proper channels, and prevents it from "shifting" around to the backside or bottom.

ADJUSTABLE DRAWSTRINGS

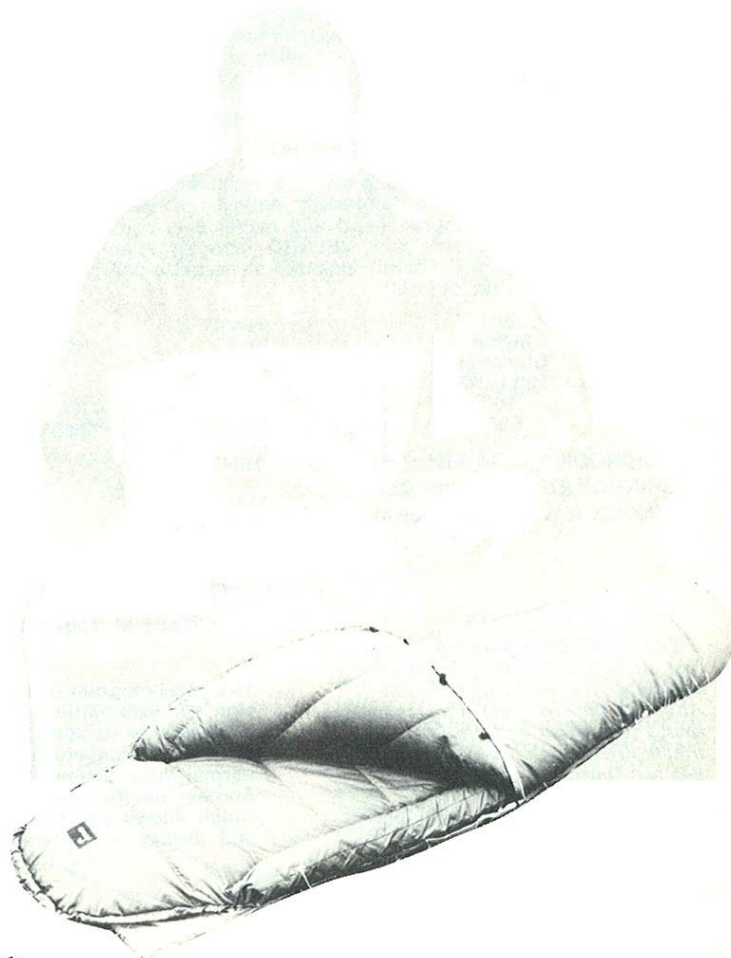

Allows user to "snug-up" shoulder area for draft-free comfort, and/or close hood for maximum protection and warmth around neck and head.

Holubar

SEW-YOUR-OWN SLEEPING BAG KITS

*With Our Patented "Packette" Down
Filling System!*

A Down sleeping bag is a must for the serious outdoorsman, yet the high cost of purchasing a good bag has forced many people to use heavy, uncomfortable, inexpensive sleeping bags. Now you can afford all the comfort and warmth of manufactured Down Bags, made possible by Holubar Down Sleeping Bags in make-it-yourself kit form. Holubar kits offer three bag models, and they utilize only top quality production materials in their respective component parts.

The Most Economical Way To Outfit The Entire Family!

Holubar Sleeping Bag Kit Zip-together Feature.

Holubar "CHINOOK BAG" KIT Three Season Versatility.

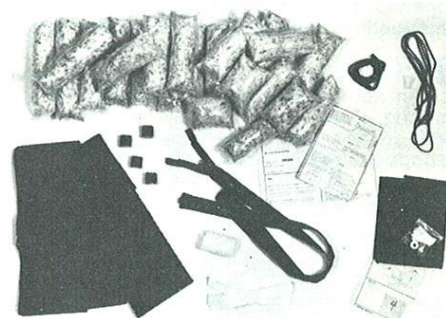

The CHINOOK sleeping bag kit is the most versatile model in the HOLUBAR KIT line of sew-it-yourself equipment. Designed for spring, summer and fall backpacking trips, this bag is rated to 0° F.

The CHINOOK kit is complete with all pre-cut materials and includes all the necessary hardware components — not to forget HOLUBAR KIT's pre-measured Down PACKETTES that allow you to fill each Down channel easy and without loss of any Down. The outer shell material is durable Navy Blue 1.9 oz. ripstop nylon and the inside baffle material used to form the Down channels is lightweight, Downproof 1.1 oz. ripstop nylon.

The CHINOOK utilizes overlapping, circumferential Down channels with a parallelogram cross section for containing the Down filling at its optimum insulating efficiency. Each Down channel is completely blocked with a 4" high baffle opposite the zipper to help control the Down shift and maintain a constant loft. HOLUBAR KIT's use only the finest Garment Grade AA PRIME NORTHERN GOOSE DOWN and the kit instructions clearly specify the quantity of Down required in each Down channel — there are no cold spots or stitched through seams.

You can make the CHINOOK bag either a right or left hand opening bag at the time of assembly and the zipper is a full-length #10 (large size) Y.K.K. DELRIN double-slider zipper. Closing of the contoured hood and neckline is controlled by a locking drawstring. All HOLUBAR KIT bags come with VELCRO tabs for attaching a VESPER sleeping bag liner (optional). Stuff sack (kit form) included at no extra charge.

KT001: CHINOOK BAG (in kit form)

The HOLUBAR SLEEPING BAG KITS are complete with all pre-cut materials and includes all the necessary hardware components. The pre-measured PACKETTES allow you to fill each Down channel easy and without any loss of Down.

Inside Length	Inside Shoulder Hip Girth	Down Wt.	Total Wt.	
5'10"	60"	2 lbs. 8 oz.	4 lbs. 6 oz.	\$74.75
6'6"	62"	2 lbs. 12 oz.	4 lbs. 13 oz.	\$79.00

KT043: CHINOOK EXTRA FILL (optional for CHINOOK only)

5'10" CHINOOK (7¾ oz. extra Down)\$16.50

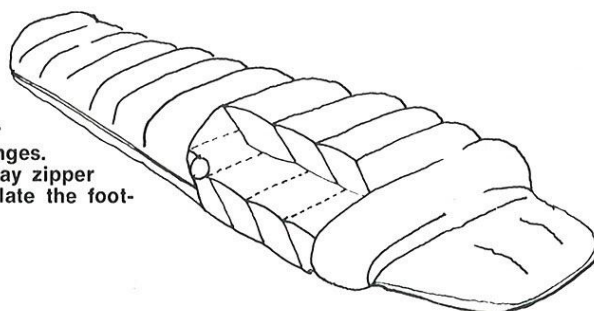

6'6" CHINOOK (8½ oz. extra Down)\$18.50

The "CHINOOK" KIT Has A Parallelogram Down Channel Construction

The Chinook sleeping bag was my first attempt at sewing other than mending a tear in a pair of Levis. Although the task seemed awesome at first, I found that by following the simple directions, step-by-step, the bag was sewn as if by magic. The sense of accomplishment upon completion of the bag is equivalent to that of my first climb.

Thanks! Keep up the fine work!!
Jim Cramer
Hastings, Nebraska

The parallelogram (slant box) design, reduces baffle weight over a "V" baffle design, yet provides more than adequate Down control for normal three Season temperature ranges. Another helpful feature is the two-way zipper which allows you to open and ventilate the foot-end during warm temperatures.

Holubar Sleeping Bag Kit Hood.

Holubar "POLAR BAG" KIT Keeps You Warm Down to -20° F.

The POLAR sleeping bag kit is the finest in the HOLUBAR KIT line. It was designed to give you maximum warmth with a minimum weight and is rated -20° F. The POLAR sleeping bag is comparable only to manufactured sleeping bags costing over \$110.00 . . . sew it yourself and save money! Consider the POLAR sleeping bag a lifetime camping investment!

The POLAR sleeping bag utilizes overlapping circumferential Down Channels with a "V" cross section . . . the most efficient design for cold weather applications. Each Down channel is completely blocked with a 5" high baffle opposite the zipper to prevent the Down from shifting and helps maintain a constant loft when the bag is in use. The POLAR bag has a constant girth from the shoulders through the hips and then tapers to a 39-inch girth at the foot. A single, lock drawstring closes the hood and shoulders of the bag. Stuff sack plus VELCRO tabs for attaching a VESPER liner (optional) are included.

The AA PRIME NORTHERN GOOSE/DOWN (Garment Grade) is easily distributed in each Down channel by HOLUBAR KIT's exclusive PACKETTE Down filling method. There is a premeasured PACKETTE for each channel which eliminates any loss of Down or mess . . . if you've tried other kits, you'll appreciate HOLUBAR KIT PACKETTES . . . The Royal Blue outer shell fabric is durable 1.5 oz. ripstop nylon and the internal baffle system is made from Downproof 1.1 oz. ripstop nylon, both field proven fabrics. The full length, heavy-duty zipper is a #10 (large size) Y.K.K. DELRIN zipper and any HOLUBAR KIT bags can be made into either a right or left side opening at the time of assembly. Two HOLUBAR KIT bags of opposite side opening will zip together. Stuff sack (kit form) included at no extra charge.

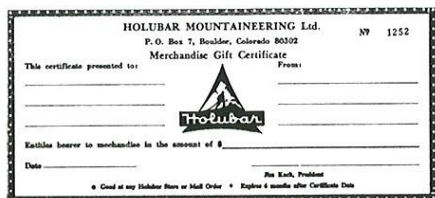

KT010: POLAR BAG (in kit form)

Inside Length	Inside Shoulder Hip Girth	Down Wt.	Total Wt.	
5'10"	60"	2 lbs. 14 oz.	4 lbs. 9 oz.	\$87.50
6'6"	62"	3 lbs. 2 oz.	5 lbs. 1 oz.	\$91.75

KT042: "EXPEDITION DOWN FILL" (optional for POLAR only)

5'10" POLAR (10¼ ounces extra Down)	\$22.00
6' 6" POLAR (10¼ ounces extra Down)	\$25.00

All HOLUBAR KIT Sleeping Bags come with a stuff sack in a sew-it-yourself kit form at no extra charge. A good item to "warm-up" on!

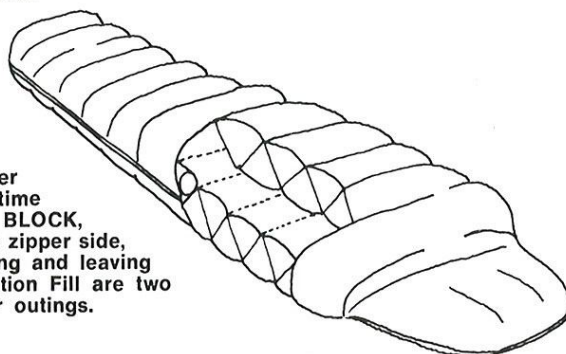

Holubar Gift Certificate

We have always had many people find the Holubar Gift Certificate to be the most practical, thoughtful gift for an "outdoors" friend. —Lately, we have been surprised at how many give the certificate for buying a kit! —Write us for suggestions about how a certificate can be used as just the right answer for that "hard to decide" gift.

The "POLAR" KIT Has A Triangular "V" Down Channel Construction

The POLAR "V" baffle cross section provides maximum Down control, eliminates cold spots and increases the strength and durability of the overall bag construction. Another feature, especially important in wintertime camping, is the HOLUBAR CHANNEL BLOCK, a baffle in each channel, opposite the zipper side, which prevents the Down from shifting and leaving cold spots. Down Collar and Expedition Fill are two options to consider for cold weather outings.

We recently completed our Polar bags and they were just what we had set our highest hopes for. The instructions were simple and easy to follow, the materials are the best that money can buy, and were supplied in exact sizes and correct amounts. In all, the bag looks and performs perfectly, even in the subzero conditions we encountered. We thank you for two great bags!

*Mike and Dan Moe

Holubar "INCHWORM" JUNIOR BAG KIT

A Children's Bag That Grows With Your Child!

We had so many requests for a children's sleeping bag kit, yet one that would serve through many years of growth — we came up with one that "grows" with the user! Instead of spending money on two or three sleeping bags during the "growing years," the INCHWORM bag is made only once, and "grows" with a series of temporarily closed off compartments that can be filled with Down as extra length is needed.

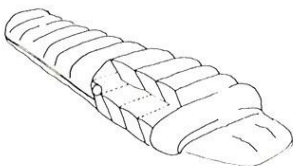

Initially, the sleeping bag shell is made complete with its 5'10" length, but only enough Goose Down is purchased to insulate the first "children's stage. The bottom stages, or "growing room," are closed off and neatly stored inside by two drawcords. The child has an efficient Goose Down sleeping bag, warm as Mom's and Dad's and just his or her size! Then, in a couple of years, release the next stage, purchase the necessary HOLUBAR KIT Down PACKETTES for filling that stage, and the sleeping bag has been expanded! The finished inside length of Stage #1 is 36". The finished length of Stage #2 is 52", and the finished inside length of Stage #3 is the full 5'10". When completely extended and filled, the INCHWORM bag is a full sized adult bag in every respect!

The INCHWORM utilizes the same tough 1.9 ounce ripstop nylon, Y.K.K. heavy-duty DELRIN zipper, thread, reinforcing tape and easy to follow step-by-step directions and illustrations as the other easy to assemble HOLUBAR OUTDOOR KITS.

The INCHWORM bag compares to the full sized adult bag in virtually all respects, but allows the user to utilize only as much sleeping bag as is needed at that particular age. When the child grows, the bag is extended, the newly purchased Goose Down is added (the only sewing at this time being to close the small PACKETTE compartments), and the INCHWORM is a full sized bag! Stuff sack (kit form) included at no extra charge.

The INCHWORM includes the mating parts for attaching the VESPER LINER (optional). Color: Navy Blue.

KT002: INCHWORM Bag Shell (in kit form) and Down PACKETTES for Stage #1	
Wt. 3 lbs. 6 oz.	\$55.95
KT003: Down PACKETTES for Stage #2	
Wt. 7 oz.	\$9.95
KT004: Down PACKETTES for Stage #3	
Wt. 10 oz.	\$11.00

The INCHWORM KIT has the same parallelogram Down channel construction as the Holubar TIMBERLINE in ready-made form.

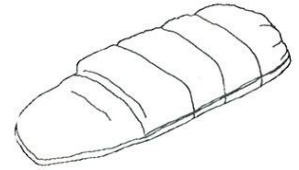

As you can see by my writing, I'm all thumbs so I hesitated ordering any Carikit (Holubar Kit) items. Especially hating to follow directions the way I do. Well I finished the TAG-ALONG bag last night as a surprise gift and it was a surprise first to me because it turned out!

Hope to see the Carikit (Holubar Kit) line expanded . . . especially the simple items!

Bill Gillenwater
Page, Arizona

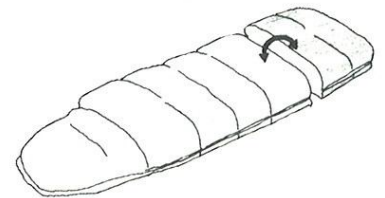

A Sleeping Bag Kit That Grows With The Youngest Members Of Your Family!

STAGE 1

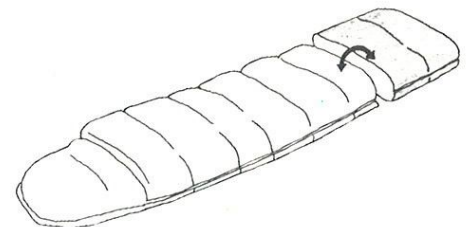

You complete the entire "shell," fill the first section with the PACKETTES as described in the easy to follow instructions, and the "grow room" is sealed off with a convenient drawstring. Consequently, you need not use the extra money, or the extra weight to complete a full size bag. The finished length of Stage #1 is 36".

STAGE 2

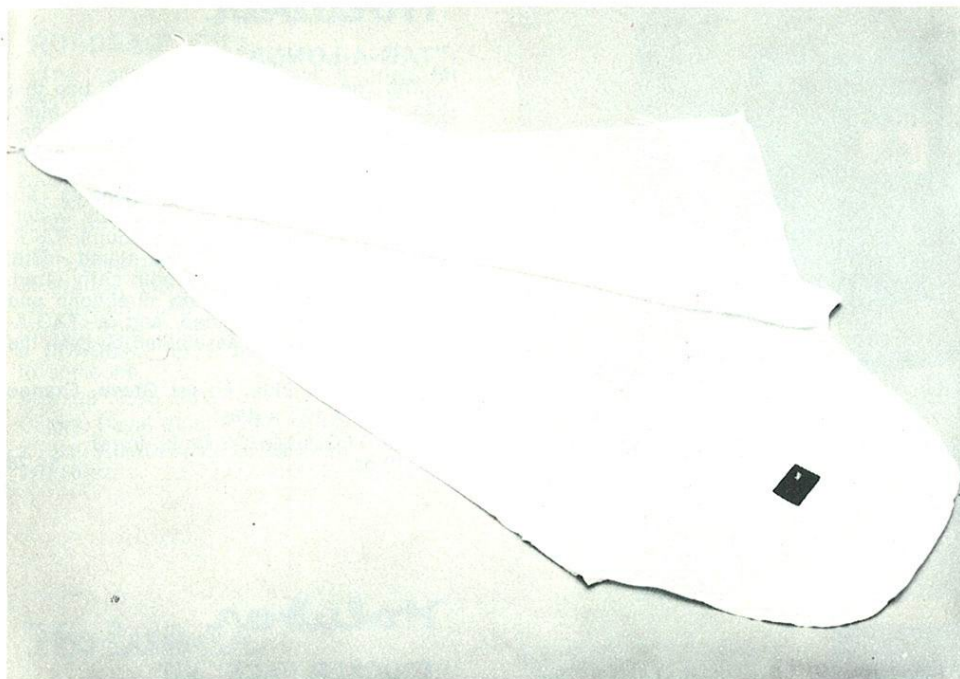

When the extra room is needed (usually after two years), you purchase the Stage 2 PACKETTES, insert them, and you now have a "junior size" sleeping bag! The finished length of Stage #2 is 52".

STAGE 3

The INCHWORM has now reached adult length (along with its user!) and you purchase and add Stage 3 PACKETTES. The INCHWORM is now a regular, full sized adult sleeping bag, and it has provided many years service at the most economical cost and weight formula! The finished length of Stage #3 is 5'10".

Custom Features to Complete Any Holubar Bag for Your Particular Needs!

Holubar "VESPER LINER" KIT

Use of a sleeping bag liner extends the life of the bag by protecting it from soiling and minimizing internal wear and tear. Extra warmth and the luxury of a clean sleeping bag are gained. The liner for a modified mummy sleeping bag should be of a slippery fabric for ease of movement within the bag; and while nylon feels chilly initially, it warms up quickly because it drains less heat from the body than cotton flannel. The liner is made of fine ripstop nylon fabric, and attaches securely on the sides, foot, and hood with numerous VELCRO tabs and ties. Each HOLUBAR KIT

sleeping bag includes the required mating parts for the VESPER LINER. (Does not fit HOLUBAR ready made bags). This particular nylon material is easily washed and dried.

Size: 5'10" (also fits INCHWORM); 6'6"
 KT040: Liner for bag without collar (in kit form)
 Wt. 7 oz.\$7.95
 KT041: Liner for bag with collar (in kit form)
 Wt. 9 oz.\$9.50

Holubar

"BIVOUCAC BAG COVER" KIT

The HOLUBAR KIT sleeping bag cover provides extra warmth and protection with tight weave nylon materials — weatherproof NYLPORT on the bottom and water-repellent SUPERNYL on the top. The cover includes a 54" pocket for insertion of a foam pad. In a bivouac or snow cave condition the roomy HOLUBAR KIT cover comes in handy for dry gear storage (closed cover size is 40" x 94"). The extended bottom folds over the sleeper's head to form a protective waterproof canopy. It is held in place by strips of VELCRO.

Color: Blue SUPERNYL top and Avocado NYLPORT bottom.

KT030: BIVOUCAC BAG COVER (in kit form)
 Wt. 1 lb. 2 oz.\$13.50

The HOLUBAR KIT GUARANTEE:
 Holubar guarantees your satisfaction with each kit. If ANYTHING regarding the kit does not meet your expectations, you may return the kit for a full refund (including postage), or full credit towards another product.

"DOWN COLLAR" KIT

An Original Feature by Holubar

The HOLUBAR KIT DOWN COLLAR is designed for cold weather use to eliminate any possible drafts. The COLLAR is made of 1.9 oz. Navy or Royal Blue, ripstop nylon and contains 3½ oz. of Northern Goose Down. With its own drawstring the DOWN COLLAR can be adjusted independently of the sleeping bag's shoulder and hood adjustment. A strip of VELCRO on the zipper side allows easy entry and exit. The HOLUBAR KIT DOWN COLLAR is an essential, winterizing accessory for your sleeping bag, increasing the efficiency of any bag with a shoulder girth between 50" and 70" will accept the HOLUBAR KIT DOWN COLLAR. Width is 8½ inches.

Color: Navy Blue or Royal Blue

KT020: DOWN COLLAR (in kit form)
 Wt. 6 oz.\$9.95

I'm ordering a HIGHLAND DOWN PARKA and a set of RAIN CHAPS. I have ordered from Carikit (Holubar Kit) before and am very pleased with the products and service.

I have to take this opportunity to say how pleased I am. Your service is excellent. When I ordered my MOUNTAIN PARKA air mail, it came in three days. The parka itself was a delight to sew. I am an experienced sewer and had no trouble whatsoever with either of the parkas. I abused my parka during five weeks of forestry field camp in the Adirondack high country and it still looks brand new. The pockets have been stuffed and the entire jacket has carried around 30 pounds of surveying equipment for a crew of 6. I love the jacket. Thanks a lot and I promise to order from you for all my down products.

 Syracuse, New York

Holubar ALL PURPOSE BAG KITS

Holubar

"TAG-A-LONGS" KIT

The "go anywhere" "catch all" bag that has a hundred different uses. For Mom, Dad, school, travel — for a purse, diapers, school books, business papers. TAG-A-LONGS can tag along with everyone!

The HOLUBAR KIT components are made of CORDURA, a heavy-duty waterproof nylon oxford fabric, a tough Y.K.K. DELRIN zipper, and nickel plated metal slides for the adjustable length carry strap. All parts and step-by-step directions and illustrations are included and a TAG-A-LONG is very easily assembled by even the novice sewer.

Colors: Royal Blue, Forest Green, Orange

Size: 12" x 12" x 4½"

KT525: TAG-A-LONGS (in kit form)

Wt. 10 oz.\$6.75

Holubar

"TRUCKER PACK" KIT

A great little pack for day hikes, school books or bicycling, the TRUCKER PACK is made from heavy duty waterproof CORDURA nylon, has adjustable nylon web straps, chrome plated hardware attachments, leather accessory strap medallions on bottom, and comes complete with thread and easy to follow directions for sewing and assembly.

Colors: Royal Blue, Forest Green or Orange

KT527: TRUCKER PACK (in kit form)

Wt. 12 oz.\$9.50

I have just finished the Carikit (Holubar Kit) BIKE BAG. I was really happy with the ease of instructions and especially the end result! It was GREAT and I had a lot of fun making it. The receiver of the gift was really pleased, we have wanted to make a Kit product for a long time. It was fantastic and we will be ordering many other kits in the future!!

*Martha Myers
Flagstaff, Arizona*

Holubar

"BIKEBAG" KIT

We had so many requests for a high quality bicycle pack we came up with one you can make yourself!

This two compartment pack is designed specifically for use with any full sized bike. VELCRO attachments snap quickly and easily around any handle bars and front frame, and allows easy access through top lid while attached securely to the bike. When you park simply "flick" open the VELCRO tabs, remove the complete pack from the bike, and carry the BIKEBAG with you via the hand grip at the top.

Waterproof heavy duty CORDURA nylon, VELCRO, all thread and straps, plus easy to assemble directions come with the BIKE BAG KIT. Very easy to complete in a couple of hours.

Colors: Royal Blue, Forest Green or Orange

KT528: BIKE BAG (in kit form)

Wt. 7 oz.\$8.50

Holubar

"ROADBAG" KIT

The "grab it" and "haul it" bag for sportsmen, students, travelers, or a conversational purse! Made of the same CORDURA heavy-duty waterproof nylon oxford fabric as the TAG-A-LONGS, the ROADBAGS have full length Y.K.K. DELRIN zipper for easy access, and can carry "just about as much as you want to take to the road"!

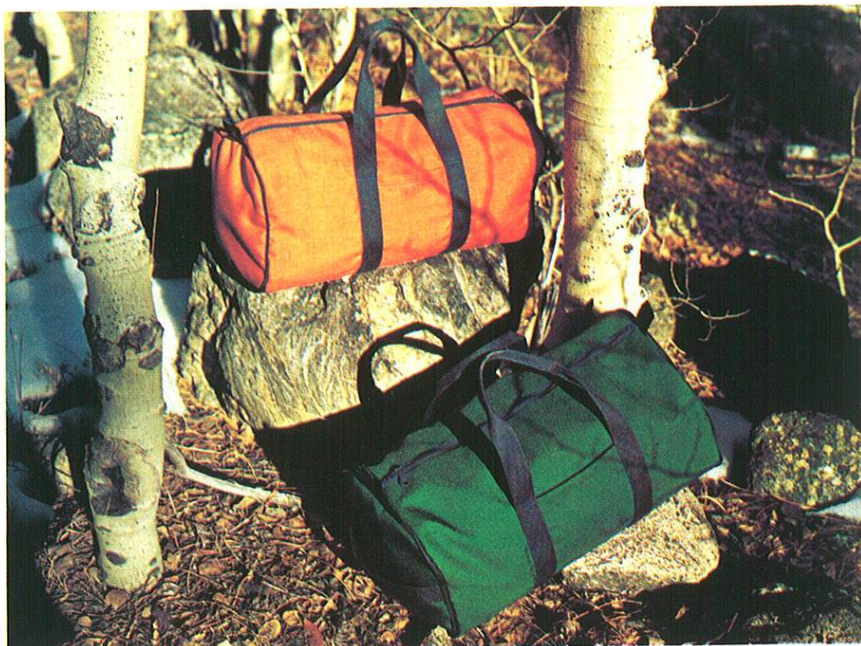

ROADBAGS come in Navy, Forest Green or Orange, and every part is included (even the thread), with the easy to follow step-by-step directions and illustrations. Make a ROADBAG for a most appreciated gift to someone.

Size: 18" long x 8½"

Colors: Royal Blue, Forest Green or Orange

KT526: ROADBAGS (in kit form)

Wt. 10 oz.\$8.50

Holubar

"SUPER ROADBAG" KIT

Since introducing all-purpose bags in our HOLUBAR KIT line, we've found them to be very popular items with home sewing customers . . . The SUPER ROADBAG now offers a new cargo size to complement the regular ROADBAG size.

Made of CORDURA, a durable, waterproof nylon oxford fabric, the SUPER ROADBAG measures 12" x 26"! The main bag compartment closes with a 24 inch, #5 Y.K.K. DELRIN zipper including end "holding tabs" for ease in opening and closing. The straps and handles are 2" wide nylon webbing designed to give you three carrying positions. The main handle straps run completely around the bag for added reinforcement and across one end is a second handy "grab" handle. The third carrying position is similar to a backpack as the main handles are designed to allow you to slip your arms through the straps and position the bag on your back just like a contour type pack.

On one end is a special compartment with zipper closure entry. This compartment is separated from the main compartment by a weatherproof NYLPORT pocket. The end compartment is roomy and allows easy access storage without interrupting the contents of the main compartment. A third "slip-in" type pocket is found between the main handles for convenient, quick access.

The SUPER ROADBAG is easy to assemble and can be laundered or dry cleaned.

Size: 12" x 26"

Colors: Royal Blue, Forest Green or Orange

KT529: SUPER ROADBAG (in kit form)

Wt. 1 lb. 8 oz.\$12.95

THE VERSATILE

"SUPER ROADBAG"

ROOMY END COMPARTMENT WITH ZIPPER CLOSURE

The SUPER ROADBAG has a total of three "easy access" pockets. The MAIN COMPARTMENT closes with a 24 inch #5 Y.K.K. DELRIN zipper. The END COMPARTMENT is separated by a weatherproof NYLPORT, zip closure pocket, and a "SLIP-IN" POCKET is between the main handles.

BACKPACK POSITION

I recently made one of your SUPER ROAD BAGS. I must commend you on your products, as I was extremely impressed with the ease of construction and with the instructions, which were very clear and easy to follow. I am super-pleased with the finished product.

"SUMMER HOMES" YOU BUILD YOURSELF!

*The Economical Way of Attaining the
Finest in Backpacking Tents!*

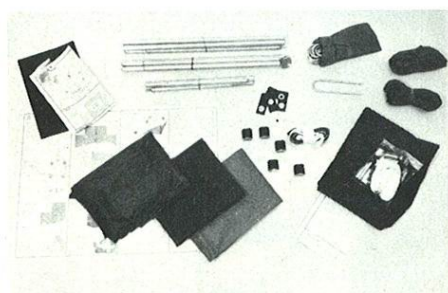

Everyone has tried their hand at re-modeling a room, "fixing up" a cabin, or maybe even building or re-building an entire house! . . . a tent by any comparison, is a breeze!!!

The HOLUBAR TENT KITS combine the finest designs and lightweight materials, easy to follow step-by-step instructions, and a little of your skill and time.

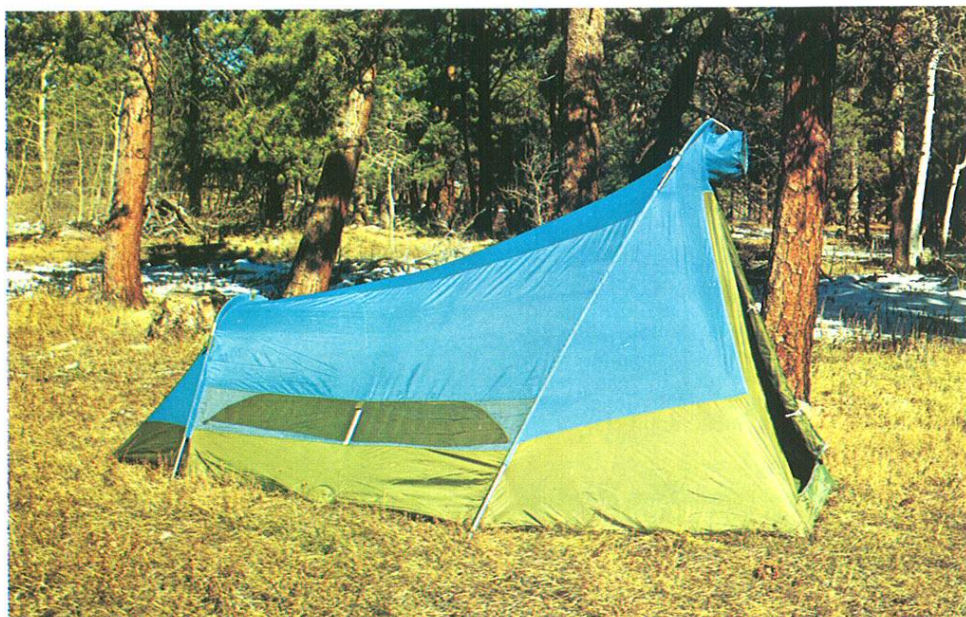

A practical, money saving way of attaining the finest in backpack tents is now available in KIT form.

The same RIPSTOP nylon fabric, thread, URETHANE "K-KOTE" weatherproof floors, Y.K.K. DELRIN zippers, and pre-assembled tubular aluminum poles (with "self-assembly" shock cord connectors) plus easy to follow instructions are all included in the HOLUBAR OUTDOOR EQUIPMENT TENT KITS.

Order one, and "start building."

All HOLUBAR TENT KITS include easy to follow step-by-step directions and illustrations, pre-cut/pre-measured durable nylon fabrics, Y.K.K. DELRIN zippers, thread, VELCRO tabs, grommets, and aluminum poles and stakes. Separate instructions for sewing the stuff sack and rainfly, also included.

Holubar "NOMAD" TENT KIT

A New, Roomy Three Man Tent for 1975!

The NOMAD is 10 feet long, 7'2" wide at the front and 5'5" wide at the rear . . . the front peak height is 5'6" and 28" at the rear peak . . . it's big and roomy! Easy to erect with an external pole system and lightweight, the NOMAD should easily become the most popular tent kit on the market.

All materials are Fire Retardant (FR) treated with a canopy of breathable, 11-A ripstop nylon; floor, sidewall and front door are NYLPORT, a durable Urethane coated nylon taffeta. The rainfly is a Polymer coated 1.5 oz. ripstop nylon and features an "easy-to-enter" zipper on the centerline of the front overhang which allows you to fold the fly back when entering the tent.

The triangular front door opens with one zipper down the side and one zipper across the bottom, both smooth running, #5 Y.K.K. DELRIN zippers. Across the entrance is a 6" high (varmint proof) sill. The mosquito netting door zips like the front

door (varmint proof) and ties aside when open.

Large side vents (7" x 57" each) open with #7 Y.K.K. ZIPLON coil zippers and are backed by mosquito netting. Additional inside features include four storage pockets and ridge loops for attaching a clothesline.

A total of 14 stakes are included, along with sectioned aluminum tent poles with shock cords and aluminum arches. The NOMAD kit is complete with pre-cut materials, thread, zippers and easy to read sewing instructions. Tent roll size is 10" x 22". Waterproof stuff sack included (in kit form).

Color: Blue Canopy/Avocado Floor.
Forest Green Rainfly.

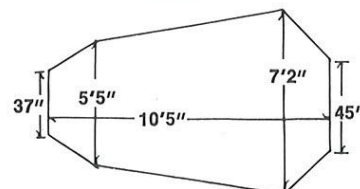

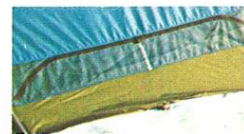

KT403: NOMAD TENT KIT (complete with rainfly, poles and tent stakes).

Shipping Wt. 9 lbs. 12 oz.
(including stakes) \$125.00

The Rainfly features an "easy-to-enter" zipper on the centerline of the front overhang.

Large side vents open with zippers and are backed by mosquito netting.

Holubar "HUT" TENT KIT

The Perfect Sew-It-Yourself Two Man Tent!

The HUT is a functional tent. In it we have combined sophisticated design, materials and expedition experience to meet the demands of both the serious mountaineer and the week-end backpacker . . . ultimate lightweight and protection.

The canopy is 1.9 oz., ripstop nylon, a lightweight fabric that can withstand the continual wear of severe weather, hauling and storage. The floor of the tent is 5' wide at front, tapering to a 4' width in the rear, and is 7'6" long. Floor and side walls are cut from 2.5 oz. Urethane coated NYLPORT. The waterproof protection of the floor piece continues for 12 inches up the sides all around the HUT. This sidewall design — 12" vertical walls, and front peak "A" style poles — allows for full use of the floor area. Zippers close the triangular front door and mosquito netting just inside the front entrance. A small porch extends over the front to shield the entry from rain while a large hooded insect-tight vent allows flow-through ventilation from the rear

of the HUT.

All materials are Fire Retardant (FR) treated. The HUT rainfly is 1.5 oz. Polymer coated (TEMPER KOTE) ripstop nylon. When put up, the rainfly or canopy fits on top of the HUT poles with minimum two-inch clearance and extends below the waterproof sidewalls for added rain protection.

Aluminum poles are included in the kit and are complete with shock cord to keep the segments together. All guy lines and aluminum stakes (14) are included. Tent and poles roll into a 6" x 21" waterproof nylon stuff sack which is also included (in kit form).

Color: Blue Canopy/Avocado Floor.
Forest Green Rainfly.

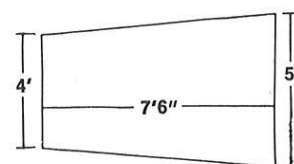

KT400: HUT TENT KIT (complete with rainfly, poles and tent stakes).

Shipping Wt. 6 lbs. 12 oz.
(including stakes) \$77.50

The Rainfly extends below the sidewalls for added rain protection.

Large hooded, insect-tight rear vent allows flow-through ventilation.

Holubar "SUPER TUBE" TENT KIT

The Versatile Tent for Any Outdoor Use!

A "super flexible" tent for the money, the SUPER TUBE combines many of the nice features of a regular backing tent, with the simplicity in design and construction of a "tarp type" tent. The SUPER TUBE can be used as a one man tent, or unzips to a floorless, two man tent. If desired, two can be zipped together for a large (6' high) three man tent!

All materials are Fire Retardant (FR) treated with mosquito net on door, plus drawstring closure on both ends for maxi-

mum weather protection, nylon tape tabs for guyline pull-outs. Can be pitched in various configurations, and tied to trees, shrubs, rocks, etc. — no poles needed. All pre-cut materials, nylon web tabs, mosquito netting, plus easy-to-follow directions are included. Fabric is Nylport.

Color: Avocado (9' x 10' Flat Size)

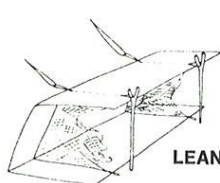

KT402: SUPER TUBE TENT KIT (in kit form)

Wt. 2 lbs. 10 oz. \$27.50

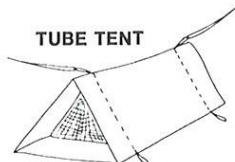

Front door with mosquito netting and drawstring closure for maximum weather protection.

"VAGABOND VEST" KIT

Easy to Sew Yourself! Save Money!

The VAGABOND is our newest clothing item in HOLUBAR KITS and features handsome styling, versatility and comfort. Made of the same materials as found in Holubar's ready-made line.

Jacket length with a Down insulated stand up collar, the VAGABOND is insulated with Garment Grade AA Prime Northern Goose Down insulation (5½ ounces in a size medium) contained efficiently in a quilted construction with 4 inch intervals. Slash hand warmer pockets are insulated and covered with a reinforced flap. The shell material is SUPERNYL, a very wind-tight, water repellent nylon taffeta that has a very fashionable finish, and is very easy to clean. Other features include, a bottom hem-line drawstring and snap front closure. The VAGABOND KIT comes complete with pre-cut materials, thread, and easy to read illustrated sewing instructions and PACKETTE's* . . . Holubar's patented method for filling Down products. The PACKETTE is a soft water-soluble film container filled with a pre-measured amount of Goose Down. Easy to use and leaves no loose Down in your home! Sized for men and women.

Colors: Copper, Navy and Forest Green

Sizes: XS (6-8 Dress Size); S (34-36); M (38-40); L (42-44);
XL (46-48)

KT183: VAGABOND VEST (in kit form)
